UG4

1910

MAIN

IN presenting this catalogue to our patrons, we have eliminated from its pages all patterns of instruments that are obsolete, also those patterns that are not used in modern surgery. We have tried to list every instrument or article under its proper name and heading.

Quality

We guarantee every item listed and sold to be of the best quality, and stand ready to replace without expense to the purchaser, any article that proves defective in construction or material, after use.

Infallibility

We use every endeavor within our power to please our patrons. We are not *infallible*. Sometimes we make mistakes. If anything occurs which is not thoroughly satisfactory please tell *us promptly*. We cannot make corrections until we know of the error. It is an injustice both to yourself and to us to harbor an unsatisfactory incident and say nothing to us. We are always ready to meet any just claim.

Co-Operation

We thank our patrons for their past favors and kindly interest. We solicit not only your trade but your ideas and suggestions. It is only by our working together and by our coming into closer contact with each other that we can unitedly build up our mutual reputations and business.

Wm. Hatteroth's Surgical House

An Understanding

WHEN ordering please be explicit, not only in giving name, address and shipping directions, but in specifying the articles wanted by giving name, section letter and number. When two or more sizes are listed under one number please be careful to state the size desired.

Unless otherwise ordered all goods will be sent by express, except in cases where small articles go cheaper by mail, when the postage will be charged on the bill. Whenever requested to do so we shall be glad to accommodate by prepaying transportation charges and entering the same upon the bill.

When cash accompanies the order with the request that goods be sent by mail the amount of the postage should be sent also, otherwise goods will go by express and transportation charges follow.

Orders from parties unknown to us should be accompanied by the cash or satisfactory references.

Goods will be sent C. O. D. with privilege of examination when the order amounts to \$3.00 or more and when order is accompanied by an amount sufficient to pay express charges both ways.

All remittances should be made by draft, money order, or express order. When money is sent in any other way the amount of the exchange should be added.

All prices listed are net, except where special discounts are mentioned.

Our goods are thoroughly examined and carefully packed before leaving our establishment. They should reach their destination in perfect condition. Our responsibility ceases when goods are delivered to the carrier.

Search all packing carefully before claiming shortages. We make no charge for boxing or packing.

The Perfected Tagliabue Cardiac Sphyngo-Manometer

A-377

Purpose—The Tagliabue Cardiac Sphyngo-Manometer for indicating blood pressures, not only embraces all the improvements that have been made in the construction of the various metallic or so-called aneroid-sphygmo manometers in the past thirty years, but also has several exclusive superior features.

The Cardiac is an efficient instrument for the purpose designed, and is rapidly replacing, for general use, the mercury manometer.

Use—The Cardiac is being used by examiners for the leading life insurance companies, by prominent hospitals, and by departments of health in a number of our large cities.

For general practice it is unsurpassed. It is practically indestructible, and is particularly adapted for use in the operating rooms of all practitioners.

Advantage—The Cardiac is not a delicate apparatus like the mercury manometer, which must be set up and carefully handled to take observations. The Cardiac is self-contained: it can be taken out of the pocket at a moment's notice, instantly applied, and as quickly removed.

Convenience—There is no mercury to spill, no glass to crack, and everything is contained in a small leather case that can be slipped into the pocket.

The Cardiac is always ready in any place, in any position and at any time. For accuracy, sensitiveness, portability and simplicity it stands in a class by itself.

Construction—The Cardiac consists of a gage, an arm-sleeve and an inflating bulb.

Arm-Sleeve—The arm-sleeve is made of materials which are strong, soft and durable. The rubber pressure-bag, for producing pressure on the arm, is made of the most elastic and durable rubber obtainable and, when worn, may be readily removed from the sleeve for repairs or replacement by a new one.

The sleeve which is fastened to the arm like a roller bandage, is made more secure by the strap and buckle while observations are being taken.

The Gage—The Cardiac gage is made to measure pressures from 0 to 300 millimeters of mercury.

The dial is graduated to read to centimeters and fifths of centimeters. By a simple arrangement, the dial is freely movable, so that the index needle can always be adjusted to the zero of the scale.

The instrument is not in any way affected by atmospheric pressure or temperature.

Vent-Valve—Provisions are made, by a valve interposed between the inflating-bulb and the arm-sleeve, for creating a slight leak by simple pressure of the thumb.

This valve is rendered necessary, in order to observe the exact point at which the pulse returns to the wrist.

A-377 The Perfected Tagliabue Cardiac Sphyngo-Manometer, complete with sleeve and bulb, in a rich, compact leather case.....net \$25 00

 A-382 The Pulsograph, No. 427, Nickel Case, Ladies size, net 10 00

A-378-382

THE PULSOGRAPH WATCH. THE IDEAL WATCH FOR NURSES.

This is a combination of a watch of the Highest Grade and precision with the Pulsograph for counting the pulse. It is manufactured in the most accurate way and of best materials. Its time keeping qualities and mechanism are warranted in every way. Made as shown in illustration, and also with leather strap bracelet for attaching to wrist. Made in ladies' size only.

 A-391 The Pulsograph Watch, No. 418, Sterling Silver Case, with leather wristlet, net..... 20 00

A-383-391

THE SPHYGMOMETER. THE IDEAL WATCH FOR MEDICAL MEN.

The Sphygmometer is highly recommended by prominent physicians, and is operated the same as a chronograph. By pressing the push-button placed above the crown, the large second hand is set in motion and the counting of the pulsation begins; at the twentieth pulsation the motion of the hand is stopped by another pressure of the push-button. On the dial will now be accurately indicated the exact number of pulsations per minute. A third pressure on the push-button brings the hand back to the starting point. The use of this instrument does away with the necessity of observing the progress of the watch while taking the pulse, and in addition insures an absolutely correct record.

- A-392 The Sphygmometer, No. 420, Oxidized Gun Metal Case, net\$25 00

A Clinical thermometer that every physician and nurse will appreciate.

A-612-613-614

There is probably no instrument that is used oftener by the profession than the clinical thermometer. While every physician is an adept at reading indications, it is at best an annoying and bothersome task when the old style "hard to see" clinical is used. The long desired improvement of Easy reading has been made in our E. Z. C. Thermometer.

The scale is divided into two separate and distinct sections—the sub-normal scale (below 98.6), which appears in black, and the "fever scale" (above 98.6), which appears in red. The result is that the mercury column of this Thermometer shows with a pronounced step or jog at the normal point, if the temperature reading is within the fever scale.

The "E Z-C" Clinical Thermometer has all the good points of other high-class Thermometers, coupled with extreme accuracy.

A-612	The E. Z. C. Clinical Thermometer, 2 minute.....	\$1 00
A-613	The E. Z. C. Clinical Thermometer, 1 minute.....	1 25
A-614	The E. Z. C. Clinical Thermometer, ½ minute.....	1 50

THE "TAGLIABUE" STANDARD CLINICAL THERMOMETERS.

A-610-615-620

Standard Clinical Thermometers represent the highest type of thermometer made either in this country or abroad. They are made of the best glass obtainable, by only the most skilled workmen, are fully seasoned before being graduated, are carefully retested before shipment, and are guaranteed not to increase their reading with age. They are guaranteed to be free from all imperfections, and absolutely correct as certified.

In order to avoid substitution, the word "Standard," the series No. 222, and the trade mark of the manufacturer is engraved on each. Certificates issued by the U. S. Government Bureau of Standards or the manufacturer accompany each instrument. We highly recommend the use of this thermometer to physicians who want an instrument, the accuracy of which can be thoroughly depended on.

Diagnostic

A-622

THE "ZIPP" CLINICAL THERMOMETER CASE A-622.

The principal feature of the patented Zipp case is the centrifugal action employed for mechanically forcing the mercury into position for another reading. Centrifugal action is the principle employed by the Washington Bureau of Standard and by large manufacturers of thermometers for doing the same thing on a large scale.

Within the metal case a spiral spring fastened to the bottom of case, and running to the top, is fastened to a revolving ferrule provided with two openings for the reception of the thermometer. If this ferrule is revolved the spring necessarily "winds up" and rapidly rotates the ferrule in the opposite direction when released, throwing the mercury in the lumen or tube of the thermometer to the periphery or bulb end of the thermometer tube instantly. An adjustable clip for securing the case to the pocket, and to prevent rolling.

The "Zipp" case is furnished only with E. Z. C. and Standard thermometers, and is not sold separately.

THESSICO CLINICAL THERMOMETERS

A-616-617-618

The Thessico thermometers are made up in the best manner by the most experienced workmen. The glass of which they are made is seasoned so there will be no contraction of the tube, changing the reading of the thermometer after it has once been graduated. They register in one minute and are guaranteed to be perfect in every respect. The graduation scale is made in two Colors, above Normal, showing fever, in red. Normal and Sub-normal in black, so that readings are easily and quickly made. ANY READING IN RED INDICATES FEVER.

They are put up in a hard rubber THESSICO SAFETY CLASP CASE.

Microscopes

Spencer Microscopes

The No. 10 Microscope described on the following pages is the largest, most complete and convenient instrument offered by any firm. When a physician wants the best, No. 10 is what he ought to have, but any of the following Spencer microscopes will do nicely for the every-day clinical diagnosis. They are *larger, more convenient, more solidly built, more durable and better finished* than any other make.

In detail, Spencer microscopes are superior in that

All fine adjustments are absolutely accurate.

All fine adjustments are automatically lubricated.

All fine adjustments automatically cease to work when the objective rests firmly on the cover glass.

All fine adjustments are protected so that no harm can come to the delicate threads when the microscope is carried by the arm.

The coarse adjustments are smooth, even and sensitive.

The stages are larger and better protected than on any other instrument.

The substage parts are simple and compact.

Last and most important, the Spencer objectives have long been known for their superior qualities. They have been greatly improved and are now better than ever, and superior to any other.

Spencers Microscopes

Are Guaranteed Both Optically and Mechanically

They are regularly put up and sold with certain combinations of lenses, but any combination may be selected.

The "A" outfit is composed of stand in case with one eye piece (8x) and 16 mm and 4 mm achromatic objectives.

The "B" outfit is like "A" but with the addition of a double nose piece.

The "C" outfit is like "A" but with two oculars (4x and 8x) instead of one.

The "D" outfit is like "B" but with two oculars (4x and 8x) instead of one.

The "E" outfit is like "B" but with the addition of a sub-stage (Abbe) condenser.

The "F" outfit is like "E" but with two oculars (4x and 8x) instead of one.

The "H" outfit is like "F" but with the addition of a 1.8 mm oil immersion objective and the substitution of the triple nose piece for the double.

Prices include cabinet.

Microscopes

Spencer Lens Company's New No. 10 Microscope

This microscope embodies the design, workmanship and skill which together mark its superiority for the highest class of work;—especially for photomicrography. In strength of construction, convenience of parts, beauty of finish and general practical usability there is nothing to equal it.

The large body tube (50mm in diam.) is so arranged that the large photo-micrographic objectives and compensating oculars with the large field glasses may be used with it.

The large arm with handle opening is equipped with our own special side fine adjustment, which has proven so successful. One complete revolution of the fine adjustment head represents a movement of the tube of .2mm.

The distance from the optical axis to the arm is 80mm.

The vulcanite covered stage is 150mm in diameter. The beveled edge is graduated to degrees and the vernier reads to 3 minutes. The revolving stage can be clamped in any angle of azimuth, and centered by means of centering screws.

When the revolving stage is centered nothing but the two vernier readings on the mechanical stage proper are necessary to locate an object, thus doing away with the necessity of taking and keeping a record of more vernier readings.

The mechanical stage is so arranged that it may be easily removed from the revolving stage, thus leaving a large, clear stage for dishes, brain sections, etc., thereby doing away entirely with the necessity and inconvenience of an extra stage. The buttons operating the rack and pinion movements of the mechanical stage are on **concentric axes**, one above another;—the most convenient position possible. The mechanical stage has a lateral excursion of 60mm and a to-and-fro excursion of 50mm, thus permitting the use of slides 2 in. x 3 in.

The complete substage is substantially and compactly built, is raised and lowered by a rack and pinion and is regularly equipped with our **achromatic condenser**. The condenser may be accurately centered by means of centering screws and is provided with an iris diaphragm between the lenses. There is also an iris diaphragm beneath the condenser on an automatic swinging arm. This diaphragm may be decentered by a rack and pinion to obtain oblique light and may be revolved to obtain this oblique light from any direction.

The mirror is mounted on an independently swinging bar.

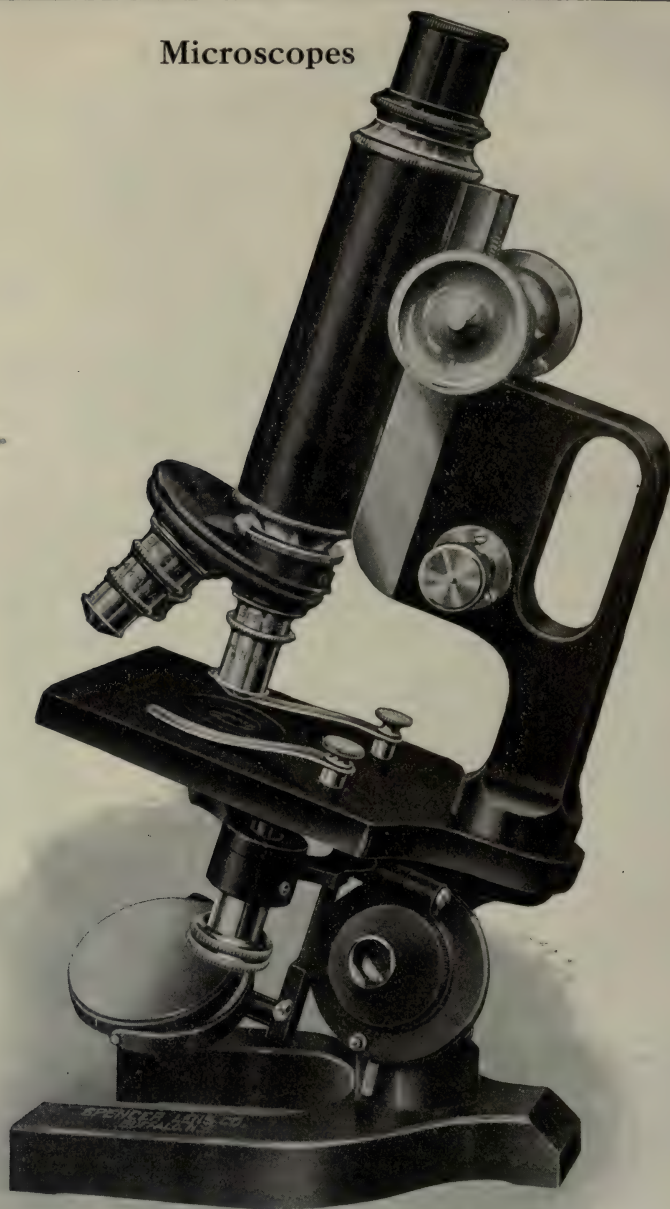

The pillar and base are large and substantial.

Nose Pieces—Mechanical Stages

A-850

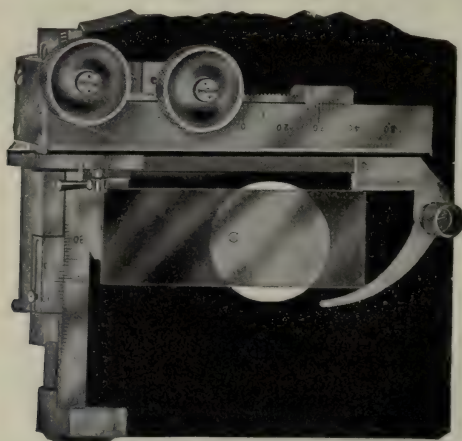

A-855

Revolving Nose Pieces

We take the greatest care that they be perfectly centered and we make the revolving portion so strong that the objectives cannot be sprung out of center. This part is thick and heavy; being thickest around the axis. This not only secures strength but a smoother and more lasting movement. The cover is a continuous circle so that no dust can settle into the lenses no matter what their position may be; they are finished in a heavy black plating.

A-850 Double Nose Piece.....	\$4 50
A-855 Triple Nose Piece.....	6 00

A-860 MECHANICAL STAGE. NO. 490

This stage may be instantly and firmly attached by means of its clamps to any rectangular microscope stage, and may as quickly be removed. The movements are by diagonal rack and pinion, are entirely firm and reliable, permitting the most delicate adjustments. The slide rests upon the surface of the microscopic stage and is held in place at one end by a spring clip, and at the other by an adjustable stop, permitting the use of slides of varying sizes.

On account of this adjustability this is the only mechanical stage which can be used to greatest advantage on our new models of microscopes, with the great distance from the optical axis to the base of the arm. When so used it has a forward and backward excursion movement of 38 mm. and a lateral excursion of 60 mm. greater than that of any stage.

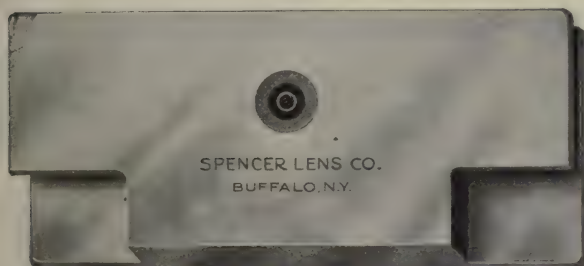

Stage No. 490 (see cut) is provided with an extension by which advantage may be taken of the whole of the exceptionally deep stages of No.'s 20—36, and 40. Stage No. 485 is similar to our No. 490 except for this extension.

Diagnostic

- A-2100 Thoma Zeiss's Haemacytometer.
 Haemacytometer, complete in case, with one Thoma pipette for counting red corpuscles only, and Thoma counting chamber, net.....\$11 00
 Haemacytometer, complete in case, with both Thoma pipettes for counting red and white corpuscles, and Thoma counting chamber, net..... 15 25
- A standard instrument for counting the number and ascertaining the percentage of red or white corpuscles in human blood. A measured quantity of blood in a capillary pipette is diluted with a normal solution in known proportions; a drop of this mixture is deposited upon a small sunken counting chamber and a cover placed thereon. This glass counting chamber is ruled in minute squares and the number of corpuscles in a number of squares is counted with a medium power microscope objective.
- A-2105 Counting Chamber, Thoma rulings, with two cover glasses, in case, net.. 6 30
 A-2110 Counting chamber, Zappert's rulings, with two cover glasses, in case, net 6 30
 A-2115 Counting Chamber, Tuerk's rulings, with two cover glasses, in case, net.. 8 30
 *A-2120 Extra Pipettes, for red corpuscles, 1-100, net..... 3 80
 *A-2125 Extra Pipettes, for white corpuscles, 1-10, net..... 3 80
 A-2130 Haemometer, Von Fleischl's, a standard instrument for obtaining the percentage of haemoglobin in the blood by dilution of a fixed quantity with a measured amount of distilled water, comparing the resulting color with successive parts of a glass wedge of fixed colors varying in depth. Price, complete, in case, net 24 00
- *A-2135 Extra Capillary Tubes, each, net..... 30
- A-2140 Haemaglobinometer, Gower's, deals with a measured amount of blood diluted with distilled water in a graduated tube until it is of the same color as a tinted tube provided, when the percentage is read off on the scale. Accurate to within about 5 or 10 per cent. Latest modification after Sahli, for using either day or night, net..... 2 50
- A-2145 Haemaglobinometer, Dare's, deals with the undiluted blood which is drawn by capillarity into a very thin chamber of definite thickness and which is compared with a colored prism by modified light from a candlenet 25 00
- A-2150 Haemaglobinometer, Talquist's, is a simple bedside test adapted to the use of every physician on account of the ease and accuracy with which the test may be made, and its inexpensiveness. It consists of 50 pages of strips of absorbent paper with scale attached showing tints of haemoglobin from 10 per cent and 100 per cent, bound in book form, net 1 50

A discount of 10% will be allowed for Cash with Order or C. O. D. shipments except on items marked net.

Electric Centrifuges

The Victor Electric Centrifuge

A-2181-2182

No one now questions the value of the Centrifuge for the analysis of blood, urine, milk, water, etc. The advantages of electrically operated Centrifuges over those operated by hand or water power are so obvious as hardly to require mention, briefly stated, the electric Centrifuge—is far more accurate because of the ability to obtain and maintain any speed desired—does away with the severe and taxing manual labor of hand operation,—saves time, is quiet in operation and in every way more convenient.

POWER. The motor has ample power to insure steadiness and uniformity of speed under varying load conditions.

SPEED. The maximum speed of the Direct Current Outfit is 2200 R. P. M. Alternating Current Outfit 1600 R. P. M., at these speeds the machines will carry arms and tubes of sufficient length to develop ample centrifugal force for blood precipitation, sputum examination, etc.

SPEED REGULATION. It is of prime importance that the speed of the centrifuge be under good control, there are sure to be occasional variations of current and other factors that would prevent the maintaining of a uniform speed under all conditions, unless some speed regulator were provided, then extremely fragile sediment must be handled with medium speed, while very light sediments require the highest speed to produce sedimentation.

All Victor Centrifuges, whether for direct or alternating current, are provided with speed regulator having a number of steps.

Provision is made so that the speed may be determined by means of any ordinary speed gauge.

RIGIDITY. It is essential that the utmost steadiness be maintained in operation, furthermore, it is necessary, after precipitation has taken place, and the tubes come to rest that they do so gradually, and when they finally come to a perpendicular position that they meet with no obstruction, for should they be subjected to even a slight jar it would frequently result in the recombining of the fluids in the tube and of course the result of the test would be nil. In the Victor Centrifuge the necessary rigidity and steadiness is obtained, first, by the use of a broad, heavy base, second, an unusually heavy armature is used, this being carefully and accurately balanced. Other means are also provided to prevent the striking of the tubes when the machine is stopped.

IRON CLAD. A glance at the illustration will show that the machine is completely encased in an iron outer jacket. This thoroughly protects all of the working parts from accidental injury and from the spilling of fluids, etc. It also makes it possible to thoroughly cleanse the entire exterior.

DURABILITY. The bearings and the commutator are the only parts on an electric centrifuge that are subjected to frictional wear. In the Victor Outfit the bearings and commutator are at least twice as large as the ones ordinarily used in machines of this size so that the machine being iron clad and having wearing parts double the size actually required, is practically indestructible, and the cost of maintenance is so small as to be negligible.

FINISH. The iron exterior of the outfit is first ground and polished, then treated with four baked coats of black japan, resulting in a highly polished black surface, impervious to acids and alkalis.

A-2181 Victor No. 1 Centrifuge, with speed controlling rheostat, two sedimentation tubes (one graduated) with protectors. 110 to 220 volt direct current....\$30 00

A-2182 Victor No. 1 Centrifuge, with speed controlling rheostat, two sedimentation tubes (one graduated) with protectors. For 60 cycle alternating current. 30 00

If 4-arm attachment is wanted in place of 2-arm, add \$3.00.

Prices for Currents of other Cycles and Voltages given on request.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

A discount of 5% will be allowed for Cash with Order or C. O. D. shipments except on those items marked net.

Electric Centrifuges

A-2192

A-2192 DOME PROTECTOR FOR VICTOR CENTRIFUGE.

The Dome Protector is designed to protect the operator and others from flying particles or liquids and to avoid the possibility of any person or object coming in contact with the rapidly moving arms. By lessening the air resistance it increases the speed of the Centrifuge under the same load conditions, thus adding to its capacity.

Made of heavy spun copper.

No trouble to put it in place.

Price \$7 50

Hand and Water Power Centrifuges

The centrifuge is now in general use for the clinical examination of blood, urine, milk, and sputum, and for the collection of the organisms or solids in water, chemical precipitation, etc.

Applied to urinary analysis it permits the estimation of the per cent of albumen, chlorides, phosphates, and sulphates in three minutes time at the bedside if desired, and the collection of cellular elements for microscopical examination.

Daland's Haematokrit gives the number of red corpuscles in the blood, also in three minutes, and without the necessity of diluting it.

Our hand centrifuges are extremely compact and yet strong and durable. The use of specially cut gears, together with accurate workmanship throughout, enable us to produce a very easy, quiet running, and lasting machine which we sell at a very moderate price. The gears are all enclosed in the dust proof case.

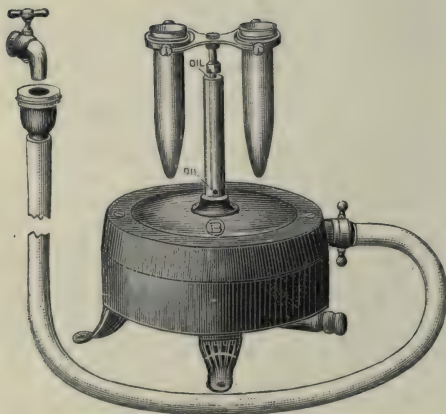

A-2230

Hand Centrifuge

- A-2230 Centrifuge, complete with one graduated and one ungraduated sedimentation tube. Each..... \$8 00
- A-2235 Centrifuge, double speed, complete with Daland's haematokrit for collecting blood corpuscles, automatic pipette for filling haematokrit tubes, one graduated and one ungraduated sedimentation tube, and two sputum tubes for collecting bacteria from sputum. Each.. 12 00

Water Power Centrifuge

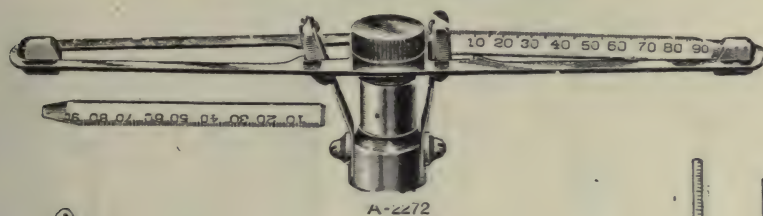

A-2240

- A-2240 Centrifuge, Water Power. Where the electric current cannot be had and a centrifuge for blood work is not required, the Water Power Centrifuge offers all the advantages of the electric at a much less cost. It utilizes a cheap and common source of power. Our instrument is compact, strong, durable and handsomely finished. It is made entirely of metal. The bearings and working parts are carefully fitted to insure high speed, smooth and easy running with lasting qualities. Varying speeds are obtained by reducing the water supply. Complete with two-arm sedimentation attachment, ungraduated tube for collection of sediment for microscopical examination and graduated tube for percentage determinations. Each\$10 50

A-2252	Blood Lancet, Boldt's.....	\$2 00
*A-2245	Blood Lancet, Moore's.....	2 00
A-2250	Blood Lancet, plain, reversible.....	50
*A-2252	Centrifuge Carrying Case. This case is arranged to take the centrifuge, with all accessories, including a box of object slides. It is covered with fine leather, has nicked hinges and lock, and is lined with velvet.....	4 00
*A-2255	Centrifuge Clasp. For attaching the centrifuge to the table.....	50
*A-2260	Centrifuge Four-Tube Attachment. This attachment is used in board of health and other laboratories for milk analysis, etc., as four tests can be made at one time.....	5 00
*A-2270	Centrifuge guard for Haematokrit. This attachment consists of a metal shield which fits over the haematokrit, so that the revolving parts are entirely enclosed.....	2 00
A-2272	Centrifuge, Haematokrit, Daland's.....	3 50
A-2275	Centrifuge Milk Tubes. These tubes are used for milk analysis in place of the regular sedimentation tubes and are graduated to give percentage readings of fats in milk according to the Leffman-Beam or Babcock methods. Very useful for human as well as cow's milk analysis.....	50
A-2280	Centrifuge Percentage Tubes. For the haematokrit. With accurate lumen, lens-edge to magnify column of blood and the graduations, and graduated in millimeters from 0 to 100.....	50
A-2285	Centrifuge Pipette. For filling milk tubes. Graduated to 1 cc.....	20
A-2290	Centrifuge Pipette. For filling haematokrit tubes.....	35
A-2295	Centrifuge Sedimentation Tubes. Graduated in 1-10 cc. to 10 cc., with conical end to aid in reading small deposits.....	35
A-2300	Centrifuge Sedimentation Tubes. Ungraduated. For collecting sediments for microscopical examination.....	15
*A-2305	Centrifuge shield tubes. Of aluminum. These shields protect the glass sedimentation tubes. They are regularly furnished with the centrifuge, but are listed extra for renewal in case of damage.....	40
*A-2310	Centrifuge Sputum Tubes. For use in haematokrit frame. Same shape as percentage tubes. Ungraduated.....	25
A-2312	Stopper, Bunnell's, for blood pipette. Used for closing the pipette after taking blood at bedside. Where the pipette must be carried from the bedside to the laboratory for counting, this little stopper will be found practical and useful.....	35

The Haslam-Luer all glass syringes are made absolutely clean and sterilizable. There are no washers, the needles slide on making a clean tight joint. They are made in France by the most expert glass grinders, and each piston is ground absolutely correct to its barrel. Price includes two suitable needles with each syringe. They can be used for hypodermatic, antitoxine, mercurial or alcohol injections.

NOTE.—All of the Haslam-Luer syringes are furnished with an adapter so that all needles having a universal thread can be used with them.

Hypodermic Outfits

ASEPTIC
THE SUB-Q All-Glass Syringes
TRADE MARK

All-Glass with McElroy's mineral packing. Made of special glass, properly annealed to withstand sterilization.

Packing is smooth, firm and elastic; does not shred or fill up the needle like ordinary asbestos. Graduations are exact. Made with Screw or "Slip-on" Needles.

Syringes having a similar appearance are sometimes offered in place of the Sub-Q but seldom to the satisfaction of the user.

Sub-Q Syringes put up in card-board boxes with two needles:

A-2968	Sub-Q Syringe, No. 1000, 25 minim.....	\$1 00
A-2968A	Sub-Q Syringe, No. 1001, 30 minim.....	1 00

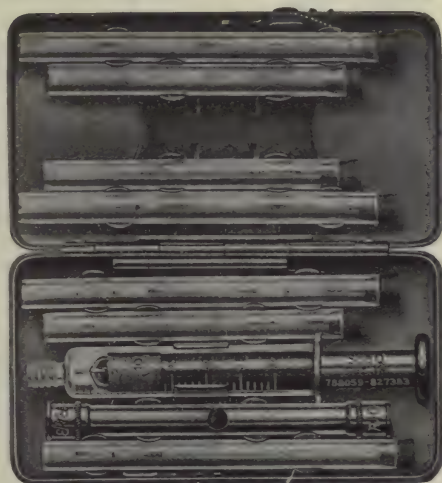

SAFETY
 ASEPTIC
THE SUB-Q All-Glass Syringes
TRADE MARK

A higher development of the SUB-Q embodying patented "Safety" feature, reducing to a minimum all danger of breakage.

The Black Glass Piston (patented) emphasizes the graduations, by contrast, and makes possible precise dosage.

Put up in a variety of cases and in all sizes.

	Each
A-2969 Safety Sub-Q Syringe, No. 2001, 30 minim, leatherette case	\$1 25
A-2969A Safety Sub-Q Syringe, No. 2271, 30 minim, nickel case, oval	1 50
A-2969B Safety Sub-Q Syringe, No. 2221, 30 minim, aluminum case, hinged, (7-vial frame) see cut.....	2 50
A-2969C Safety Sub-Q Syringe, No. 2231, 30 minim, nickel-plated case, hinged, (7-vial frame) see cut.....	2 50
A-2969D Safety Sub-Q Syringe, No. 2002, 60 minim, leatherette case	1 50
A-2969E Safety Sub-Q Syringe, No. 2132, 60 minim, leather case	2 75

A-2969C

Sub-Q's graduated in Cc at same price.

	Each
A-2971 Sub-Q Syringe, No. 2003, 6 cc., leatherette case	\$1 75
A-2971A Sub-Q Syringe, No. 2233, 6 cc., aseptic nickel case	2 50
A-2971B Sub-Q Syringe, No. 2005, 12 cc., leatherette case	2 00
A-2971C Sub-Q Syringe, No. 2235, 12 cc., aseptic nickel case	3 00
A-2971D Sub-Q Syringe, No. 2006, 30 cc., leatherette case	2 50
A-2971E Sub-Q Syringe, No. 2009, 35 cc., leatherette case	3 50
A-2971F Sub-Q Syringe, No. 2012, 50 cc., leatherette case	5 00
A-2971G Sub-Q Syringe, No. 2015, 100 cc., leatherette case	7 50

Sub-Q Needles, made in all sizes from 27 (fine) to 13 (coarse) Gauge.

ARMORED SAFETY SUB-Q SYRINGE.

A metal frame protects the cylinder, reducing the chances of breakage. Where a syringe is exposed to severe usage, this Sub-Q will be found most serviceable.

A-2972 Sub-Q Syringe, No. 3001 A, 30 minim, with finger bars, in leatherette case, and 2 needles	\$1 75
--	--------

TUBERCULIN SUB-Q SYRINGE.

Made from heavy annealed glass; piston is wrapped with McElroy's mineral packing. Accuracy being of prime importance, the exact capacity of each instrument is verified; graduations on the scale show divisions of one hundredth of a Cc. It is especially adapted for all work where accuracy is important and where a syringe having a capacity of .1 cc or less is desired.

	Each
A-2973 Sub-Q Syringe, Tuberculin, No. 2020, ½ cc, leatherette case with 2 needles	\$1 50
A-2973A Sub-Q Syringe, Tuberculin, No. 2021, 1 cc, leatherette case with 2 needles	1 50
A-2973B Sub-Q Syringe, Tuberculin, No. 2521, 1 cc, morocco case with 2 needles..	2 50

The "Refo" Precision Syringes

An Improved Model of the "Record" Syringe

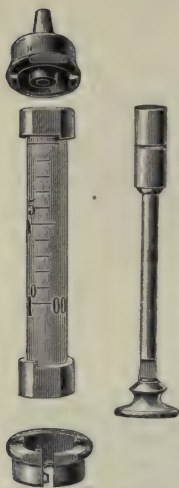

Fig. A.

The "Refo" Syringe, Fig. A, differs from the "Record" in that the "Refo" Syringe has two removable caps instead of one, and the barrel two metal mounts instead of one, the caps, mounts and barrels being so accurately ground to measurement, and so scientifically correct, that each style of syringe is absolutely standard, and all parts are interchangeable. The advantage of this construction is an economy of both time and money. The quantity measurement of the syringe barrel being the only information your dealer requires to replace any part of the syringe accidentally lost or broken. The barrels are furnished complete with metal mounts.

The syringe is made of metal and glass only. The metal mounts are soldered to the barrel with a metal alloy, thus forming an inseparable whole. It is made in four parts. The barrel, the piston or plunger, and two metal caps accurately ground and fitted to the metal mounts of the barrel, and held in place by the "Refo" improved lock.

All mounts and caps are made perfectly smooth with no screws of any character and are easily cleaned. The lumen of the barrel is ground to form a perfect cylinder, and is accurately graduated. The piston or plunger is made of nickel, ground to fit the barrel so accurately, that a smooth working, hermetically fitting combination is the result. No lubricant is required for the perfect working of the syringe. The needles furnished with these syringes are of the very best quality and construction.

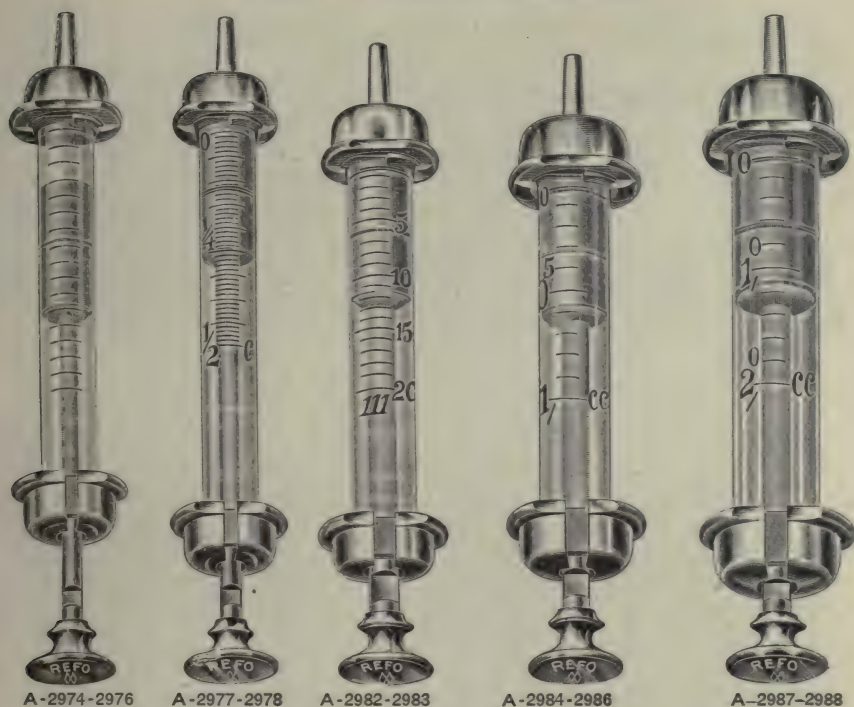

Fig. B.

The metal case, Fig. B, is the style of case furnished with all our "Refo" Syringes. It is provided with a movable tray provided with spring clips for the reception of the barrel, the plunger and two needles as shown. The barrel and plunger are placed in the case separately to minimize the danger of barrel breakage, and to act as a constant reminder that asepsis is the absolute essential for perfect results from the use of the syringe.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Gebauer's Inhaler

for Ethyl Chloride by the Drop Method.

It is the only Inhaler by which the Ethyl Chloride is administered by the Drop Method, which is the safest and most economical method of giving Ethyl Chloride. It is simple in construction, having no complicated parts to become out of order. The facepiece is transparent and is easily kept aseptic. It is the only inhaler by which ether can be administered as a sequence to Ethyl Chloride and not remove or change the position of the facepiece.

B-95 Gebauer's Inhaler, for Ethyl Chloride by the drop method. \$5 00

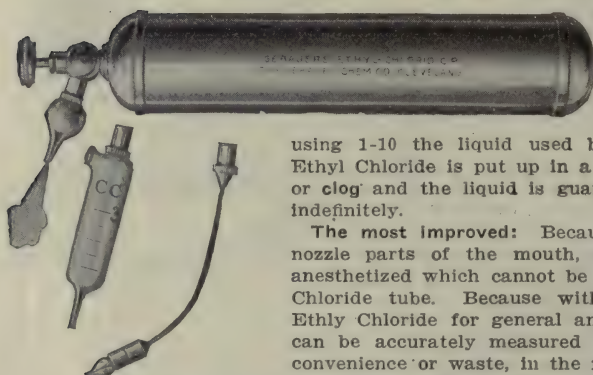

B-96 Gebauer's Ethyl Chloride, 100 cc. tube, enough for from, 15 to 20 short operations 1 60

B-95

LOCAL AND GENERAL ANESTHESIA ETHYL CHLORIDE (GEBAUER'S)

The most improved and economical tube for the administration of Ethyl Chloride on the market.

B-97-101

The most economical: Because it sprays the liquid in the form of a vaporized stream, thereby hastening evaporation and consequent anesthesia,

using 1-10 the liquid used by other tubes. Because the Ethyl Chloride is put up in a metal tube that will not leak or clog and the liquid is guaranteed to maintain its purity indefinitely.

The most improved: Because with the flexible spraying nozzle parts of the mouth, ear, nose and throat can be anesthetized which cannot be reached with any other Ethyl Chloride tube. Because with the graduated dropper the Ethyl Chloride for general anesthesia by the drop method, can be accurately measured and administered without inconvenience or waste, in the form of drops or a jet stream as desired. Sent anywhere upon receipt of price; safe delivery guaranteed.

B-97 Gebauer's Ethyl Chloride, 40 grm. tube with ordinary spraying nozzle..... \$1 00

B-98 Gebauer's Ethyl Chloride, 100 cc. tube with ordinary spraying nozzle..... 1 60

B-99 Gebauer's Flexible Spraying Nozzle alone 50

B-101 Gebauer's Graduated Dropper 50

The flexible nozzle and the graduated dropper will fit either size tube and can be used indefinitely.

and Net

B-115

Following the lines of the latest anaesthetic practice, a great many of our best anaesthetizers have adopted "The New Clark-Hurd Gas Apparatus" as the simplest and most practical type of apparatus for the administration of nitrous-oxide gas in preliminary anaesthesia, for use in gas ether sequence, (the combination of nitrous-oxide gas and ether) for oxygen and ether or for oxygen only.

The apparatus is in use by many of our largest hospitals and has been used with only the most satisfactory results. It should be a necessary part in the armamentarium of every hospital.

It is the most simple and practical gas apparatus made.

B-115 The New Clark-Hurd Gas Apparatus, complete less gas cylinders....net \$30 00

Note.—Send for circular describing the very latest and the most simple apparatus for administering nitrous-oxide with oxygen.

General Operating

A Word to the Surgeon

We call the attention of the operating surgeon to the knives, forceps, and scissors illustrated in the following pages. Knowing the necessity of a good cutting instrument, we have paid more than the usual attention to this part of our line.

KNIVES.

Our knives include only the best American and English makes. They are made of the finest grained English tool steel (Jessop's) and are hand forged throughout. Each knife is tempered with the utmost care, and is ground, polished and honed by the most expert workmen.

We guarantee each knife to be perfect in every respect. Should any defect in our knives be shown after use we stand ready to replace without charge.

We would also suggest to our patrons that surgical knives should be sent to your regular instrument dealer when in need of regrinding, as local mechanics generally are not familiar with the methods of grinding and polishing necessary to obtain the best results.

Notes.

Surgeons having an extensive hospital practice will find our haemostatic forceps made with box joints to be just the thing for heavy operative work. This joint is much stronger than either the separable or screw joint, will always hold the blades in perfect alignment, and does away with the danger of the point twisting in use.

The forceps listed above are known under so many different names, that we have listed them by all of their various titles, giving the illustration to the proper name of the forcep.

Mayo's Scissors

This type of scissor was first made up at the suggestion of Dr. W. J. Mayo, and we believe it represents the ideal scissor. The shanks and blades are both much heavier than usual, and the blades shorter. This gives greater leverage and power, and insures a better cutting edge. They are made of the best English steel, forged, tempered, ground, polished, and honed by the best workmen. They are made in straight and flat curved patterns, with screw joints only. We can heartily recommend this pattern of scissor to surgeons desiring a first-class cutting instrument.

Mayo's Dissecting Scissors

This scissor was designed by Dr. C. H. Mayo, and will be found especially useful in fine dissecting work. The blades are heavy, with rounded back, are not as wide as the regular scissor, the nose or point is blunt and rounded, and is made in screw joint only. The illustration, B-525, shows the general shape and construction. It will be found especially useful in dissections of the neck, axillæ and breast.

Jackson's Scissors

are made on the same constructive lines as the Mayo's, difference being in the point of the instrument. In this scissor the blunt points are rounded in such a fashion as to permit of their use in dissecting work; shanks and blades are of heavy construction; they are made with screw joints only and of the best English steel. They were designed by Dr. J. N. Jackson of Kansas City.

B-724	Webster's, self retaining, abdominal	10 00

THE SPARK'S SELF RETAINING RETRACTORS.

B-721	Spark's, self retaining, abdominal	net \$4 50
B-722	Spark's, self retaining, abdominal, with extra blade	net 5 00
B-723	Spark's, self retaining, appendectomy	net 4 00

These retractors have been designed and perfected under the name of Spark's. They are guaranteed to be of the very best material and construction.

Each instrument is self retaining, is very simple, and consists of only two pieces of sheet steel, heavily nickel plated over copper. The two parts can be instantly dismounted and folded into small space. The abdominal retractor has an opening of six inches and the appendectomy retractor has an opening of three and a half inches.

There are no set screws, no irregular surfaces, nothing to get lost or out of order.

There is no danger of damaging rubber gloves in manipulating these instruments.

When retraction is made the instrument will not slip.

They are light in weight.

There is no lost motion.

They are readily sterilized and cleaned.

They are reasonable in price.

They are the only retractors made that conform to the shape of the body, and this steadies the instrument. The appendectomy retractor may be used as an abdominal retractor for children, or under the regular abdominal retractor when four blades are desired.

Bone Instruments

Victor Bone Surgery Engine

Knowing that lack of power has been a great draw-back in some of the engines previously devised for work in bone surgery, we decided to use for the purpose a motor having not only all power required, but a considerable surplus besides. The motor is capable of developing one-fifth h. p. and will stand a considerable over load if necessary. It is especially constructed for this purpose, being wound for proper speed, quiet in operation and in every way well adapted to the work.

The hand piece or tool holder, is of very simple construction, strong, durable and can easily be sterilized, this latter feature being a very important one. The power is transmitted from the motor to the hand piece by means of a strong yet very flexible cable contained in a neatly braided sheath covering.

In the cutting instruments, themselves, we have followed, in the main, designs that have been gradually worked out in actual service and have been found the most practical. No. 1 is a twist drill, designed for drilling holes in bones and is used principally when it is desired to wire the ends of a broken bone together. No. 2 is a trephine, a very useful instrument, the chief function of which is making the initial opening for an operation on the skull.

No. 3 is an osteotome, designed to cut on the end and sides. This instrument is intended to be used after the initial opening has been made, to elongate the opening; in fact it operates in practically the same manner as a saw, excepting that it is a perfectly safe instrument to use, there being no danger of injury to the soft tissues underlying the brain case, and at the same time it can be easily guided in the desired direction. It cuts rapidly, freely, and the deep spirals between the cutting edges cause it to clear itself as it cuts.

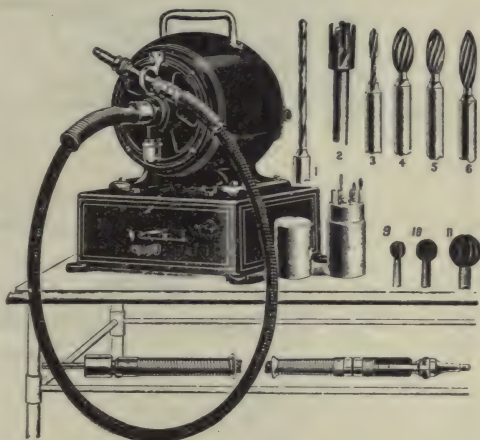

No. 4 and 5 are elongated burrs. They will penetrate bone very readily, and their principal use is for cutting laterally and to cut away as much of the bone as may be desired. They are not to be used, however, for drilling through the skull, as owing to their shape, they would be likely to cause injury to underlying tissue.

No. 6 is a spiral osteotome with a drill point. It will cut either on the end or sides. The other uses for these cutters will readily suggest themselves to the experienced surgeon.

No. 8 shows a guard in position when No. 2 trephine is being used; this guard can be set so that the trephine will cut to any desired depth, a positive stop then preventing its cutting any deeper.

Nos. 9, 10 and 11 are spherical burs, very useful in trimming, beveling, cleaning cavities, etc.

A complete set of directions accompany each outfit—these directions minutely describing the method of operation and the care of every portion of the engine.

Price of engine complete as shown complete with all cutters arranged for 110

NEEDLE HOLDERS.

B-1557 Brown's \$3 75

One of the most simple and durable needle holders made. It has no ratchet to get out of order; will not tear rubber gloves, catch thread or ligature; will hold any size of needle firmly; will not break needles; is perfectly noiseless; can be used with either hand; can be used as a needle holder or a needle forcep, which is a great advantage and saving of time as three-fourths of the stitches can be taken better and much faster without using the catch.

RICHTER NEEDLE HOLDERS.

The Richter Needle Holders have attained, since their introduction several years ago, a popularity accorded to no other instrument of similar character. They have given the most satisfactory results wherever used.

The construction of the jaw of this instrument is shown in Fig. A, and the method of grasping and holding the needle in Fig. B. In a later construction, a grasping point has been added to the regular Richter jaw (see B-1630), in order to facilitate the grasping of the smallest needle point when exposed through the tissue. The jaws will hold any style of needle perfectly, whether round, flat or square. Every holder is forged by hand and carefully tempered.

An improved catch has also been added to the instrument as originally made (see B-1365.) This catch, or rather release catch, permits the releasing of the needle at any point on the catch, in this manner eliminating the danger of breaking the needle by undue pressure when releasing.

SANDERS' PATENT NEEDLES.

The Sanders' Self-Locking Eye (See page 146, Figs. A, B, and C) prevents the thread from slipping out of the needle while sewing, tying and in other manipulations, thereby saving valuable time which would be consumed threading the needle during operation.

It also allows the needle to be used nearer the end of the catgut or other suture material, therefore it saves material.

The security of the needle to the thread eliminates the danger of losing the needle in the abdominal cavity or dropping it during interruptions in the sewing or while tying knots, etc.

DIRECTIONS FOR THREADING.

(1) Pass the thread through the end eye going from the inside of the curve to the outside (Fig. A). (2) Pass it back through the other eye in the opposite direction, which forms a loop (Fig. B). (3) Pass the short end of the thread along the helical groove in the side of the needle and go through the loop (Fig. C). (4) Make traction on the long end of the thread and the lock is firmly established without forming a knot or other obstruction to hinder the threaded needle from passing easily through the tissues.

BENJAMIN NEEDLES.

Benjamin's needles are furnished with a special eye, which clasps the ligature and prevents it from slipping. The needle is threaded in the ordinary manner, and then by pulling the thread into the narrow part of the eye it is held firmly.

B-2057 SURGICAL NEEDLE THREADER.

With the aid of this instrument in threading needles much loss of time and consequent annoyance may be avoided. The threaders are made in different sizes, and by their use even the smallest needles may be quickly and easily threaded.

DIRECTIONS FOR THREADING.

Pass the hook of the threader through the eye of the needle. Grasp the suture with hook end and gently pull back. The threaded needle is then ready for use.

B-2057 Surgical Needle Threader, 4 sizes; per package of 1 dozen, assorted..... \$1 00

General Operating—Needles

Needles have become such an important item in the surgeon's armamentarium, that we have decided to give them more attention than they have had in the past, and to illustrate them in such a manner as to give their exact size, shape and weight. Our list will be found more complete than any heretofore published, and will be particularly useful to those surgeons desirous of making careful selections. Our needles are all made of the best tempered steel, with eyes as large as the body or shank of the needle will carry, facilitating greatly their quick threading.

General Operating

This CATGUT is sterilized in oil at a temperature of 320° F. It is impregnated with IODINE, which renders it antiseptic and at the same time easily seen on the field of operation. It is highly elastic and almost as supple as silk, hence easily handled. Sufficient oil remains in the strand to prevent untwisting during its use—for the same reason absorption is delayed.

Lukens Catgut Preparations Are Fully
Guaranteed Against Deterioration.

General Operating

Thomas Sterile Catgut

Prepared in a well equipped laboratory conducted with the same attention to asepsis as is observed in the best operating rooms.

Raw material; only the finest imported violin quality gut is used, selected with special reference to its surgical utility.

Tensile strength; each lot is carefully tested in a strength testing machine both before and after preparation.

Sterilization; is accomplished by the most approved modern methods which will not injure the gut.

Bacteriological tests; After sealing, a certain percentage of our tubes of sutures and ligatures are tested by a leading Bacteriologist of Harvard Medical School, under an incubation test of fourteen days in various sterile media. Not being fully satisfied with this test, we go even farther, and subject a certain percentage of tubes to an additional test by placing the sutures in the peritoneum of a live guinea pig.

Certification; each batch is put up under a certified number and records are open for inspection at any time.

POCKET CASES.

While we strongly recommend the best knives with concave handles as shown on opposite page, still for the sake of offering prices to compare favorably with the cheap imported case in the market, we can put up all the cases with plainer knives having smooth handle.

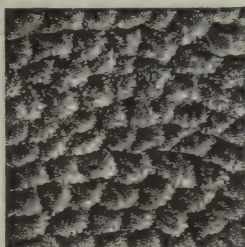

These knives are full $5\frac{1}{2}$ inches long, of as good material and finish as those with concave handles, and are guaranteed in every respect.

The cuts show actual size of the blades; in ordering cases any style of blade may be specified.

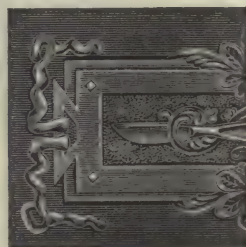

LEATHERS.

Plain Morocco

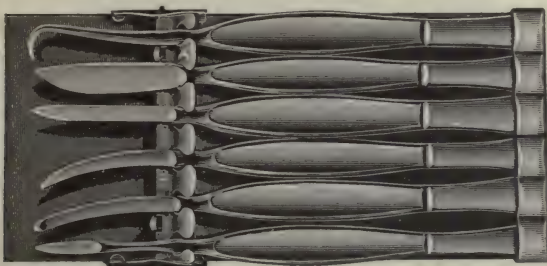

Monkey Grain

Embossed

We illustrate above the different grains and styles of leather used in the manufacture of our pocket cases, enabling the prospective purchaser to make a better selection.

METAL KNIFE RACK FOR POCKET CASES.

B-3020

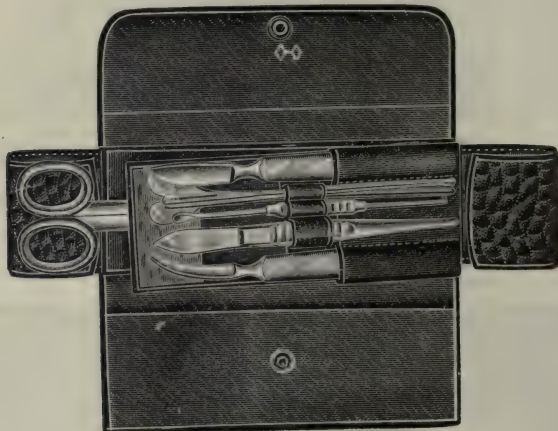

This knife rack is made of brass, nickel plated, is made for four or six knives, has a movable rack engaging the shanks of the knife blades, permitting the knife to be raised for withdrawal from its proper sheath, also for holding the edges of the knives from the bottom of the tray should the entire rack be placed in the sterilizer for boiling. It can be supplied with any of our leather pocket cases holding four or six knives. The price of this rack should be added to that of the pocket case ordered, if wanted. Metal racks are only sold with complete pocket cases at prices quoted.

Patent Pending.

B-3157. THE WHITMARSH-DOUGLASS POCKET CASE.

Adopted by the U. S. Army.

The new idea in Pocket Instrument Cases The case is made up in the form of a regular card case, with three pockets; one for the reception of the metal tray holding the knives, one for the metal tray holding sundry instruments and the third for needles, silk, etc. The outer case is made of black monkey grain leather lined with black watered silk. The metal trays are made of brass, nickel plated, and have hinged leaves which close down closely over the instruments to guard and hold them in place. The case when closed is flat and fits into the pocket without bulging. The outlines of the various instruments are etched on the bottom of the trays. There is no loss of time in returning the instruments to their proper places.

Contents: 1 scapel, 1 curved sharp bistoury, 1 curved blunt bistoury, 1 straight sharp bistoury, 1 tenatome, 1 Pean's haemostatic forceps, 1 straight scissor, 1 spring dressing forceps, 1 groove director and tongue tie, 1 Gross' ear instrument, 1 male and female combined catheter with caustic holder, 1 pair silver probes, 1 dozen assorted needles, 1 card twisted silk.

**B-3215. COMPACT OPERATING SET No. 12.**

Contents: Large amputating saw, removable handle; Liston's $8\frac{1}{2}$ inch bone forceps, with spring; 3 Pean's haemostatic forceps, curved scissors, Keen's needle holder, 5 inch; Esmarch's tourniquet with hook and chain, amputating knife, 7 metal handle operating knives, assorted blades to suit; flat end director, pair of probes, needles and silk.

This case is extremely compact and well arranged. Every instrument is perfectly aseptic, and mounted in two metal removable racks.

The case is handsome and durable with metal corners and has a comfortable handle.

The racks are either nickel plated or aluminum as desired, the latter being considerably lighter.

B-3215 Compact Operating Set, No. 12.....\$30 00

B-3220 Compact Operating Set, No. 14. Same as above with one Galt's trephine and one trephining elevator and raspatory added..... 32 50

B-3225. NEW COMPACT OPERATING SET No. 15.

Contents: Large amputating saw, removable handle; Liston's bone forceps, $8\frac{1}{2}$ inches, with spring; 3 Pean's haemostatic forceps, curved scissors, Richter's needle holder, Esmarch's tourniquet with hook and chain, amputating knife, 7 fine handle operating knives, assorted blades to suit; flat end director, 2 probes, needles and silk.

All the Knives are Superior Quality, Hand-Forged and Warranted.

This case is perfectly aseptic and very compact. All the instruments are on a single metal rack, making a broad case in which all the instruments are exposed when case is opened. The case measures $11 \times 8\frac{1}{2} \times 1\frac{3}{4}$ inches.

The case is handsome and durable, has a comfortable handle and has metal corners.

HASLAM'S ENGRAVED METAL RACKS FOR OPERATING CASES.

The illustration represents one of the racks in our No. 13 General Operating Case, with the outline and name of each instrument engraved on its base. These outlines are of great assistance in replacing the instruments after they have been removed from the rack, and will be found an invaluable improvement.

Our General Operating Cases on pages 178 and 179 are all made with Haslam's Engraved Racks.

Elastic Bandages

B-3500. BENDER'S IDEAL BANDAGE.

B-3500-3530

This new elastic bandage is made entirely of cotton. Its elasticity is due to the peculiar weave of the individual threads. It can be rolled evenly, and reversing is unnecessary.

The continual and even pressure given by the "Ideal" Bandage makes it desirable for use in all cases where a rubber or flannel bandage would be indicated. For the treatment of varicose veins and ulcers, as an abdominal bandage in pregnancy, and for bandaging limbs and joints, it is superior to any other bandage made. It is of signal value in building up the stump after amputation. Being porous, it allows perspiration to evaporate freely, thus insuring a natural condition of the skin.

The "Ideal" Bandage may be washed freely, as washing adds to its elasticity.

Dr. Adolf Lorenz, the Famous Vienna Surgeon, wrote

"I used them for my operations on my American tour, and am very pleased to say that I consider them far superior to the flannel, elastic or any other bandage I heretofore used."

Each bandage measures 6 yards in length when stretched.

	Width.	Per doz.		Width.	Per doz.
B-3500	2 inches	\$4 00	B-3520	5 inches	\$9 60
B-3505	2½ inches	5 00	B-3525	6½ inches	12 00
B-3510	3 inches	6 30	B-3530	8 inches	15 00
B-3515	4 inches	7 80			

VIM ELASTIC BANDAGE.

Vim Bandage Elastic has the longest stretch of any smooth, uncovered rubber bandage. A uniformly well-made elastic.

TRANSILLUMINATOR.

C-77	Transilluminator, E. S. I. Co.'s, ocular.....	net 4 00
------	---	----------

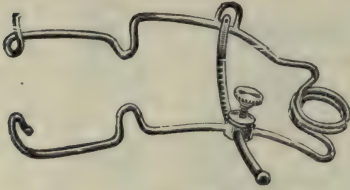

This instrument, originally suggested by Dr. R. D. Gibson, of Youngstown, Ohio, for the purpose of transillumination of the eye through the lids and sclera, is simple in construction and effective in operation, consisting in brief of a small hooded condenser lamp, the light from which passes through a short enclosed glass rod, about 5 mm. in diameter, to the tip of the instrument which, being placed against the lid or sclera gives, in the normal eye, brilliant illumination in the pupil and a well marked light-ring around the iris.

The instrument has the general size and shape of a fountain pen, has a 4-volt lamp and may be lighted on battery, socket current controller, wall plate or transformer. To obtain the most satisfactory results it should be used in a well darkened room.

Eye Instruments

- C-738 Illuminated Eye Spud, E. S. I. Co.'s, with 2 spuds.....net \$4 00
 This self-illuminating spud greatly facilitates the removal of foreign bodies from the cornea. The source of condensed illumination and the spud being incorporated in one instrument, both controlled with one hand, leaves the other free for holding open the lids, so that neither speculum nor assistant are required. The lamp may be lighted on battery, socket current controller, wall plate or transformer.
- C-740 Double Eye Instrument, for pocket, any combination of A, B, C, D or E points..... 1 25
- C-741 Corelipsis Hook, Fox's, double, shanks and ends gold plated..... 2 00
- C-742 Cystotome, Fox's, double, shanks and ends gold plated..... 2 50

- C-744 Lid Retracting Hook, Smith-Green's..... 1 25
- C-746 Pressure Hook, Smith-Green's..... 1 25

The last three instruments are used in the operation of extracting the lens within the capsule.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

A discount of 10% will be allowed for Cash with Order or C. O. D. shipments except on items marked net.

Eye Instruments

C-747. VICTOR GIANT EYE MAGNET.

Great strength, perfect poise, ease of manipulation and absolute control of the magnet field have been combined in the design and construction of this magnet.

The magnet alone weighs 50 pounds and has a lifting power of approximately 400 pounds to the square inch. The crane, although weighing with the magnet over a hundred pounds, is mounted on light running casters and can be moved without any great effort. The chief advantage of this construction is that the patient may be laid on a couch or operating table and the crane moved into such a position that the magnet is suspended directly over him, and then by means of raising and lowering mechanism, the magnet may be lowered to the exact position desired; the accidental lowering of the magnet is impossible. It is best to use a rheostat so that its immense pulling power can be kept under perfect control. We strongly advise the use of the foot controller in preference to the one used by hand, for the reason that the use of the former allows the operator perfect freedom in the use of both hands, as well as enabling him to concentrate his attention upon the work in hand.

Price of 110 V. D. C. Giant Magnet on Crane..\$85 00

C-747

C-748. VICTOR NO. 2 LITTLE GIANT EYE MAGNET.

The No. 2 Little Giant Eye Magnet has a little over one-fourth the strength of the large Victor Giant Magnet. It can be raised or lowered, swivelled and tilted.

It is provided with two interchangeable gold-plated tips and is equal in appearance and workmanship to the larger magnet.

Price for 110 or 220 Volt current for batteries.....\$25 00

Price for Hand Controller Rheostat..... 5 00

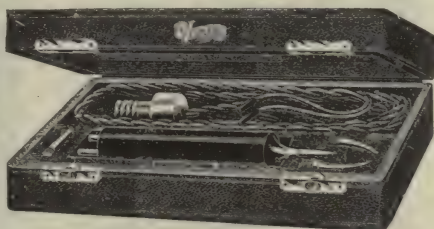

C-748

C-749. VICTOR NO. 3 EYE MAGNET.

This magnet is $5\frac{1}{4}$ inches long without tip, and $1\frac{1}{4}$ inches in diameter; we supply with it 4 gold plated tips and an attachment plug and cord. The Victor No. 3 is by far the strongest hand or portable magnet on the market; it is completely covered with polished hard rubber, the case is leather and plush lined.

Price for 110 Volt direct current, or
for batteries as shown in case.....\$12 00

Ear Instruments

C-1566. THE PNEUMATIC AURISCOPE.

Model of Electro Surg. Inst. Co.

The changing of a Siegel's Pneumatic Oscope into an electrically lighted and magnifying pneumatic otoscope, places in the hands of the aurist and general practitioner a most useful and practical instrument in the field of otology. It can be used in diagnostic work and for aural massage. It gives a brilliant magnified view of the drum, the mobility of the malleus may be determined, also the degree of relaxation in the membrane tympani; cicatricial pouches can be distinguished from perforations, and various adhesions accurately diagnosed.

The lamp is of the condenser pattern, which throws a concentrated beam of light directly forward, is placed at right angles to the line of sight and gives perfect definition. The lens is removable for operative and therapeutic work.

The lamp may be lighted with battery,

C-1566

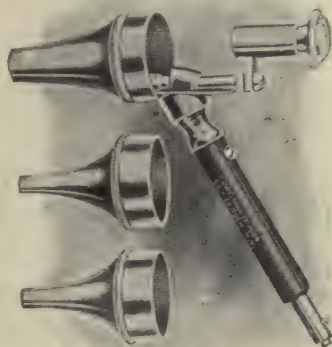

socket current controller, wall plate or transformer.

Price, complete with 2 specula and bulb, net..... \$8 00
Additional specula, each, net 75

C-1567. THE ELECTRO SURG. INST. CO.'S AURISCOPE, STYLE A.

The instrument is supplied with a magnifying lens so arranged that it can be turned out of the line of sight, thus giving the operator a direct view should it be preferred. This lens has an attachment by which it can be quickly focused.

No reflector is needed as the lamp itself has a condensing lens blown on the end of the bulb, which while not increasing its size, throws all the light directly forward. The use of this condensing lamp enables us to save the room ordinarily occupied by a reflector and to utilize it as operating space at the same time giving a much more brilliant light.

C-1567

The largest of the three specula furnished with this auriscope has an oval tip, thus fitting it for nasal as well as aural work. The handle is placed at an oblique angle to allow greater freedom of movement.

Price, complete, with three specula, net..... \$6 00
Price, additional specula, each, net 75

C-1568. THE ELECTRO SURG. INST. CO.'S EAR AND NASAL SPECULUM.

This speculum is intended for ear and nasal work, is made of wrought metal highly polished and nickel plated. It is light, strong and easily rendered aseptic.

The lamp is located well back of the left blade and does not interfere in any way with the free use of the applicators, probes, etc. The lamp has a condenser or bulls-eye blown on the end of the bulb, throwing the light well forward and illuminating the cavity perfectly.

Price, net \$4 00

C-2760	Myles', latest, straight, 5 sizes.....	7 00
C-2765	Myles', latest, cutting up, ethmoid	7 00
C-2770	Prince's, for bridge and middle turbinates	3 75
C-2775	Prince's, for polypus and inferior turbinates	4 00
C-2785	Van Struycken's, latest, straight	8 50
C-2786	Van Struycken's, latest, angled to side, right	9 00
C-2787	Van Struycken's, latest, angled to side, left	9 00
C-2788	Van Struycken's, latest, straight, lateral cut, right	9 00
*C-2789	Van Struycken's, latest, straight, lateral cut, left	9 00
*C-2790	Weir's	3 50

The attention of the specialist is called to the construction of our Van Struycken forceps. The construction offers two distinct advantages over other makes. The cut is narrower and sharper. The groove on each side of the blades, extending backward toward the handles, permits of continuous forward cutting.

HASLAM'S UNIVERSAL HANDLE.

C-2812	Haslam's Universal Handle, only	6 00
--------	---------------------------------------	------

The shanks of the nasal cutting forceps and scissors listed above are made interchangeable to fit the Haslam Universal Handle. The mechanical construction of the handle is very simple. It fits the hand perfectly, gives great power and is so designed as to place the hand of the operator well out of the line of vision. The blades can be rotated in the handle and held in four different positions. A simple slide mechanism attached to the handle permits the changing of the blades in a few seconds.

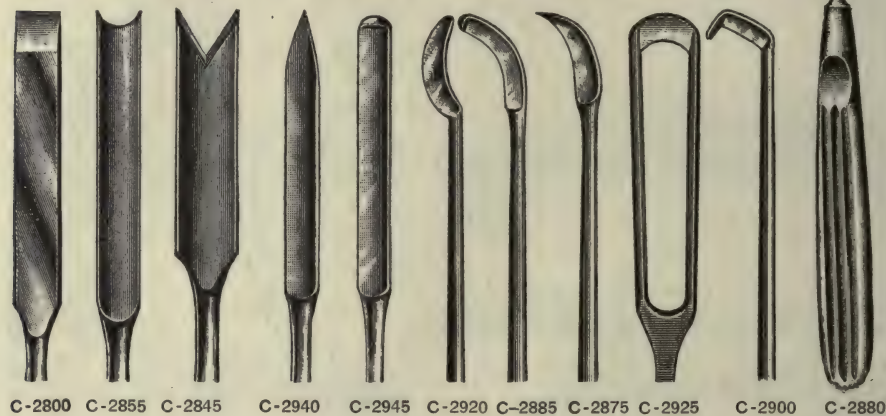

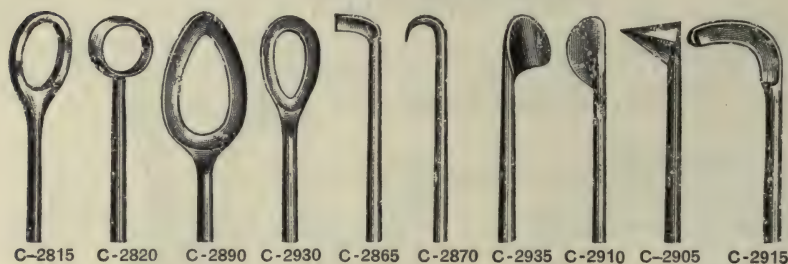

The interchangeable feature adds slightly to the cost if a single instrument is purchased, but where two or more blades are purchased or where the purchaser when buying the first instrument has a practice that might demand other blades for future work, the practitioner will find that he can effect a considerable saving.

We guarantee every blade to be perfect in fit, design, finish, temper and cut. Our forceps can also be used with the K. S. handle. We guarantee a perfect fit.

Nasal and Pharyngeal Illuminating Instruments

The illuminating instruments illustrated below are carefully and scientifically made, are all equipped with the Electro Surgical Instrument Co.'s improved cold lamp and are well adapted to the purposes for which they are made.

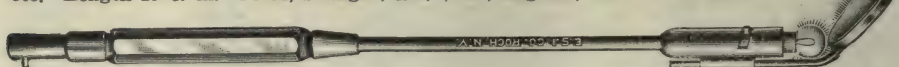

C-3682. D. BRAYDEN KYLE'S POST NASAL ILLUMINATOR.

The lamp is protected by a hood with a glass covered opening on its proximal side, thus permitting the concentrated light rays to fall only on the parts under immediate observation. With this instrument introduced through the mouth into the naso-pharynx, anterior rhinoscopy reveals the parts beautifully illuminated. Price, net..... \$3 50

C-3684. THE E. S. I. CO. GENERAL DIAGNOSTIC ILLUMINATOR.

The lamp is lens tipped, throwing a brilliant cone of light directly forward and the instrument is especially fitted for the illumination of cavities—mouth, nose, vagina, rectum, etc., and may be used with or without specula, tubes, etc. Length 19 c. m. Price, straight, net, \$2.50; angular, net..... \$3 00

C-3686. THE E. S. I. CO. LARYNGOSCOPE AND MOUTH LAMP.

It is simple in construction and avoids all the annoyances pertaining to the use of the head mirror. The various mirrors are interchangeable. The shank on the mirrors being flattened prevents gyration. The mirror furnished is $\frac{3}{4}$ inch. Price, net, \$3 00. Mirror, 1 inch, extra, net..... \$0 80

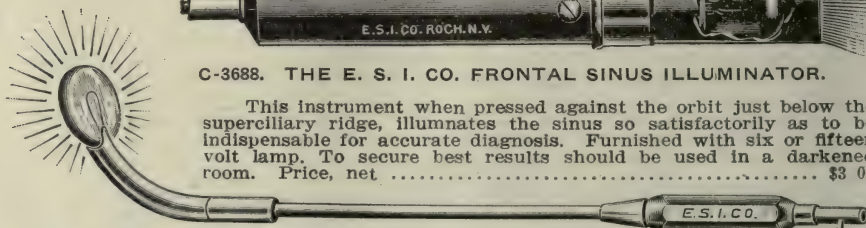

C-3687. THE E. S. I. CO. ANTRUM ILLUMINATOR.

This instrument is furnished with a lamp having a capacity of either six or fifteen volts. The bulb is flat, about 6 m. m. thick and about 15 m. m. in diameter, its shape permitting it to lie close to the hard palate so that the full benefit of the light ray is obtained. The instrument should always be used in a dark room. Price, net..... \$3 00

C-3688. THE E. S. I. CO. FRONTAL SINUS ILLUMINATOR.

This instrument when pressed against the orbit just below the superciliary ridge, illuminates the sinus so satisfactorily as to be indispensable for accurate diagnosis. Furnished with six or fifteen volt lamp. To secure best results should be used in a darkened room. Price, net \$3 00

C-3689. CHEVALIER-JACKSON'S NASO PHARYNGEAL ILLUMINATOR.

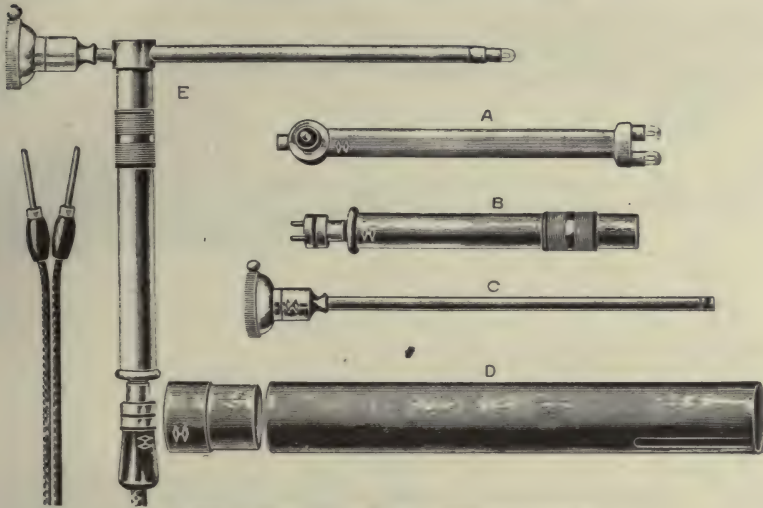

This instrument is used by its designer in opening the sphenoidal sinus. The lamp used is trans-illuminating and when inserted into the naso-pharynx, it shows distinctly the superior choanal margin on anterior rhinoscopy. One c. m. above this apparent margin the wall of the sphenoidal sinus may be entered with perfect safety. For best results use in a darkened room. Price, net..... \$4 00

Note.—In ordering any of the instruments listed above please state whether they are to be used with battery, wall plate, transformer or socket controller, so that we can equip them with lamps of the proper resistance.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

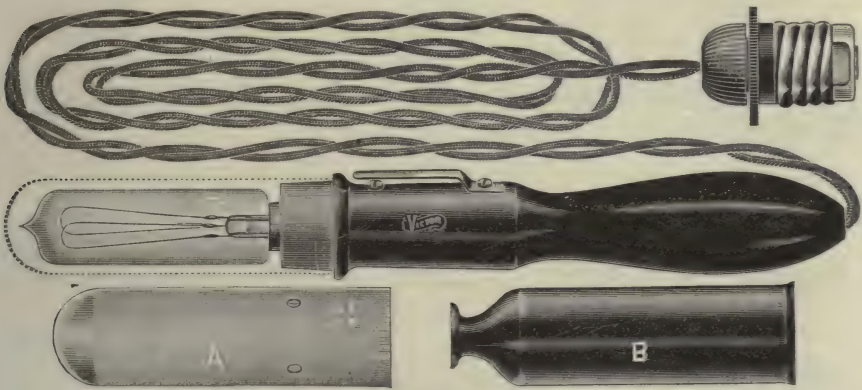

A discount of 5% will be allowed for Cash with Order or C. O. D. shipments except on items marked net.

Nasal and Pharyngeal Illuminating Instruments

C-3691. THE HAY'S PHARYNGOSCOPE.

For the examination of the naso-pharynx—i. e., posterior nares, eustachian tubes and pharyngeal vault. The lenses used are of superior quality and give a most exact interpretation of the part in view. The instrument is simplicity itself. The pharyngoscope, cords, lamps, etc., are all carried in a small wooden box measuring $8\frac{1}{2} \times 3\frac{1}{2} \times 1\frac{1}{2}$ inches. Send for special circular. Price, net.....\$30 00

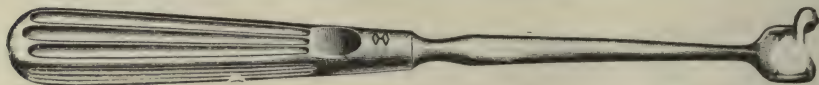

C-3692. THE VICTOR TRANS-ILLUMINATOR.

The source of light is a long high candle power lamp, calculated to deliver a greater volume of light than is possible with the small trans-illuminators provided with miniature lamps. The greater volume of light is especially valuable in examinations of the antrum and frontal sinus. It is provided with a glass shield in order to insulate to a great extent the heat developed by the lamp bulb. This insulation permits the placing of the illuminator in direct contact with the mucous surface for a few moments, without danger of burning. An oblique glass shield can be provided for trans-ocular illumination. Price, ready to attach to any electric lamp socket, net.....\$4 50

DE VILBISS HAND ATOMIZERS AND NEBULIZERS.

C-3915	De Vilbiss Atomizer No. 16	\$1 25
It will spray any liquid, oil, aqueous or alcoholic solution, in any direction desired, from any bottle or open vessel, has two bottles, is provided with extra hard rubber fluid tube for spraying corrosive solutions.		
C-3916	De Vilbiss Invertible Atomizer No. 14.....	2 00
This atomizer has all the qualities of the No. 16 and is so constructed that a quarter turn of a thumb nut closes air and fluid tubes, making it non-spillable.		
C-3917	De Vilbiss Atomizer No. 9, all metal	1 25
Will throw a spray in any direction desired. Heavy oils and vaseline by heating; light oils and water solutions without.		
C-3918	New Improved De Vilbiss Atomizer No. 28	75
Will spray any liquid, oil or aqueous solution. It is equipped regularly with a hard rubber fluid tube, but metal tube is supplied if desired.		
C-3919	De Vilbiss Atomizer No. 17	1 25
The tube of this atomizer is only 1-16 of an inch in diameter and can be easily passed through the nares into the pharyngeal vault in the same manner as you would an Eustachian Catheter. One tip sprays in four directions, and the other throws a straight spray.		
C-3921	De Vilbiss Atomizer No. 23	65
Throws a fine fluffy spray of either oil or water.		
C-3922	De Vilbiss Atomizer No. 27	75
Has two tips; the tip with large hole for spraying oil, the tip with small hole for aqueous solutions.		
C-3923	De Vilbiss Atomizer No. 29, for oil or water	50
C-3924	De Vilbiss Atomizer No. 68, without bulb	1 00
Sprays from any bottle or open vessel, and can be conveniently carried in bag or pocket.		
C-3926	De Vilbiss Nasal Atomizer, No. 20	50
Will spray oil or water. Has slip cap for bottle.		
C-3927	De Vilbiss Nasal Atomizer, No. 21	60
Will spray oil or water. Has screw top with solid head.		
C-3929	De Vilbiss Nebulizer No. 49	1 25
Will throw a perfectly dry or moist vapor at the will of the operator by the adjustment of a small table attached to the tube within the bottle.		
C-3931	De Vilbiss Nebulizer No. 45	1 50
Similar to the No. 49 with a larger bottle of different design.		
C-3932	De Vilbiss Nebulizer No. 41, has no regulating table	1 00
C-3933	De Vilbiss Single Nebulizing Tube for Atomizers No. 20 and 21.....	15
C-3934	De Vilbiss Double Nebulizing Tube for any nebulizer	25
*C-3937	De Vilbiss Powder Blower No. 32, single tube	50
*C-3938	De Vilbiss Powder Blower No. 36	1 00
Will diffuse powder perfectly in any desired direction.		
C-3939	De Vilbiss Powder Blower No. 34	1 25
Will diffuse powder perfectly in any direction. Has long extension tip for ear work which may be removed when not wanted.		

QUALITY GUARANTEED.—Specify section letter and number in ordering.

A discount of 10% will be allowed for Cash with Order or C. O. D. shipments except on items marked net.

Atomizers and Nebulizers

HAND ATOMIZERS.

C-3895	Hard Rubber, with 3 detachable tips	\$1 25
*C-3900	Hard Rubber, with straight tip only	50
C-3910	Hard Rubber, Davidson's, with 3 platinum lined tips	1 75

ATOMIZERS, NEBULIZERS, ETC., FOR USE WITH COMPRESSED AIR.

C-3905	Davidson's Atomizer No. 10, set of 3 tubes, with stand.....	2 50
C-3916	De Vilbiss Atomizer No. 52	1 00
	Sprays any liquid, oil, aqueous or alcoholic in any direction desired.	
C-3917	De Vilbiss Atomizer, No. 53	1 00
	Same as No. 52, except that it will spray in any direction laterally.	
C-3918	De Vilbiss Atomizer No. 56	1 50
	Furnished with post nasal M and N tips, works similar to the De Vilbiss Atomizer No. 17.	
C-3919	De Vilbiss Atomizer No. 58	1 00
	Will throw a fine spray of any liquid, either oil or aqueous. Is particularly desirable for spraying expensive solutions.	
C-3921	De Vilbiss Nebulizer No. 80	1 00
	For oil only and produces aapor with regulating table as in De Vilbiss Nebulizer No. 49.	
C-3922	De Vilbiss Powder Blower No. 73	1 00
	Diffuses powder perfectly in any desired direction, and is furnished with extension tip, which may be removed when desired.	
C-3930	De Vilbiss Three Piece Set	3 00
	Includes No. 52 Atomizer, No. 80 Nebulizer and No. 73 Powder Blower, complete with nickel plated stand.	
*C-3935	De Vilbiss Four Piece Set	5 00
	Includes No. 52 and 56 Atomizers, No. 80 Nebulizer and No. 73 Powder Blower.	
C-3936	De Vilbiss-Pynchon Compressed Air Aspirator, complete	2 50
	A particularly useful instrument for the removal of blood and secretions from the ear, nose, pharynx or tonsils.

Compressed Air Apparatus

C-4205. COMPRESSED AIR OUTFIT.

For physicians requiring only a limited quantity of compressed air we recommend out outfit Fig. 4205. It is very neat in appearance, is strongly made and is an ornament to any office.

The receiver is 7 inches in diameter by 28 inches high, made of heavy seamless steel tank; is equipped with air pressure gage registering 50 lbs., and cross cock with inlet and outlet valve.

Pump is of the regular T handle style, very powerful and mounted on broad wood base.

Automatic cut off, 4 feet silk covered rubber tubing, and set of 3 hard rubber atomizing tubes with rack.

Complete with tubes as shown in illustration.....\$25 00

C-4205

C-4210. COMPRESSED AIR OUTFIT.

This outfit consists of a seamless steel tank, 10x36 inches, tested up to 500 pounds air pressure, equipped with air pressure gage, cross cock with inlet and outlet valve, and finished in either aluminum bronze or nickel plate; T handle pump of the regular pattern, very powerful; 4 feet of silk covered tubing, 4 feet of linen lined rubber tubing, automatic cut off, and set of 3 hard rubber spray tubes.

Price in aluminum and bronze finish, pump and fittings nickel plated\$27 00

Price in all nickel plated finish. 30 00

If double cylinder, lever handle pump is wanted instead of the T. handle pump described, add \$5.00 to the price of apparatus as listed.

C-4210

QUALITY GUARANTEED.—Specify section letter and number in ordering.

A discount of 10% will be allowed for Cash with Order or C. O. D. shipments except on items marked net.

Compressed Air Apparatus

C-4215. COMPRESSED AIR OUTFIT.

This outfit consists of a T handle pump, receiver, set of 3 hard rubber atomizing tubes, 4 feet silk tubing with automatic cut off, 4 feet of linen lined rubber tubing leading from pump to receiver.

Receiver is made of brass, with dome riveted and sweated on, bottom of tank sweated on, equipped with air pressure gage, inlet and outlet valve, and air regulating valve from receiver to outlet. Tested up to 100 lbs. air pressure, gage reading to 50 lbs. Receiver and fittings highly polished and nickel plated.

The pump is of the regular T handle style of the best make and fully guaranteed.

For a physician whose practice requires only a limited amount of compressed air, we can heartily recommend this apparatus.

Price, complete as described\$25 00

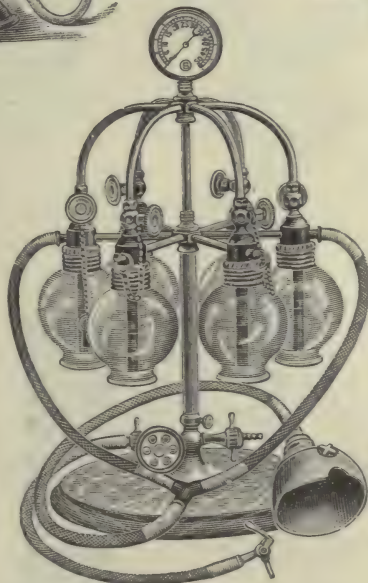

C-4215

C-4220. BOEKEL'S NEBULIZER.

The points of advantage of Boekel's Nebulizer are: First, simplicity of design, the ease of manipulation, the absence of complicated parts, which permit the accumulation of dirt or oily deposits that prevent the proper working of the apparatus. Another feature claimed by us, which should be one of the main essentials of all nebulizers is the absolute isolation of one chamber from the other and the air-tight closing of the medicine bottle when not in use. Should the necessity arise for the use of two or more solutions in various bottles, this may be accomplished by appropriate tube connection furnished with each apparatus. Can be set on table or bracket.

Pricenet \$32 00

Note.—Nickel plated brackets for attaching to wall can be furnished at an additional cost of net \$3.00.

C-4220

QUALITY GUARANTEED.—Specify section letter and number in ordering.

A discount of 10% will be allowed for Cash with Order or C. O. D. shipments except on items marked net.

C-5262	Mathieu's, regular pattern, 4 sizes	each 5 25
C-5265	Mathieu's, improved pattern, Haslam model, 4 sizes	each 4 00

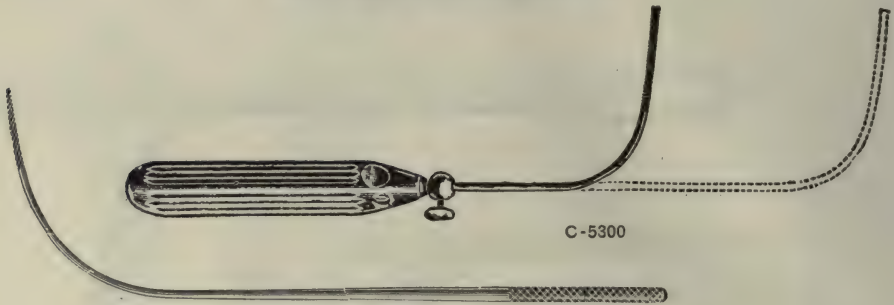

This instrument embodies the ultimate degree of efficiency and simplicity in a tonsilotome. It has only three separate pieces. It is made of forged steel and not stamped from sheet metal, consequently the blades cut better and hold their edges longer. It is easily taken apart for cleaning and has no small pieces to get lost. It has an adjusting screw by which the degree of tension on the tonsil by the fork is regulated.

Intubation

C-5650. HASLAM-FERROUD INTUBATION SET.

C-5650

This set of instruments for intubating the larynx of children, comprises 6 gold plated tubes of the Ferroud pattern, 1 introducer and extractor of improved pattern, 1 Denhardt's mouth gag made of finest steel, and 1 tube gauge. The tubes are held on a specially constructed hinged frame from which they are easily handled. Put up in fine, nickel plated metal case. This outfit represents the latest and most up-to-date set of intubating instruments ever placed on the market.

Price, complete\$15 00

C-5655. FERROUD-THORNER'S INTUBATION SET.

Kratzmueller's Modification.

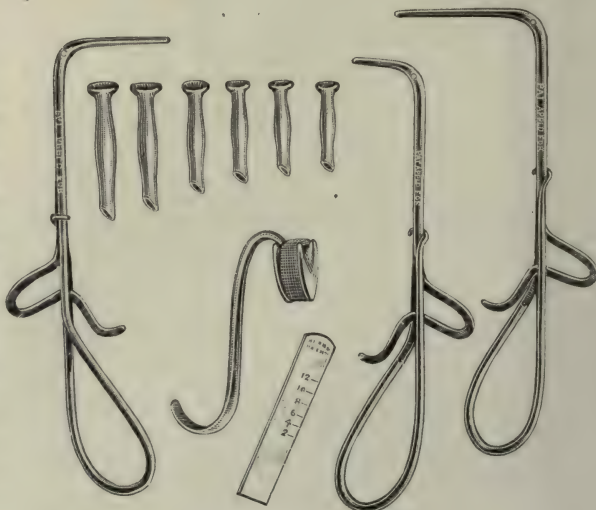

This improved style of intubation set is simple, compact, clean and effective. The tubes are of the most improved shape and are made of non-corrosive metal. The set consists of six tubes, gag, gauge and one, two or three improved introducers and extractors, put up in a neat washable pouch.

Price per set, 1 handle... \$10 50

Price per set, 2 handles.. 12 50

C-5845

FOR DIAGNOSTIC, OPERATIVE AND TREATMENT WORK.

The designs for these instruments were furnished by Dr. Chevalier Jackson of Pittsburgh, Pa., and have been made for him and under his directions by "The Electro Surgical Instrument Co." of Rochester, N. Y. In order to secure the correct pattern of these instruments we would ask our customers to specify this make.

A modification of the Jackson bronchoscope has been suggested by Dr. D. Braden Kyle of Philadelphia, Pa. In this modification a fenestra has been placed 5 cm. from the distal end with a corresponding opening in the auxiliary tube. For use in cases of tracheal tumors, etc.

A catalogue giving complete description with illustration of Dr. Jackson's instruments will be mailed upon request.

*C-5840	Lamp and Carrier for Jackson's tubes	\$2 50
C-5845	Aspirator, Jackson's, for secretions, with all metal suction pump	5 00
*C-5750	Handle, universal, metal, for hooks and sponge holders	25
*C-5755	Hook, Jackson's, for foreign bodies	75
*C-5760	Hook, Jackson's, for foreign bodies	75
*C-5765	Secretion Tube, Jackson's50c to 1 00
*C-5770	Sponge Holder, Jackson's, self-holding, 27 cm., \$1.25; 60 cm., \$1.50; 85 cm. ..	1 75
C-5781	Oesophagoscope, Jackson's, adults', No. 1, 10 mm. x 53 cm., with auxiliary drainage tube	15 00
C-5782	Oesophagoscope, Jackson's, child's, No. 2, 7 mm. x 45 cm., with auxiliary drainage tube	11 00
C-5783	Bronchoscope, Jackson's, adults', No. 3, 7 mm. x 40 cm., without obturator ..	11 00
C-5784	Bronchoscope, Jackson's, child's, No. 4, 5 mm. x 30 cm., without obturator ..	9 00
C-5786	Laryngeal Speculum, Jackson's, No. 5, with slide, adults', 14 mm. x 16 cm. ..	18 00
C-5787	Laryngeal Speculum, Jackson's, No. 6, with slide, child's, 12 mm. x 14 cm. ..	18 00
C-5788	Bronchoscope, Jackson's, No. 8, 7 mm. x 45 cm., with auxiliary drainage tube	11 00
C-5789	Bronchoscope, Jackson's, No. 9, 5 mm. x 45 cm., with auxiliary drainage tube	10 00
C-5791	Bronchoscope, Jackson's, No. 10, 5 mm. x 30 cm., with auxiliary drainage tube	9 00
Bronchoscopes Nos. 8, 9 and 10 are used in cases of excessive secretion and for drainage of lung abscesses.		
C-5792	Gastroscope, Jackson's, No. 11, 10 mm. x 70 cm., for ordinary cases	21 00
C-5793	Gastroscope, Jackson's, No. 12, 10 mm. x 80 cm., for extreme cases gastroptosis	24 00
*C-5794	Bronchoscope, Jackson's, modified by Dr. D. Braden Kyle, 7 mm. x 40 cm., with long and short light carrier	14 50
The Jackson tubes can be made to fit and to be used in connection with the Bruening electroscope, see Fig. A. We can also remodel your old Jackson or Killian tubes to be used with the same instrument. Write for prices.		
C-5796	Electroscope, Bruening's, latest, complete with cable	35 00

This instrument has a specially constructed lamp in connection with a powerful lens and mirror, and throws a strong light to the bottom of the tube.

Electrically Lighted Rectal Instruments

D-196. THE E. S. I. CO.'S PROCTOSCOPE.

This instrument is made in five sizes, Nos. 45, 50, 55, 60 and 65 French scale. Any of these sizes may be had in three lengths, 8, 15 or 20 cm. The lamp carrier and lamp are carried in an auxiliary tube, out of the line of vision, which prevents the breaking of the lamp with instruments in use and eliminates annoying glare and reflections.

Price, complete with light carrier, any sizenet \$6 75
 Price, without light carriernet 4 50
 Price, light carrier onlynet 2 25

D-198. THE "JAMES P. TUTTLE PNEUMATIC PROCTO-SIGMOIDOSCOPE.

This instrument, we believe, is the most practical one ever introduced for the diagnosis of rectal troubles. The dilating feature of it is both novel and practical. A slight pressure of the bulb inflates the rectal ampulla so that the whole rectum can be seen, and permits the instrument to be carried up as high as the sigmoid flexure without touching the rectal walls or causing the least traumatism to the parts.

It is made in one size, No. 57 French scale and in two lengths, 4 and 10 inches. These sizes have been found to be the most suitable for general work.
 Proctoscope, size 57 French, length 4 inches, completenet \$14 00
 Sigmoidoscope, size 57 French, length 10 inches, completenet 16 00

The complete instrument carries with it an obturator, window, light carrier with extra lamp, dilating bulb and detachable handle.

D-201. BRINKERHOFF'S RECTAL SPECULUM.

Is made in three sizes, No. 1, 4 inches long x $\frac{7}{8}$ inch outside diameter; No. 2, 4 inches long x 1 inch outside diameter; No. 3, $4\frac{1}{4}$ inches long x $1\frac{1}{8}$ inches outside diameter.
 Price, any size, complete with light carriernet \$6 50

D-202. COOK'S RECTAL SPECULUM.

This well known instrument needs no description. The lamp is attached to the center of the lower blade and illuminates the cavity evenly with a powerful white light which shows the tissues in their natural colors.
 Price, complete with light carriernet \$8 00

D-204. PRATT'S RECTAL SPECULUM.

The lamp in this instrument is so located as not to interfere either with vision or with the use of the instruments and gives a steady, strong illumination.
 Price, complete with light carriernet \$5 50

The instruments illustrated above are made by the Electro Surgical Instrument Co. of Rochester, New York, which guarantees correct design and proper construction.

D-435	Haslam's, straight, for bloodless operation	2 25
D-436	Haslam's, curved, for bloodless operation	2 50

The Haslam forceps are applied after the membrane has been drawn forward. Long ligatures are run through the cross notches allowing at least ten inches of ligatures to extend on each side. The prepuce is then removed with either scissors or knife, a probe is introduced under the ligatures between the two mucous surfaces, the ligatures raised up so as to leave about five inches on each side of the prepuce, they are then cut where the probe crosses them, leaving ligatures for each side which are then tied. The forceps act as a haemostat and are not removed until the operation is complete.

Dr. Hugh H. Young's Urethrascopes

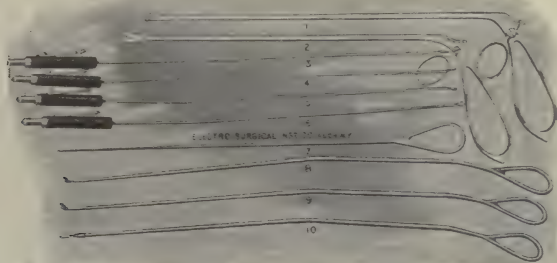

Devised by Dr. Hugh H. Young of Johns Hopkins Hospital, he holding that an external source of light is desirable in order to secure a larger field for observation and intra-urethral operations, so that bleeding will not make any difference with the illumination and that better asepsis will be secured.

Fig. A shows beaked tube with light carrier in position. Fig. B the obturator. Fig. C the beaked tube with obturator in position. Fig. D shows the straight tube with dilating window for air distension attached. Fig. E the obturator and Fig. F the straight tube with obturator in position. Tubes are made in plated metal and silver.

Gaillard's French Catheters and Bougies

Are made by Léon Gaillard of Paris, France, with works at Alfortville, (Seine) France. They represent the **very best catheters and bougies that can be produced** and are intended for the most discriminating specialists in genito urinary work.

GAILLARD'S Catheters and Bougies are made on scientific principles and in accordance with the suggestions with which eminent specialists have favored us for years.

GAILLARD'S Catheters and Bougies are covered with special gum, which renders them **elastic and flexible**. They present a **uniform surface** and a **glazed finish**. They can **neither cause injuries nor break** during their introduction.

GAILLARD'S Catheters are made with **woven eyes**; they have a **large internal diameter**, a **smooth internal surface**, and a **solid and aseptic end**.

GAILLARD'S Bougies have at the bottom a **conical rim** which is **hermetically closed** with elastic gum.

GAILLARD'S Gummed Silk Web Catheters have the advantage of possessing a **very large internal and even diameter** which permits of **perfect drainage** of the vesical cavity; their strength and great flexibility facilitate greatly their introduction.

GAILLARD'S Gum Catheters and Bougies are guaranteed to withstand the effects of **sterilization by repeated boiling** or by any other disinfecting process.

GAILLARD'S Gum Catheters and Bougies are guaranteed to remain **non-adhesive**, to **retain their form**, and to **keep in perfect condition** in any country, even under very unfavorable climatic conditions. They are guaranteed to last a long time.

By appointment contractor to the hospitals and medical faculty of Paris; to army, navy, and government offices; the Necker Hospital (Department for the treatment of urinary diseases under Prof. J. Albarran); sole contractor to General Hospital of Mexico; and other hospitals and the medical faculties of France and elsewhere.

GAILLARD'S BOUGIES listed and illustrated on page 343.

GAILLARD'S CATHETERS listed and illustrated on page 354.

D-1018	Cooler, the Zerodone, complete with haemorrhoidal and prostatic cooling sounds	6 00

The Zerodone is a cooling apparatus for the treatment of Internal Haemorrhoids, Acute and Chronic Prostatitis and Irritable Bladder.

The peculiar feature of this elegant contrivance is a water chamber from which by means of the working of a rubber bulb, a double current passes through a cylinder inserted into the rectum. There is no connection with a fountain syringe, as the instrument is complete in itself. The most practical instrument made, for chronic inflammations of the prostate and rectum.

CYSTOSCOPES.

D-1345 Bransford Lewis' new and improved cystoscope, consists of: 1, sheath with obturator, Fig. A, the former affording illumination of the whole interior of the bladder by fenestration of its beak on both convexity and concavity; 2, telescope for direct double urethral catheterization, Fig. B.; 3, telescope for indirect ureteral catheterization with right-angle lens, Fig. C.; 4, telescope for retrospective view, non-catheterizing, Fig. D.; 5, electric cable, with cut-off switch attached, placing control of the light in the hands of the operator. Complete Universal Cystoscope in case, net \$100 00

In addition to the above outfit, non-catheterizing telescope for direct forward view, Fig. E, and non-catheterizing; telescope for indirect, right-angle view, Fig. F, can be furnished. Complete set, including 5 telescopes enumerated, in case, net \$125 00

D-1347

CYSTOSCOPES.

D-1346. THE "E. S. I. CO." DIAGNOSTIC CYSTOSCOPE.

This instrument is so arranged that either air or water may be used as a dilating medium. It is designed for diagnostic work, for removing calculi and other foreign bodies, and for making direct applications, etc. Its advantages are its small calibre, the fact it can be used for either air or water dilatation, that direct applications can be made to diseased tissue, and its cold lamp, giving brilliant illumination.

The instrument has a calibre of No. 20 French scale and a length of 20 cm. The female cystoscope has a calibre of No. 28 French scale and a length of 10 cm.

Price, complete with extra lamp, obturator, window and dilating bulbsnet \$21 50
Price, complete with extra lamp, obturator and windownet 20 00

D-1347. THE "E. S. I. CO." COMBINATION CYSTOSCOPE.

This instrument represents the very latest advance in the art of cystoscopy, comprising as it does the best features of the Tilden Brown, the Cabot, the Ayres and other good models. The calibre is small, No. 23 French, the length about 20 cm. The lamps are cool and give brilliant illumination, the catheter guides are attached to the outer wall of the direct periscope, so that the instrument when not being used for ureter catheterization is available for diagnostic and treatment work. Two periscopes are furnished, one for direct, the other for angular inspection. It is provided with two stop cocks to facilitate irrigation. Air or water may be used for dilatation.

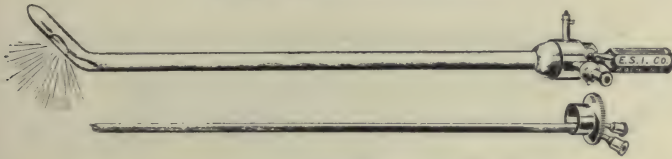

Price, complete with two periscopes, obturator, window and extra lampnet \$60 00
Price, complete as above with two silk catheters and dilating bulbsnet 64 50
Price, indirect catheterization periscope, extranet 35 00
Price, case for above, covered with genuine leather, seal grainnet 3 50

Space does not permit of full detailed description. We will be glad to mail special circular if you are interested.

D-1338

D-1343

CYSTOSCOPES.

D-1348. THE "BRAASCH" DOUBLE CATHETERIZATION CYSTOSCOPE.

Designed by Dr. W. F. Braasch of St. Mary's Hospital, Rochester, Minnesota. It is a modification of the Lewis and the Elsner, differing from them principally in that the catheter guides are removable. They are held firmly in place by small flanges which project slightly into the lumen of the tube. The beak is small and tapered, making introduction easy. The thickness of the walls has been lessened, reducing the outer calibre and enlarging the lumen of the tube. The removable catheter guide can be rendered surgically sterile, and when it is not in use the cystoscope can be used for diagnostic purposes. The cystoscope was designed for water dilatation but may be used with air if preferred. The calibre is No. 21 French scale and the length 21 cm. It is simple, effective and the most practical instrument for the general practitioner that has been designed up to date.

Price, complete with obturator and extra lampnet \$30 00
 Price, complete with obturator, extra lamp, two silk catheters and dilating bulbs.net 34 50
 Price of case for above, covered with genuine leather, seal grainnet 3 50

D-1338. THE NITZE IMPROVED EXAMINING CYSTOSCOPE.

The Nitze improved examining cystoscope with prism inside of telescope. Can be furnished in 15, 18 and 21 French scale. Cystoscope complete with reserve lamp and conducting cords in case 35 00

D-1342. THE NITZE-SCHLAGINWEIT'S IMPROVED CYSTOSCOPE.

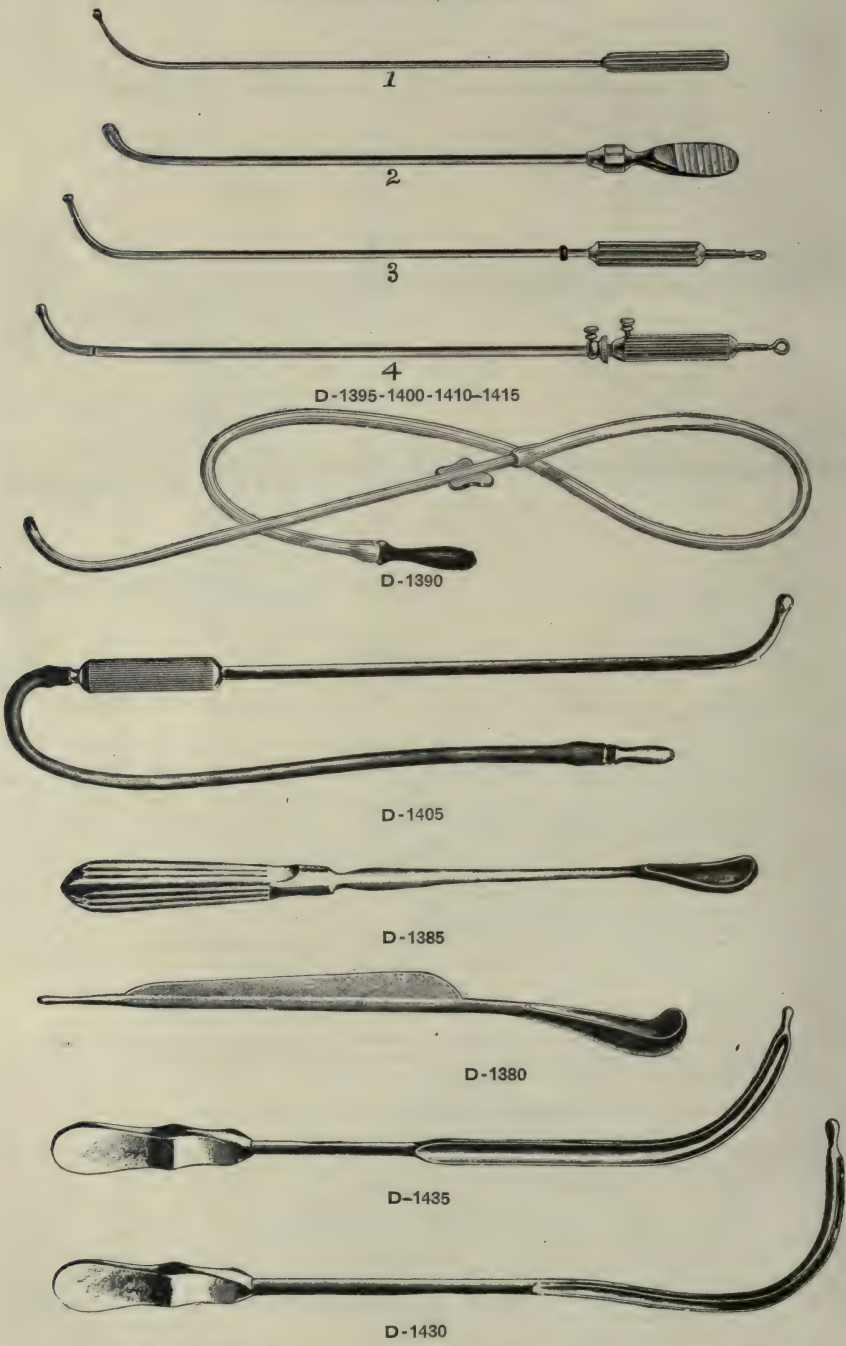

The Nitze-Schlaginweit's latest improved ureter and irrigating cystoscope. It has a removable optical telescope. A catheter as large as No. 7 French scale can be introduced and controlled by a lever at the proximal end. The telescope can be removed and the instrument be used to irrigate the bladder. A ball valve automatically closes the outer sheath; through this valve the two-way stop cock illustrated can be introduced for irrigation. The size of the instrument is No. 23 French scale. Cystoscope complete with reserve lamp, conducting cords, two-way stop cock for catheter channel, and one ureter catheter 60 00

D-1343 Nitze-Schlaginweit's Cystoscope as above described, but with double catheter channel, for two No. 6 catheters 70 00

Gaillard's ureteral catheters are made in sizes 4, 5, 5½, 6, 6½, 7, 7½ and 8 French scale.

Gaillard's ureteral catheters are made exclusively of a special quality of the finest unbreakable silk web.

Gaillard's ureteral catheters are made with large lumen, insuring rapid and perfect drainage.

D-1530, 1535, 1540 and 1542 are carried in stock, other styles being imported on order only.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

A discount of 10% will be allowed for Cash with Order or C. O. D. shipments except on items marked net.

Ureteral Instruments

GAILLARD URETERAL CATHETERS.

The usual object of ureteral catheterization is to collect a sufficient quantity of urine containing more or less pus, occasionally even concretions of pus, as a means of arriving at a correct diagnosis of a case. The surgeon, to promptly discharge his responsible and delicate duty, will seek to accomplish his task in the shortest possible space of time, so as to reduce the duration of the often painful and always exhausting ordeal to which his patient has to submit to the lowest possible limit. To secure expedition the catheters should have a large bore, whilst for other reasons it is usual to employ catheters of a small external diameter, say Nos. 4 to 12 of the French scale, more particularly Nos. 5, 6, 7 and 8. Under these circumstances the walls of the catheter must necessarily be very thin, yet covered with a sufficient layer of pure gum of the highest quality.

The qualities which we have defined above are scrupulously maintained in the manufacture of our catheters, which are made, not of a common silk tape or of bad cotton web, as is the case with many brands made for cheapness, but exclusively of a special kind of the finest unbreakable silk web.

Ureteral catheters bearing the name "Gaillard" are always easier to operate with, and it is not necessary to have recourse to the more or less dangerous stilette. The large bore of these catheters insures perfect and rapid drainage.

Gynaecic Instruments

E-132. DR. DON H. PALMER'S SELF RETAINING VAGINAL SPECULUM FOR IMMEDIATE REPAIR OF THE PERINEUM.

Patent Pending.

E-132

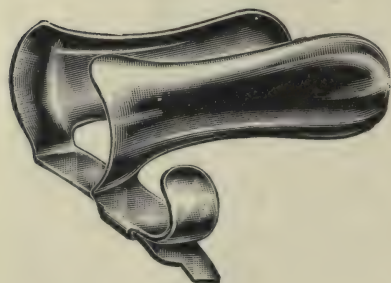

Sectional view showing speculum in position.

The primary repair of the perineum is one of the most important features of the obstetric work of every general practitioner and often one of the most difficult to perform, due to the lack of skilled assistants and the inability to obtain a satisfactory view of the operative field.

To overcome these difficulties I have designed this instrument, which is small, light, simple and self retaining. It is quickly applied, gives the operator a full view of the anterior and posterior walls, the use of both hands, and immediate repair may be made in an easy, bloodless and satisfactory manner. A glance at the illustration of the instrument together with the sectional view of the anatomy will give a clear conception of the retaining principle. Circular giving full description mailed upon request.

Pricenet \$5 50

E-134. THE SPARK'S VAGINAL SPECULUM.

E-134

This instrument is self retaining and is very simple, consisting of only two pieces of sheet steel, heavily nickel plated over copper. The two parts can be instantly dismounted and folded into small space.

When in position the instrument will automatically lock at any point desired by pressure made at the distal extremities, which causes the long shank to bind on the margin of the slot.

There are no set screws, no irregular surfaces, nothing to get out of order.

They are light in weight, there is no lost motion, are readily sterilized and are reasonable in price.

This speculum will more nearly meet all your requirements than any other. The anterior blade is shorter than the posterior blade. The speculum is so compact that it may be used in any position in the vagina, an important feature when it is desired to do urethral work or to make local applications to the vaginal walls.

Gynaecic Instruments

E-136. DR. E. E. HALL'S VAGINAL AND RECTAL SPECULUM.**TWO SPECULUMS IN ONE.**

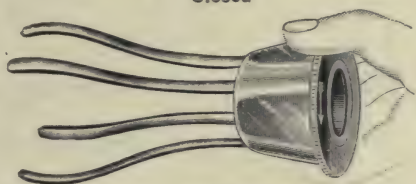

This instrument is made of the best German silver, dilates by turning knurled disc, remaining at any degree of dilation desired. There are no set screws or clamps. It works in harmony with the tissues involved, dilating them in an even circular form, enabling the user to view the tissues and cervix on all sides.

There are two sets or sizes of dilating fingers, readily interchangeable, thus making two speculums in one.

E-138

E-138. DR. E. E. HALL'S EXPANDING DOUCHE POINT.

This expanding douche point is made of the best German silver. Two sizes in one. The small size is for stimulating by the rectum, also for treating many diseases of the rectum.

Expansion is made with knurled disc. Dilates all folds of the vaginal membrane, and insures the most perfect douche, or application to the affected parts.

Price to patients, postpaid \$3 50

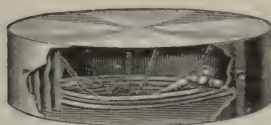

Price to physicians, postpaidnet 2 25

E-142. DR. E. E. HALL'S COLLAPSIBLE IRRIGATING CAN.

Made collapsible so that it can readily be carried in the grip, of the best German silver, durable, convenient and easily sterilized. Invaluable for both doctor and nurse.

The can holds two quarts and when folded, with hose, stop cock, bracket and chains it is less than 2½ inches high. To see this is to want it.

Price, postpaidnet \$3 50

Closed

Note.—This irrigator will be found to be particularly useful for the injection of salt solutions.

Note.—We call special attention to the Douglass point that we use on our uterine dilators. This point is well shown in Figs. A, B, C, D, E and F. It has two distinct advantages: first, an easy introduction; secondly, it eliminates the danger of pinching the tissues in withdrawal. We furnish this point with all of our dilators unless otherwise specified.

E-2170	Canvas Roll, No. 8, 8x12 inches, single row of 13 loops	75
E-2175	Canvas Roll, No. 8, 8x12 inches, double row of 13 loops	90
E-2180	Canvas Roll, No. 13, 14½x32 inches, with 22 adjustable loops	1 50
E-2185	Canvas Roll, No. 20, 15½x35 inches, with 20 adjustable loops	1 50

These rolls are made of a good grade of canvas, with pocket and adjustable loops that will accommodate any size of instrument. They are clean, much preferred to the old style chamois lined rolls. We carry the white in stock but can furnish them in tan fast color if desired, at short notice.

They are made with either single or double rows of loops.

Sizes No. 1, 2 and 3 are usually used for uterine, urethral and general operating instruments. Nos. 4, 5 and 6 are especially designed for obstetrical instruments.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

A discount of 10% will be allowed for Cash with Order or C. O. D. shipments except on items marked net.

Electric Illuminating Apparatus

F-2. VICTOR NO. 3 HEAD LAMP.

This type of head lamp is intended to illuminate a fairly broad field and fully meets the requirements of the surgeon.

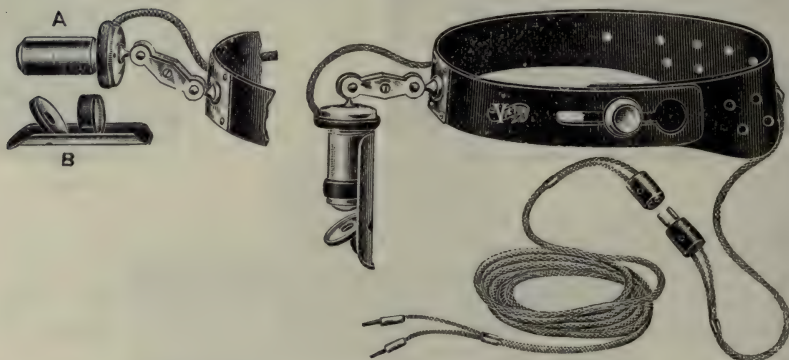

The lamp bulb is about one-third the size and weight of a 16 c. p. bulb and being of American manufacture, renewals are quickly and easily made. The reflector is a highly polished parabolic cone.

A universal double swivel joint is provided to adjust the lamp to any conceivable position.

Operable on a 110 volt direct or alternating current.

Price, complete as shown..\$7 50

F-3. VICTOR NO. 4 (Kirstein) HEAD LAMP.

This type is particularly adapted to eye, ear, nose and throat specialists, who at various times require a clear, white illumination in speculum work.

The bulb is of the miniature variety and consequently is not operable direct from the lighting current, but can be used in connection with any Victor transformer, lamp regulator, wall plate, or battery cells.

Price of head lamp complete, as shown\$18 00

Price of current tap and black lamp rheostat 2 00

F-4. VICTOR SOCKET CONTROLLER FOR MINIATURE LAMPS.

This device is connected to any electric light socket and any miniature lamp, regardless of size or shape, ranging from the minute rice grain type to those possessing a heavy carbon filament, can be safely and accurately controlled as regards the intensity of light.

The controller is rigidly constructed, extremely durable and finely finished.

Is compact enough to carry in a satchel between the office and hospital if desired.

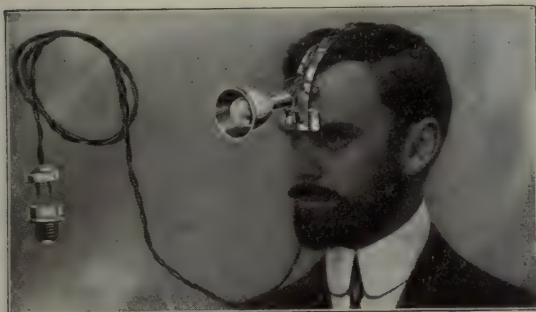

Price as shown, complete with 32 c. p. resistance lamp \$9 50

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Electric Illuminating Apparatus

F-1. McINTOSH NO. 1 ASEPTIC HEAD LAMP.

Constructed along lines assuring greatest possible asepsis, having a finely nickeled metal brace weighing only eight ounces, containing no unsanitary felt pads—simply a plain leather strip to soften contact with head. All connections pass through fibre outlet at back of reflector in which is contained tipless lamp, throwing a powerful diffused light free from shadows, which may be adjusted by the double ball and socket joint. The instrument is finely finished and provided with rich, silk-covered cord and plug connecting with any lamp socket to 104-115 volt direct or alternating current. Specify plain or frosted bulb.

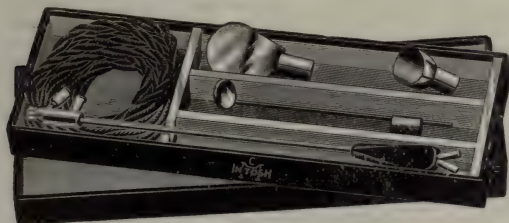

McIntosh No. 1 Aseptic Head Lamp, as illustrated \$5 00
 McIntosh No. 4 Silk Band Head Lamp, same as above but with silk head band..... 5 00

F-5. McINTOSH NO. 3 COLLAPSIBLE FIBRE HEAD LAMP.

Fitted with a comfortable fiber band which can be folded into compact space and readily slipped in the pocket. Lamp, reflector and adjustment are identical with No. 1, while the reflector and cord can also be detached to substitute head mirror if desired. Stage connector permits of lamp being disconnected conveniently without removal from head. The fiber band is very light and can be worn for hours without discomfort. Connects with any 104-115 volt current. Specify plain or frosted bulb.

McIntosh No. 3 Collapsible Fiber Head Lamp \$7 50
 McIntosh No. 2 Adjustable Fibre Head Lamp, same as above but with hat shaped fiber band 7 50

F-10. McINTOSH NO. 125 ILLUMINATOR CASE.

This illuminator case commends itself as indispensable to the practitioner. It contains the following articles, put up in a neat leatherette case: McIntosh No. 150 Universal Illuminator, straight; Laryngoscopic Mirror and Holder; Tongue Depressor and Shield; Shield for use in rectal or vaginal examination; one pair twisted illuminator cords.

Price, complete \$4 25

F-12. McINTOSH NO. 150-A TRANS-ILLUMINATOR.

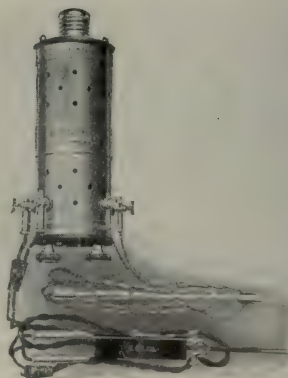

Price, including hard rubber trans-illumination shield \$2 50
 McIntosh No. 150 Universal Illuminator, same as above without shield 2 00
 McIntosh No. 151 Universal Illuminator, with curved shank 2 50

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Electric Illuminating Apparatus

F-14. ELECTRO SURGICAL INSTRUMENT CO. SOCKET CAUTERY TRANSFORMER.

Our socket cautery transformer is the only device of its kind on the market. It weighs but $2\frac{1}{2}$ pounds, is $6\frac{1}{2}$ inches long and $2\frac{1}{2}$ inches in diameter and will screw into any ordinary lamp socket. It is for use on the alternating current of any voltage and number of cycles and will furnish current for ordinary cauteries and all kind of diagnostic lamps. Being fitted with two pairs of binding posts, each with independent wiring, cautery and lamp may be used simultaneously, if desired. The current graduation is exceedingly fine and even and the range large so that the smallest diagnostic lamps and lightest cauteries as well as 15 volt lamps and ordinary cauteries may be used with equal satisfaction. Its construction is simple and thorough, there being practically nothing to get out of order and its easy portability enables it to fill an entirely unoccupied field, all other transformers being too bulky or heavy to be readily carried about, and none screwing directly into the socket. No resistance lamp is used, so that trans illumination is obtainable in absolute darkness. When ordering please state voltage and number of cycles of current on which transformer is to be used.

Price, with lamp cords\$20 00
 Price, with lamp and cautery cords 22 25

F-16. THE ELECTRO SURGICAL INSTRUMENT CO. SOCKET CURRENT CONTROLLER.

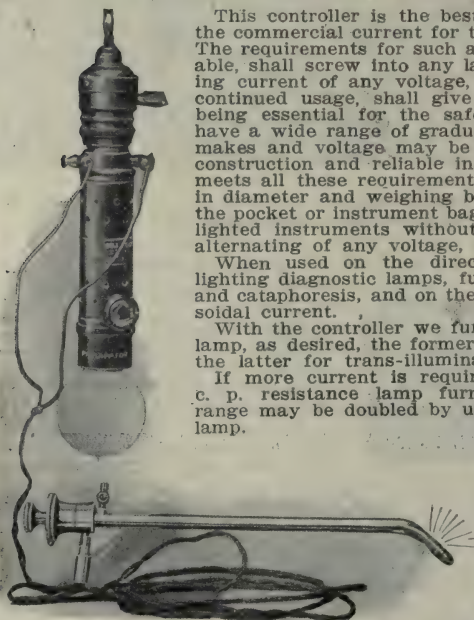

This controller is the best appliance on the market for reducing the commercial current for the purpose of lighting diagnostic lamps. The requirements for such a device are that it shall be easily portable, shall screw into any lamp socket, work on direct or alternating current of any voltage, shall not become excessively hot with continued usage, shall give the finest graduation of current, this being essential for the safe lighting of the smaller lamps, shall have a wide range of graduation so that ordinary lamps of various makes and voltage may be effectively lighted, shall be durable in construction and reliable in action. Our socket current controller meets all these requirements. Being but 6 inches long, $1\frac{1}{2}$ inches in diameter and weighing but 8 ounces it may be easily carried in the pocket or instrument bag, thus permitting the use of electrically lighted instruments without batteries wherever current, direct or alternating of any voltage, is available.

When used on the direct current the controller will, besides lighting diagnostic lamps, furnish a current suitable for electrolysis and cataphoresis, and on the alternating a perfectly graduated sinusoidal current.

With the controller we furnish either a frosted or blue resistance lamp, as desired, the former being preferable for ordinary work and the latter for trans-illumination.

If more current is required than can be obtained with the 16 c. p. resistance lamp furnished (unless otherwise ordered) the range may be doubled by using a 32 c. p. candle power resistance lamp.

The conducting cords attached are fitted with our latest universal spring bayonet connection which locks the diagnostic instrument securely to the cords. When ordering please state whether socket on which controller is to be used is Edison or other style and specify voltage of street current, since the voltage of resistance lamp must correspond with that of the current. Unless otherwise ordered, we furnish a 110-volt, 16 c. p. frosted lamp.

Price, complete with resistance lamp (frosted or blue) and a pair of silk or rubber covered conducting cords\$10 00

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Electric Illuminating Apparatus

F-18. THE ELECTRO SURGICAL INSTRUMENT CO. GENERAL DIAGNOSTIC OUTFIT.

The case for this outfit is strong and durable, being securely dovetailed at the corners, covered and lined with a fine quality of genuine leather, seal grained. It is fitted with heavily nickeled catches, hinges and corners.

The rheostat consists of German silver wire, which is tapped off in eleven sections, giving the operator absolute control of the current. The rheostat board is covered with polished hard rubber.

The four cells (Columbia, No. 6) composing the battery are of the standard size (can be bought anywhere), will last the average practitioner about a year and will give sufficient voltage to operate all of our instruments fitted with four volt lamps.

Conducting Cords.

The conducting cords furnished with this case are six feet long, are rubber covered, permitting easy sterilization, and are fitted with our latest universal spring bayonet connection, which locks the instrument securely to the cords, thus making it impossible for it to become accidentally detached during an operation.

Some of the most generally useful of our diagnostic instruments have been gathered together into the outfit illustrated which comprises:

- 1 Illuminating Battery, style A, with conducting cords.
- 1 Auriscope, style A or B, with three specula.
- 1 Laryngoscope.
- 1 Tongue Depressor.
- 1 General Diagnostic Illuminator.
- 2 Koch Urethroscopes (any size).
- 1 Light Carrier for urethroscopes (interchangeable).
- 1 E. S. I. Co. Rectal Tube (any size).
- 1 Light Carrier for rectal tube.

As shown in the illustration, the instruments are all securely held in heavily nickel-plated clamps, which are screwed to the rheostat board, the whole making a convenient and easily portable outfit.

We furnish this set with any or all of these instruments or with others that may be selected—any instrument may be left out, with corresponding reduction in price, or others, such as a vaginal speculum, or eye spud, may be substituted or added and all may be operated with battery, socket current controller, wall plate or transformer.

Price, complete\$40 00
 Price, complete, but without rectal tube 33 00

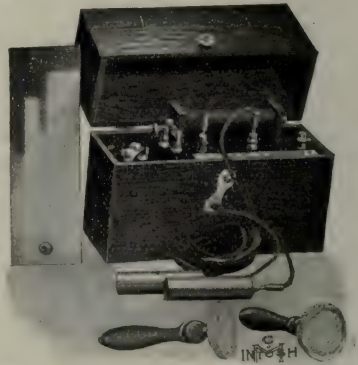

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Electric Batteries

F-170. McINTOSH DOMICILE BATTERY.

A very neat design in a Dry Cell Faradic Battery adapted to home use. Contains a first-class induction coil and is supplied with a large dry cell of standard size. The starting switch is so arranged that it must be turned off before the lid is closed, thus insuring the life of the cell. It is put up in a handsome oak case, dark old English finish. A most reliable, substantial outfit and one that is sure to give satisfaction. Contains the following accessories: 1 pair conducting cords, 1 pair Universal wooden handles with Spongio discs, 1 pair metal handles, 1 nicked foot plate, 1 pamphlet of instructions.

Price \$5 00

F-175. McINTOSH ELECTROLYSIS BATTERY.

This battery contains six No. 4 Columbia dry cells put up in a neat, leather covered, plush lined case containing a compartment for the instruments furnished. The dry cells will last for six or nine months with ordinary use. The following accessories are included: 1 pair conducting cords, 1 hard rubber needle holder, 6 Hayes' bulbous-pointed steel needles, 2 steel broaches, 1 pair forceps, 1 magnifying glass, 1 No. 3 hand Spongio electrode, 1 pair No. 1 handles and Spongio discs, 1 copy Hayes' "Electricity in Facial Blemishes." A most reliable and satisfactory outfit at a minimum of price.

Price\$12 00

F-180. McINTOSH 14 DRY CELL COMBINED GALVANIC AND FARADIC BATTERY.

This outfit contains: 14 No. 4 Columbia dry cells, twelve in the galvanic portion and two connected with the coil. The galvanic cells are controlled by a cell selector switch. The galvanic current is of sufficient strength to treat any case where a mild current is indicated, being ample for the removal of superfluous hair and all facial blemishes such as moles, warts, Naevi, etc.; it can also be used for lighting diagnostic lamps; the Faradic Coil gives a perfectly regulated faradic current of variable intensity. The battery is put up in a handsome, plush lined, leather covered case and contains a compartment for electrodes in the lid.

Price, including connecting cords, Universal handles and Spongio discs\$17 50

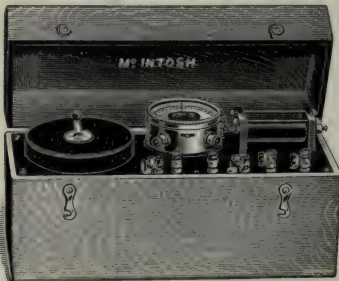

Price, including a complete assortment of accessories for electrolysis and massage 22 50

F-185. McINTOSH "ELABORATE" 27 DRY CELL GALVANIC AND FARADIC BATTERY.

This battery contains 27 No. 4 Columbia dry cells, 25 of which are in the galvanic circuit and 2 in the faradic circuit. The galvanic current is controlled by the MacLagan wire rheostat and is accurately measured by the milliamperemeter. The faradic coil gives primary and secondary currents of great intensity, easily regulated. The battery affords a galvanic current of great adaptability; a primary faradic current; a secondary faradic current; a combined galvanic and faradic current and a current to light diagnostic lamps. The battery is encased in a handsome, dark, weathered oak case, measuring 7x9x17 inches.

Price, including conducting cords, Universal handles and Spongio discs\$35 00

QUALITY GUARANTEED.—Specify section letter and number in ordering.

McIntosh Electric Batteries and Wall Plates

F-190. McINTOSH COMBINED GALVANIC AND FARADIC FLUID BATTERIES.

We illustrate the 12 cell type of our combined galvanic and faradic fluid battery. These batteries are all put up in finely finished, polished black walnut cases. An aluminum electrode box in the lid of the case provides suitable accommodation for the conducting cords, Universal handles and Spongio discs furnished with each outfit.

McIntosh 6 cell combined galvanic and faradic fluid battery	\$18 00
McIntosh 12 cell combined galvanic and faradic fluid battery	24 00
McIntosh 18 cell combined galvanic and faradic fluid battery	30 00
McIntosh 24 cell combined galvanic and faradic fluid battery	36 00

F-195. McINTOSH NO. 66 PRACTITIONER'S FARADIC BATTERY.

A most compact, serviceable faradic battery especially suitable for visiting use, containing two standard size dry cells, put up in a handsome case of selected quartered oak finish, finely polished, measuring 9x6x7½ inches. The induction coil, containing both primary and secondary windings, is finely finished in polished hard rubber and is attached to a handsome enameled slate base. The strength of current can be regulated perfectly by drawing out the shield. In the top of the lid is a compartment containing the following electrodes: 1 pair of conducting cords, 1 pair Universal handles with Spongio discs, 1 pair metal handles and finely nickeled foot plate.

Price, complete\$10 00

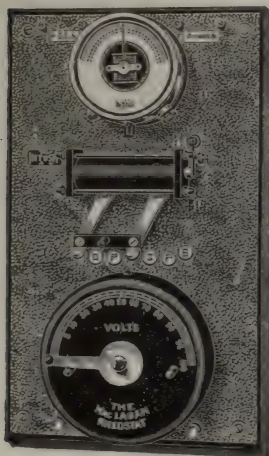

F-200. McINTOSH NO. 7 WALL PLATE.

The special advantage of this plate is its simplicity, all superfluous features having been done away with, including only the fundamental points of a practical and simple apparatus. Instead of having a number of complicated switches to operate there is but one switch—the current selector, which selects either galvanic or faradic current with one motion.

The plate consists of a polished marble base 9½x15 inches, containing MacLagan wire rheostat, which controls both galvanic and faradic currents; a substantial induction coil, offering primary and secondary currents; and our new condensed type shunt meter 0-30, 0-150, measuring the galvanic current.

This plate may be operated with the 110 volt direct current or with a battery of cells; or a rectifier with potential equalizer may be employed satisfactorily with the alternating current.

Price, including conducting cords, Universal handles, sponge discs and series current tap with cord.....\$27 50
 Price, put up in style "H" oak case, with beveled plate glass in door 32 50

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Victor Wall Plates and Cabinets

Victor Cabinet No. 4.

Victor wall plates and cabinets are recognized and recommended by this country's most eminent electro-therapeutists as being perfect in control, easy of manipulation, extremely durable, correctly designed and elegantly finished.

These facts will bear investigation and ought to satisfy the most discriminating purchaser.

We give herewith price of the various combinations with condensed description. For complete information, send for special catalog of Victor wall plates.

There are three styles of Victor plates, Nos. 1, 2 and 3. No. 1 is the \$50.00 plate; No. 2 is the medium priced plate (sometimes known as the "Standard" Victor plate), and No. 3 is the high tension plate, having an extra long secondary winding.

There are three styles of cabinets, viz:

No. 1 is a condensed type of square cabinet and is used for No. 1 plate only.

No. 2 cabinet is the regular square cabinet and can be mounted on either wall or table.

No. 3 cabinet is to be mounted on wall, designed something on the order of the upper illustration.

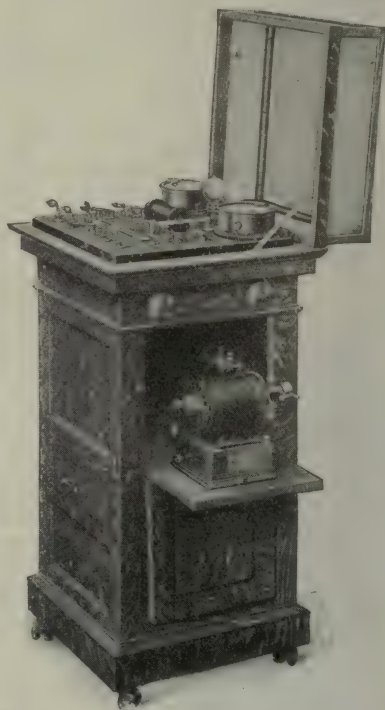

No. 4 cabinet is reproduced in upper illustration.

No. 5 is a floor cabinet and is reproduced in lower illustration.

No. 6 is on the same order, only that provision is made for housing a battery of dry cells, instead of transformer.

The prices are as follows:

*F-201	No. 1, No. 1 plate in No. 1 case...	\$50 00
*F-202	No. 2, No. 2 plate in No. 2 case...	75 00
*F-203	No. 3, No. 2 plate in No. 3 case...	90 00
F-204	No. 4, No. 2 plate in No. 4 case with No. 9 Transformer for cautery and sinusoidal	165 00
F-206	No. 5, No. 2 plate in No. 5 cabinet, with No. 9 Transformer for cautery and sinusoidal.....	180 00
*F-207	No. 6, No. 2 plate in No. 6 cabinet, complete with batteries; plate to be used for batteries.....	135 00
*F-208	No. 7, No. 3 high tension plate in No. 2 case	105 00
*F-209	No. 8, No. 3 plate in No. 3 case...	120 00
*F-211	No. 9, No. 3 plate in No. 4 case...	195 00
*F-212	No. 10, No. 3 plate on No. 5 case...	210 00
*F-213	No. 11, No. 3 plate on No. 6 case...	165 00
*F-214	Oxford wall or table plate (no case)	35 00

Victor Cabinet No. 5.

from San Francisco.

McIntosh Wall Plates and Cabinets

F-220. McINTOSH TYPE 12 PLATE IN STYLE "G" CASE.

The dial current selector, a strong point of this outfit, simplifies the selection of currents, affording choice of eleven modalities with one turn of the knob.

Contains an aseptic porcelain steel plate including MacLagan wire rheostat, McIntosh improved milliamperemeter with shunt, monomotive rheotome, a large faradic coil with primary and secondary windings, transformer for cautery and sinusoidal currents; and may be employed with the 110 volt direct current with a motor generator; or with the alternating current in connection with our rectifier with potential equalizer.

The apparatus offers the following currents: galvanic, diagnostic lamp, fast primary faradic, slow primary faradic, slow secondary faradic, combined galvanic and faradic, low potential sinusoidal, high potential sinusoidal, combined galvanic and sinusoidal, and cautery.

Price, as illustrated	\$80 00
Price, with rectifier and potential equalizer for 100-120 volt alternating current.....	105 00
Price, with motor generator for 110 volt direct current	105 00
Price, including 50 No. 6 dry cells in box with special motor generator	116 00

F-225. McINTOSH NO. 6 PLATE IN STYLE "E" TABLE CABINET.

This is a new departure in electro-therapeutical apparatus, combining the compactness of a wall plate with the convenience of a table plate. The outfit is especially adaptable to the alternating lighting current, and, in conjunction with the alternating current rectifier, which can be accommodated on the shelf beneath the table, it furnishes a wide range of galvanic, faradic and sinusoidal currents—continuous or interrupted. The cabinet work is in the form of a handsome library table of quarter-sawed oak, dark golden finish. A pair of conducting cords and sponge electrodes are included with each outfit.

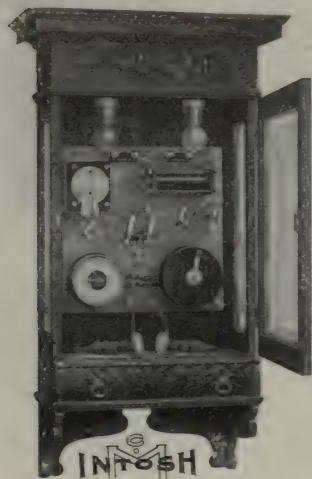

Price, including No. 1 rectifier with potential equalizer for alternating current	\$95 00
Price, wired for 110 volt direct current	70 00

F-230. McINTOSH NO. 6 PLATE IN STYLE "A" WALL CABINET.

Contains an aseptic porcelain plate containing: MacLagan wire rheostat; McIntosh improved milliamperemeter with shunt; automatic rheotome; a large faradic coil with primary and secondary windings and fast and slow vibrators, together with the necessary switches and binding posts for administering the galvanic and faradic currents. A direct lighting or power current of 110, 220 or 500 volts may be employed to energize the apparatus. A battery of 43 wet or dry cells will answer equally well. The alternating lighting current can be employed in connection with a liquid rectifier. The cabinet is constructed of selected quarter-sawed oak in fine, golden finish and contains beveled plate glass in door. A pair of conducting cords and sponge electrodes are included.

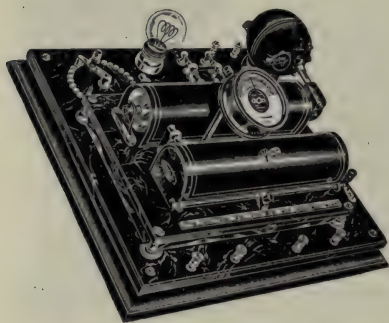

Price, arranged for 110 volt direct current or cells	\$60 00
Price, arranged for 220 volt direct current.....	62 00
Price, arranged for 500 volt direct current.....	65 00
Price, arranged with sinusoidal switch for alternating current	62 50

QUALITY GUARANTEED.—Specify section letter and number in ordering.
Prices listed above are f. o. b. factory and freight will be added when shipped from San Francisco.

Sinusoidal Apparatus

F-232. VICTOR MULTIPLEX SINUSOIDAL APPARATUS.

F-232

This instrument has been designed to meet the requirements of the various authorities on sinusoidal therapy and is being used by them at the present time.

Slow Sinusoidal, Rapid Sinusoidal multiplex (a combination of the afore mentioned currents) **Surging Galvanic** and the **Straight Galvanic** currents are obtainable from this instrument; a dead-beat, hand calibrated, double sealed, shunt milliamperemeter being in the galvanic circuit for measuring the dosage.

The frequency of the sine waves as well as the voltage are under absolute control of the operator with an unusually wide range, it being possible to stimulate the heaviest involuntary muscle at its normal periodicity, as well as the

most delicate nerve, the frequency ranging from six per minute up to and exceeding seventy-five hundred per minute. The voltage is from zero to ninety.

Price as shown, arranged for 110 V. D. C.\$100 00

Additional for rectifier if used on alternating current 15 00

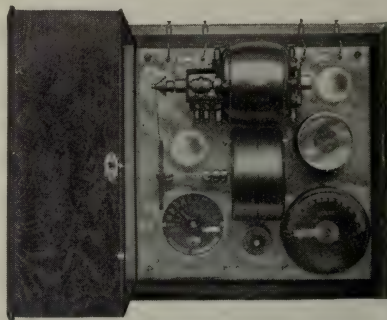

F-234. McINTOSH POLYSINE GENERATOR.

A manifest improvement over all forms of sinusoidal apparatus heretofore offered is presented herewith. It consists of a rotary converter which furnishes both direct and alternating currents, "earth free," suitable for bath treatment if desired. These currents may then be passed through a rotor and converted into various forms of slow sinusoidal, surging galvanic and compound sinusoidal currents varying from one to sixty periods per second.

The apparatus is mounted upon a porcelainized steel plate containing dial current selector, condensed type shunt meter and MacLagan rheostat, in addition to the above, and is put up in a handsome quartered oak case.

The apparatus is primarily intended to be operated with 110 volt direct current; but may be employed with the alternating current by the addition of our No. 1 rectifier with potential equalizer.

The physician who is thinking of placing a sinusoidal apparatus in his office should not fail to investigate the special merits of this apparatus.

F-234

Price complete, as illustrated, for 110 volt direct current\$125 00

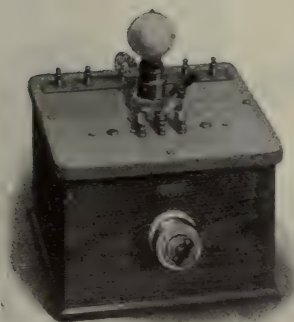

Price, including No. 1 rectifier with potential equalizer for alternating current..... 150 00

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Prices listed above are f. o. b. factory and freight will be added when shipped from San Francisco.

Rectifiers and Generators

F-205. McINTOSH IMPROVED ALTERNATING CURRENT RECTIFIER WITH POTENTIAL EQUALIZER.

We offer this rectifier as the most satisfactory method of converting alternating current into direct current for use with a wall plate. It consists of four jars containing a chemical solution which lasts about a year and can be cheaply replenished.

The current obtained from most rectifiers heretofore offered has been objected to because of its pulsatory sensation. By the addition of the potential equalizer to our rectifier this pulsation has been eliminated so that a smooth, steady current suitable for the most delicate application is obtained.

The rectifier is contained in a neat box with polished marble top with resistance lamp, knife switch, etc.

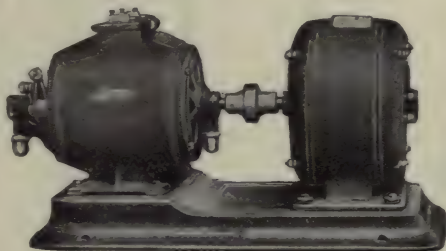

No. 1, for 100-120 volts, complete, price	\$25 00
No. 2, for 100-120 volts, omitting potential equalizer, price	15 00
No. 3, complete for 220 volts, including potential equalizer, price	35 00
No. 4, for 220 volts, omitting potential equalizer, price	25 00

F-236. VICTOR DIRECT CONNECTED GENERATING SET.

There is only one correct and satisfactory method of changing the alternating to direct current for wall plates, etc., and that is by means of a small dynamo driven by a motor, the two machines being directly connected without the use of belts, which by the way is a very inefficient way of generating electrical current.

The Victor set has been in use for many years for this work and we recommend it most highly.

Price of No. 1 outfit, $\frac{1}{2}$ ampere capacity	\$60 00
Price of No. 2 outfit, 1 ampere capacity	90 00

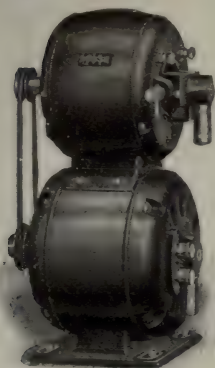

F-210. McINTOSH GENERATING SETS.

Most generating sets heretofore offered the profession for converting alternating current into direct for use with a wall plate have consisted of an alternating current motor and a direct current generator mounted upon an iron base. With this improved form the expense of the base is done away with, the generator being mounted on top of the motor, to which it is belted, thus saving room.

The smaller size is suitable only for operating a wall plate; while the larger types will furnish power for operating a static machine or other apparatus.

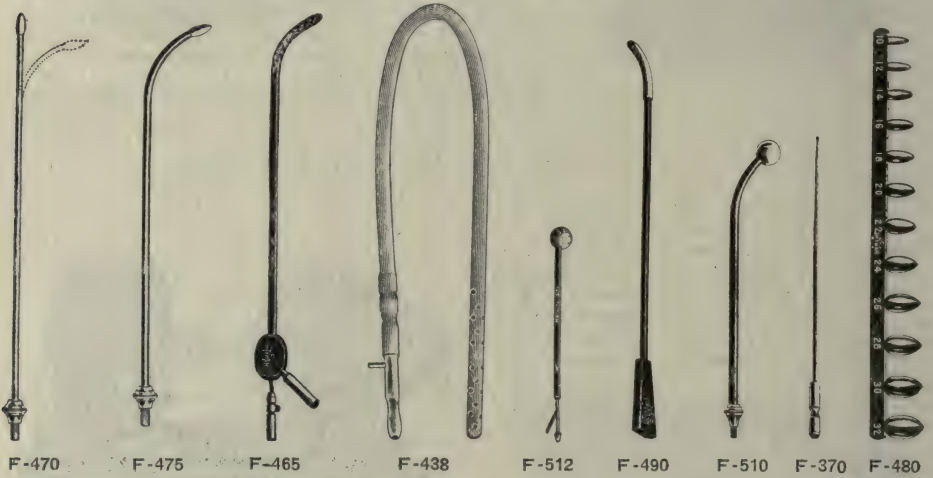

No. 1 furnishes $\frac{1}{2}$ ampere 110 volts D. C.	\$60 00
No. 2 furnishes $\frac{3}{4}$ ampere 110 volts D. C.	75 00
No. 3 furnishes $1\frac{1}{2}$ amperes 110 volts D. C.	100 00

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Transformers

F-238. VICTOR ALTERNATING CAUTERY TRANSFORMER.

This machine is so arranged that the cautery knife can be heated and the diagnostic lamp lighted at the same time, each being controlled independently; this controlling is done by means of switch levers so constructed that perfect and permanent contact is insured.

This transformer has an unusually high efficiency, the current consumption being only a little more than is actually delivered.

Price, for either 52 or 104 volt current\$25 00

F-235. McINTOSH NO. 1 A. C. CAUTERY CONVERTER.

This apparatus possesses many unique features not found in other instruments. It delivers a cautery current of large volume under perfect control, while a finely graduated rheostat provides absolute regulation of diagnostic lamps—entirely independent of the cautery circuit. A special adjustment to suit the voltage of supply current permits of its being instantly adapted to an alternating circuit of either 55, 110 or 220 volts pressure. A convenient cut-off switch permits of the current being turned off immediately when through using. The appliance is finely finished in every respect and makes a handsome addition to the armamentarium of a physician.

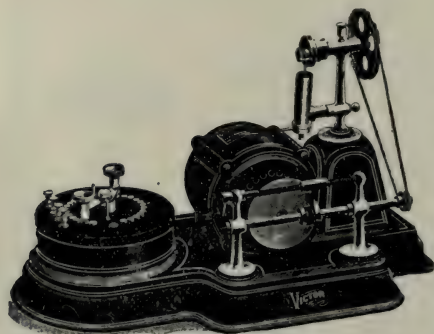

Price, including attachment plug with cord.....\$25 00

F-239. VICTOR NO. 6 TRANSFORMER.

The No. 6 transformer is designed to give precisely the same service when supplied with an alternating current as is obtained from the No. 2 transformer on the direct current, with the exception of the sinusoidal current which in this case is drawn direct from the lighting current. The ear pump, instead of being attached direct to shaft of motor, is belted.

The speed of the motor is controlled by a friction controller instead of electrically. No pains have been spared to bring this instrument up to the usual "Victor" standard of excellence.

Price, complete as shown for 60 cycle alternating current\$100 00
Additional for 125 to 135 cycle 10 00

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Prices listed above are f. o. b. factory and freight will be added when shipped from San Francisco.

Transformers

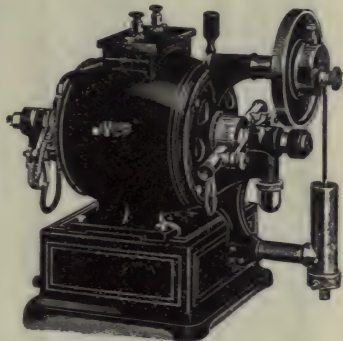

F-241. VICTOR NO. 10 TRANSFORMER.

This outfit is designed for eye, ear, nose and throat specialists or other physicians whose practice calls for the following modalities:

Cautery current with range enough for all cautery electrodes, regardless of size.

Diagnostic lamps of every description, Victor No. 1 or No. 2 massage handles or nasal drills, pneumatic massage or the vacuum bottle treatment.

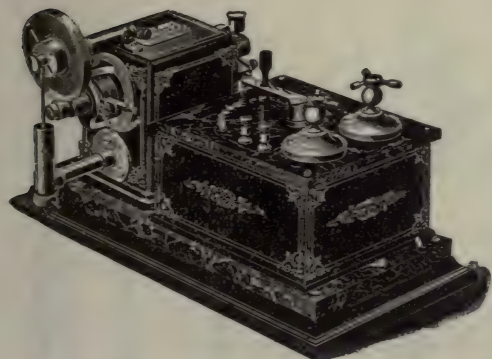

A most useful instrument where direct current is available.

Price, complete as shown arranged for 110 volt direct current\$65 00

Price, complete as shown arranged for 220 volt direct current 68 00

F-242. VICTOR NO. 2 TRANSFORMER.

The currents or modalities available from this outfit are:

Cautery current with range enough to heat the largest cautery electrode.

Diagnostic lamp circuit for all miniature lamps regardless of shape or size.

Motive power for vibratory massage and nasal drilling, facilities being provided for attaching any of the Victor flexible shaft appliances.

Sinusoidal current may also be drawn from this instrument and controlled through any wall plate or similar controller.

Pneumatic massage.—A small specially constructed air pump is detachably connected to one end of the motor. The valves of this pump being so arranged that either compression, suction, suction with release or alternate suction and compression can be obtained at the will of the operator.

The speed of the motor as well as the strength is at all times under perfect control. This machine is operable on direct current only.

Price, complete as shown for 110 or 220 volt direct current\$85 00

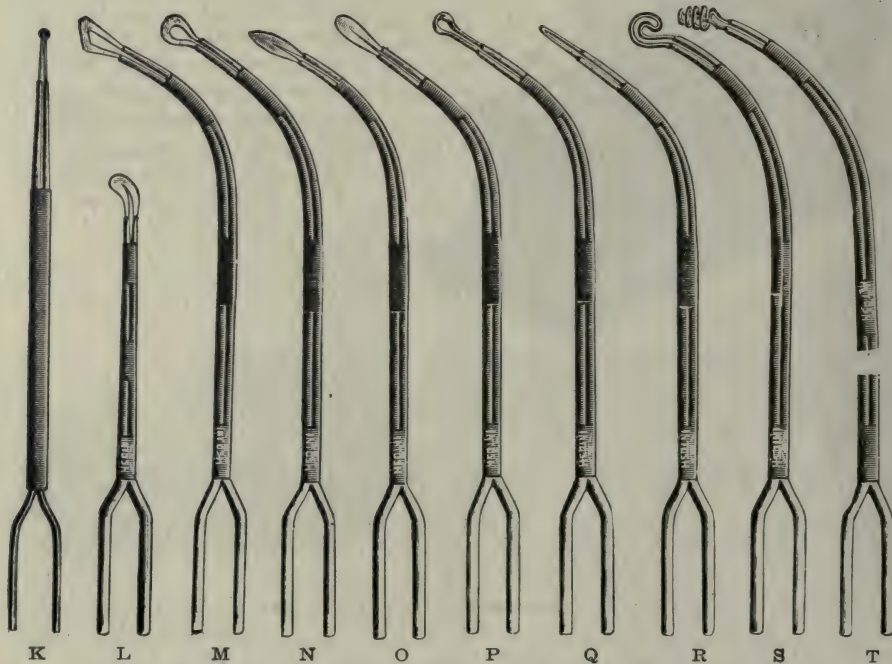

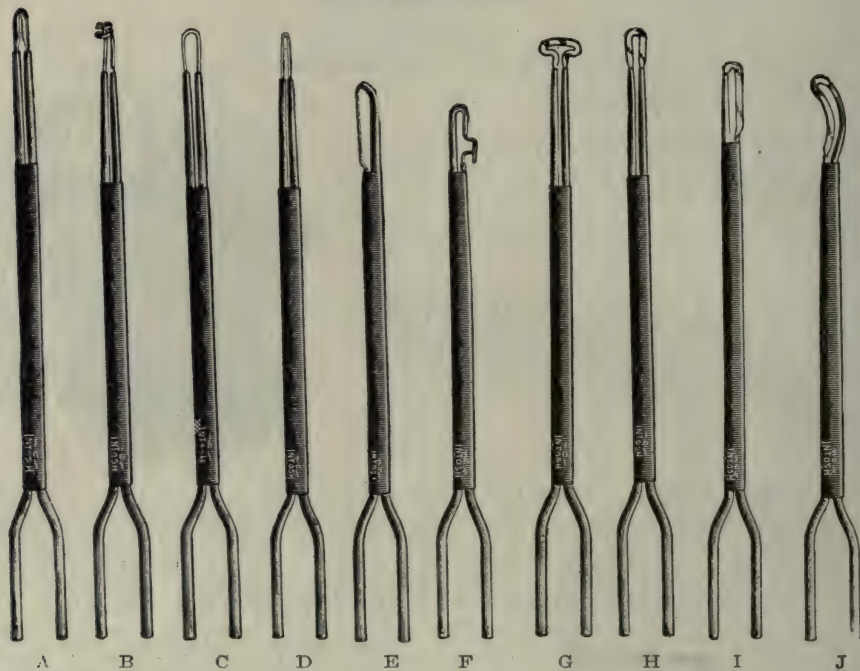

Price, complete as shown for 110 or 220 volt direct current wound for high speed and fitted for No. 2 massage handle but not including handle 90 00

Price of Victor No. 1 massage handle complete with set of six applicators..... 35 00

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Electric Vibrators

F-620. VICTOR NO. 1 VIBRATORY MASSAGE OUTFIT.

This vibrator is designed for and sold to physicians exclusively and is unquestionably the best massage vibrator on the market.

This outfit consists of a Victor massage motor, especially wound for this work, and to the motor is attached the Victor No. 1 massage handle, which delivers three forms of vibratory massage, viz: (1) percussion stroke; (2) frictional or rubbing stroke; (3) synchronous wave—a most important movement in massage.

The strength of stroke as well as the number of vibrations is at all times under perfect control of the operator.

The handle is designed in such a way that it can be used for general massage without any applicators, and for local work the applicators are attached to the handle.

As the applicators are not connected direct to the running apparatus, the speed or strength of stroke is not affected by pressure.

This machine is furnished with or without pedestal as desired.

Price, complete with applicators, arranged for
110 V. D. C.\$70 00

110 V. A. C. 75 00

No. 1 Pedestal (illustrated), extra 20 00

No. 2 Pedestal, extra 10 00

F-615. VICTOR NO. 16 PORTABLE VIBRATOR.

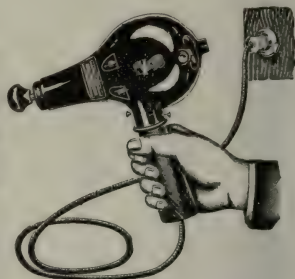

For those physicians who do not care for a flexible shaft vibrator, we offer the Victor No. 16 vibrator as an excellent substitute; it being portable and entirely self contained, permits of bedside treatments, where there are many indications for vibratory massage.

This machine is one of the strongest portable outfits manufactured; ample provision being provided for adjustment by means of a visible scale.

The finish is of the highest order and a plush lined leatherette case complete with a set of applicators is furnished without extra charge.

Price arranged for operation on either direct
or alternating currents \$45 00

Price arranged for operation on both currents.... 50 00

F-622. McINTOSH-CARPENTER VIBRATOR.

Possesses many unique advantages over others. The hand piece does not vibrate the operator, due to a perfectly balanced eccentric and a spring cushioning the return impulse. The length of stroke can be instantly regulated by a trigger. The cabinet is mounted on a ball-bearing, permitting free motion of flexible shaft. Cabinet-work is of quarter-sawed oak in fine, golden finish and is fitted with casters.

Price, for 110 volt direct or 110 volt 60 cycle alternating
current\$75 00

Price, including rectifier for 125-140 cycle alternating cur-
rent\$95 00

Therapeutic Lamps

F-762. VICTOR SUN THERAPEUTIC ARC LAMP.

This lamp places at the command of every physician who has an ordinary electric light service at his disposal, artificial sun light embraced in a thoroughly practical equipment with which he can obtain, if used understandingly, nearly every result to be expected from the most elaborate apparatus designed for the application of light therapeutics.

The "Sun" lamp can be used for practically every therapeutic indication for light and heat.

The outfit is self-contained and comparatively light, and is mounted on easy running casters.

Means are also provided for raising the lamp to any desired height; also to adjust the hood to any angle.

The reflector is made of heavy glass flux which is proof against deterioration, means being provided to adjust the focus to meet the operator's requirements.

A rheostat of approved construction permits the passage of from ten to fourteen amperes across the arc.

Twelve special carbons and two Ray color screens (red and blue) are included with each lamp.

Operable on either direct or alternating current.
Price, complete\$60 00

F-764. VICTOR M. I. P. THERAPEUTIC LAMP.

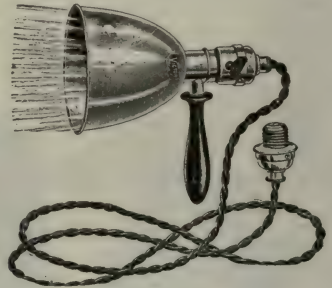

This lamp is the best of this particular type to be had, regardless of price.

The socket and reflector are in one piece and the reflector is 5 1/4 inches in diameter, is triple silver plated, and hand burnished.

The lamp bulb, when used with the reflector, delivers a little over 76 candle power.

The reflector is designed to bring the light rays to a focal point and with this outfit one is able to get very good results.

Price as shown.....\$ 6 50
Screens, each, (red, amber, blue or violet)..... 1 50

F-766. McINTOSH STYLE "I" THERAPEUTIC LAMP CASE.

The Therapeutic Lamp offered consists of a finely polished aluminum reflector containing a 50 c. p. lamp and offering a large volume of heat and light. A set of colored ray screens, ruby and violet, are provided, thus facilitating the use of these forms of light energy. The connections are most substantial, the lamp socket being of porcelain and the cord of the latest re-enforced variety, while the handle is much more durable than ordinarily supplied. With this outfit one can test the value of light as a therapeutic agent very satisfactorily.

Price, Style "I" Lamp Case, as shown.....\$12 00
Price, McIntosh Style "G" Lamp, same as above without case..... 8 00
Price, McIntosh Style "B" Lamp, without screens or case..... 5 00

QUALITY GUARANTEED.—Specify section letter and number in ordering.
Prices listed above are f. o. b. factory and freight will be added when shipped from San Francisco.

Therapeutic Lamps

F-772. THE JUSTRITE THERAPEUTIC LAMP.

Our Therapeutic Lamp produces a strong, concentrated and penetrating light. As a thermo-therapeutic agent The JUSTRITE Lamp has all the advantages of any of the larger and more cumbersome appliances and costs about 1-10 as much. Its therapeutic efficiency has been fully tested and it is giving absolute satisfaction among hundreds of physicians.

The Hood is spun from brass, nickel-plated inside and out, thus preventing it from changing color by continuous use.

It is equipped with nine feet of the best silk covered cord, Weber's sockets and the plug is of the Benjamin type which prevents the cord from twisting when making connection with the socket.

In appearance the Justrite Lamp is similar to other lamps but it is very different in those essential points that distinguish a good therapeutic lamp from a poor one—One that produces the desired physiological changes within the tissues and one that does not.

Lamp without screens.....	each	\$6 00
Screens	each	1 25
Globes, extra	each	1 50
Lamp complete in leather case with three screens.....	each	10 00

F-768 McINTOSH STYLE "B" THERAPEUTIC LAMP. 50 CANDLE POWER.

The illustration shows a very convenient form of portable therapeutic lamp of most simple design but of very substantial construction; by far more durable than the flimsily constructed, low-priced lamps offered on the market.

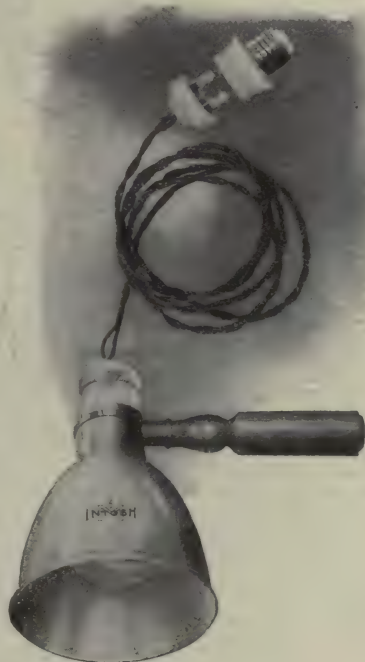

The form of bulb supplied is of the round, 50-candle power, condensed filament style, known as the "Stereopticon type." It throws a strongly concentrated light, rich in both heat and chemical rays.

The socket is of porcelain and is much more substantial than the ordinary brass socket used; not to speak of its greater ability to withstand the heat.

The reflector is of highly polished aluminum; gathering and focusing the rays upon the desired spot and affording the full efficiency of the bulb. Our reflector will hold its lustre long after the cheap nickel plated hoods have become tarnished.

The handle is of hardwood, in neat natural finish, proof against the heat to which it is subjected. An attaching plug with a six-foot length of cord permits of instant connection with any ordinary lamp socket.

Price \$5 00

X Ray Apparatus

F-774. VICTOR WANTZ RADIOGRAPHIC COIL.

The Wantz outfit differs chiefly from the prevailing types of induction coils in the following respects:

The size of the core.

Construction of core (no wire used).

Proportion between primary and secondary windings.

Cross-sectional area of secondary wire.

Insulation (quality and effectiveness).

Improved type of interrupter.

SPARK LENGTH. Although the actual amount of material used in the construction is equivalent to that used in a 30 inch coil, the main terminals are set for twelve inches and the surplus energy is converted into amperage which is the all important factor of radiography.

PRIMARY AMPERAGE. It is possible to pass from three to one hundred amperes into the primary circuit, thus every need of the operator is met in therapy as well as diagnosis. This current is controlled by means of a rheostat on direct current and a choke coil on the alternating current.

VARIABLE INDUCTANCES. Five inductances are provided for. This means that the operator really has five different size coils at his disposal and it is a simple matter to adjust any tube to the outfit. This is an important feature and will be the means of saving many a tube which otherwise would have been ruined.

ON AND OFF SWITCH. This is of the quick break variety and is so designed that the manipulation is done with the hand instead of the arm.

AMMETER. A reliable dead beat ammeter is placed in a convenient position to be easily read and its function is to indicate the inflow of the supply circuit.

TUBE CONNECTIONS. Connection with the tube is made by means of automatic spring reels which keep the cords taut at all times. A reducing device is placed midway between the main terminals for reducing the vacuum of the tube from the switchboard.

CENTRALIZATION OF CONTROL. All switches and adjusting devices are mounted on or adjacent to switchboard and the operator can make every adjustment without changing his position.

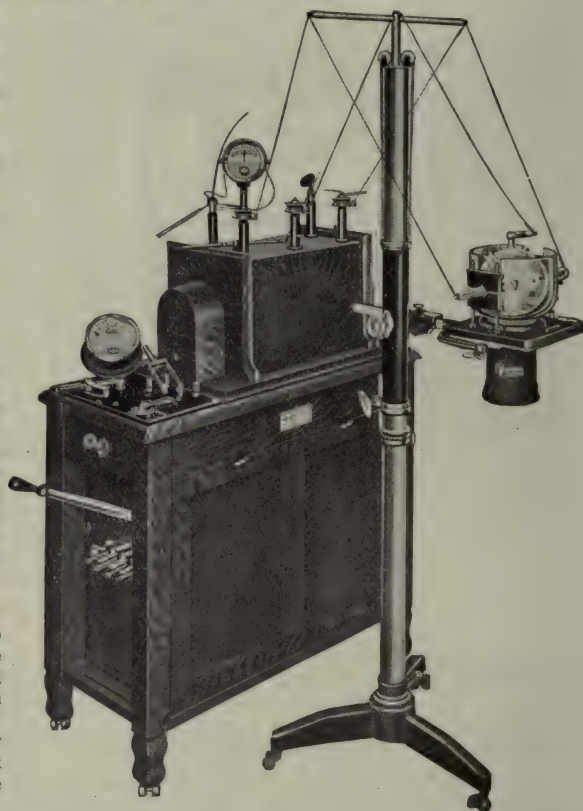

COMPRESSION DIAPHRAGM. The illustration shows the Victor Compression Diaphragm Protection Shield and Tube Stand in operative position. A detailed description of this device as well as the coil and accessories will be sent on application.

We heartily recommend this outfit to the physician or hospital desirous of installing a thoroughly up-to-date, efficient, rapid radiographic apparatus.

Price of coil arranged for either D. C. or A. C.	\$425 00
Price of single point electrolytic interrupter	35 00
Price of three point electrolytic interrupter	60 00
Price of five point electrolytic interrupter	85 00
Price of Ammeter	30 00
Price of Milliamperemeter (for tube circuit)	30 00
Price of Rectifier (for alternating current)	60 00

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Prices listed above are f. o. b. factory and freight will be added when shipped from San Francisco.

X Ray and High Frequency Apparatus

F-776. VICTOR No. 7 HIGH FREQUENCY OUTFIT.

This is a late addition to the Victor line of high frequency apparatus and its function is to displace the resonator which is ordinarily furnished with static machines and induction coils for generating the high frequency currents, using the static machines or induction coil, as the case may be for the primary generator.

This method, at its best, is a very inefficient as well as expensive way of securing results in high frequency therapy and we strongly urge the X-Ray operator who is desirous of using high frequency currents for his therapeutic work to thoroughly investigate the merits of this machine before placing an order for a resonator.

The No. 7 high frequency outfit is connected direct to the lighting circuit and is operated absolutely independent of the coil.

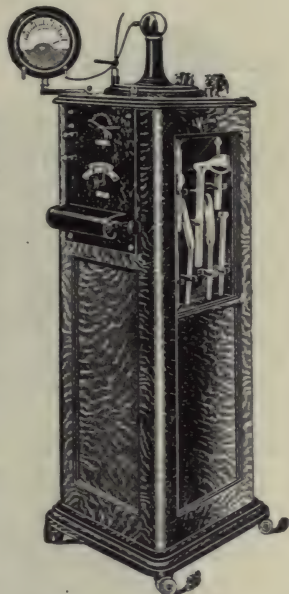

All the high frequency currents are available with wide range, and perfect control permitting the powerful effect in auto-condensation, d'Arsonvalization, etc.

X-Rays suitable for therapeutic work are obtainable, thus increasing the scope of the apparatus.

The purchase price is less than the initial cost of a first class resonator and mercury turbine interrupter which is always used with a resonator.

Price, arranged for alternating current\$165 00

A rotary converter is required on the direct current which we are prepared to furnish.

F-778. VICTOR NO. 4 HIGH FREQUENCY AND X-RAY CABINET OUTFIT.

This apparatus is interrupterless and motorless on the alternating current and interrupterless on the direct current.

It delivers all of the high frequency currents with an unusually wide range and the very best form of control enabling the operator to use any of these currents in every form, ranging from the most delicate vacuum electrode treatment to the most profound effects in auto-conduction, auto-condensation and the bipolar discharge according to Dr. Oudin.

An ultra violet lamp attachment is embodied in the outfit. With this apparatus one is able to do first class X-Ray work ranging from the light therapeutic to comparatively rapid radiographic work.

The No. 4 outfit is easy of manipulation, economical in operation and maintenance and easy on tubes. These points coupled with the fact that no interrupter, rectifier, battery or chemicals are required makes it an ideal X-Ray and high frequency equipment for the general practitioner.

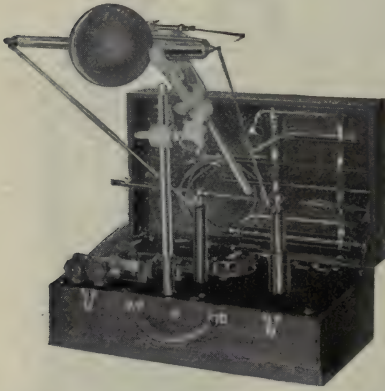

Price arranged for 110 V alternating current\$435 00

Price arranged for 110 V direct current 515 00

QUALITY GUARANTEED.—Specify section letter and number in ordering.
Prices listed above are f. o. b. factory and freight will be added when shipped from San Francisco.

X Ray and High Frequency Apparatus

F-783. VICTOR No. 1 PORTABLE X-RAY AND HIGH FREQUENCY OUTFIT.

This outfit is designed for the general practitioner or surgeon in whose practice there are many indications for either X-ray or high frequency currents or both.

From this apparatus can be obtained all of the following currents or modalities.

Vacuum electrode, static spark, fulguration, high frequency spray or effluve, Oudin, Tesla and d'Arsonval currents, ultra violet rays (from A. C. outfit only) and the auto-condensation and auto-conduction currents sufficient for all ordinary treatments.

The range of the X-rays obtainable from this coil is truly remarkable; it being possible to radiograph any part of the body in a reasonably short time. Owing to the nicety of control the X-ray may be used for treatment purposes as well.

The No. 1 coil is about three times as powerful as a sixteen plate static machine and as they both cover the same field, the advantages are in favor of the coil as it is not subject to atmospheric conditions as is the static machine, neither are any batteries, motors or chemicals required.

This machine is portable, weighing only forty-five pounds, consequently it may be carried to the bedside if necessary and connected to the most convenient electric light socket.

Simplicity, durability and a wide range of usefulness are the cardinal points of this apparatus. All parts are artistically arranged and the finish is of the highest order.

Price, arranged for 110 D. C. complete with set electrodes, handle, cords, etc.....\$160 00

Price, arranged for alternating current, complete with above accessories..... 160 00

Price arranged for both currents..... 185 00

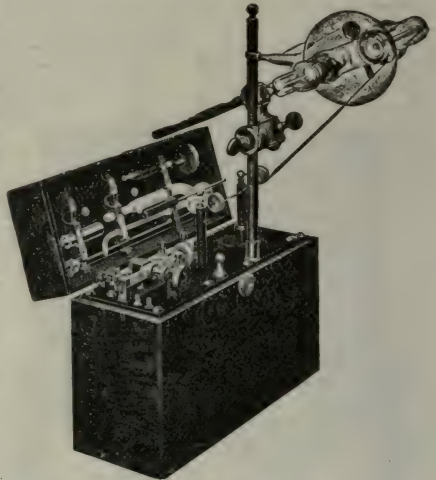

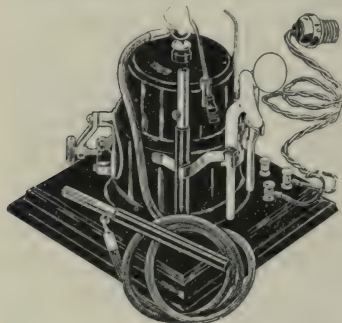

F-784. VICTOR No. 5. PORTABLE X-RAY AND HIGH FREQUENCY OUTFIT.

This outfit is especially designed for eye, ear, nose and throat as well as other specialists who have to deal chiefly with local conditions.

All of the high frequency modalities are available for local application including a limited amount of current for localized auto-condensation and auto-conduction. X-rays are also obtainable sufficient for all therapeutic work as well as for radiography of the extremities.

This coil is operable on either direct or alternating currents, simple and easy of manipulation, finely finished and thoroughly guaranteed for two years.

Price complete with four electrodes, handle and cords, arranged for operation on both direct and alternating currents..\$75 00

F-786. VICTOR GEM HIGH FREQUENCY COIL.

This little outfit is designed for the milder high frequency modalities, such as vacuum electrodes, fulguration, and static spark treatments.

It is particularly recommended to the eye, ear, nose and throat specialist in whose practice there are many indications for high frequency therapy.

The Gem Coil is well made, neatly designed and durable.

Price complete as shown with four vacuum electrodes, handle, cords and protecting case, arranged for operation on both currents....\$25 00

QUALITY GUARANTEED.—Specify section letter and number in ordering.
Prices listed above are f. o. b. factory and freight will be added when shipped from San Francisco.

X-Ray Apparatus

F-788. SCHEIDEL-WESTERN INTERRUPTERLESS COIL.

Above is an illustration of our latest radiographic machine built for the Specialist, constructed under the General Electric patents and along our own original lines.

There is not another type of Interrupterless machine constructed on the plan of this equipment. It is constructed for Instantaneous radiography. Cases are built of solid mahogany and are perfect in construction. It is noiseless, easy to operate and there is nothing to get out of order.

Write us for full technical description of this machine.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Prices listed above are f. o. b. factory and freight will be added when shipped from San Francisco.

X-Ray and High Frequency Apparatus

F-792. SCHEIDEL-WESTERN LATEST COMBINATION RADIOGRAPHIC SPECIAL AND HIGH FREQUENCY OUTFIT.

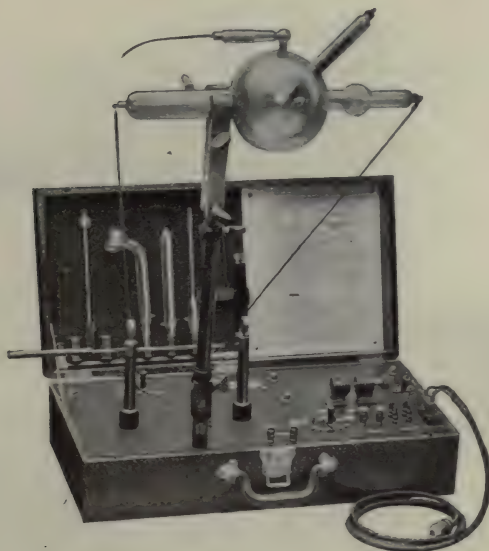

The above cut illustrates the most complete machine of its kind in existence. Gives all classes of high-frequency current, and can be furnished with or without high frequency. It is constructed for accurate, scientific X-ray work.

A radiographic chart is furnished with this machine that explains in a most concise manner to the operator just how long to expose any portion of the body of patients of all weights, to obtain the best radiographic results. Accurate work is thereby assured. This chart is the only one of its kind in existence.

Write for catalog giving full particulars.

QUALITY GUARANTEED.—Specify section letter and number in ordering. Prices listed above are f. o. b. factory and freight will be added when shipped from San Francisco.

X-Ray and High Frequency Apparatus

F-794. SCHEIDEL-WESTERN "RADIOGRAPHIC" SUIT CASE PORTABLE COIL.

Weight as shown, 62 lbs. Shipping weight, 100 lbs.

Price without tube and fluoroscope\$160 00

Above is an illustration of the SCHEIDEL-WESTERN Suit Case apparatus which will give all classes of high-frequency as well as X-ray.

Our "Radiographic" Portable Coil outfit consists of the following:—

Case of highly polished Quarter Sawed Oak; X-ray attachment; High-frequency attachment; Cautery attachment; Diagnostic lamp attachment; D'Arsonval current attachment; Adjustable tube holder; Automatic self-winding Steel Tapes; Terminal Posts; Sliding Rod for Spark Gap; Cautery Handle and Cord; Three Cautery Knives; One Diagnostic Lamp; Three metal tip High-frequency Electrodes; Cord and Plug for attaching to lighting Circuit.

No special wiring is necessary. It will connect into any ordinary lamp socket.

Guaranteed to take picture of a 180-pound patient in a minute and a half.

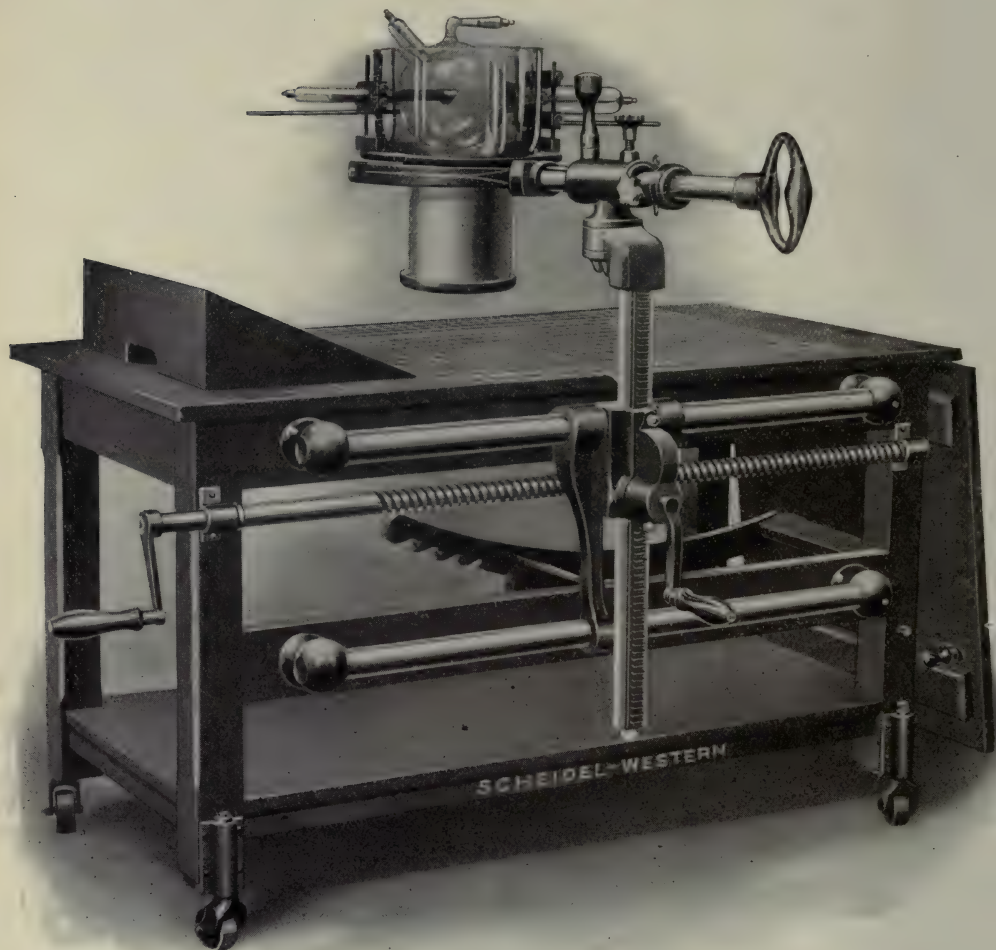

Does cautery work and gives current for D'Arsonvalisation, Diagnostic work and high-frequency.

Workmanship the best. The name SCHEIDEL-WESTERN is a guarantee, this concern being the oldest and largest exclusive manufacturers of X-ray apparatus in the world.

Write for latest catalog and full description of this apparatus.

QUALITY GUARANTEED.—Specify section letter and number in ordering.
Prices listed above are f. o. b. factory and freight will be added when shipped from San Francisco.

X-Ray Accessories

F-798. SCHEIDEL-WESTERN RADIOGRAPHIC TABLE AND COMPRESSION DIAPHRAGM.

Dimensions: 4 ft. 3 in. long, 4 ft. 1 in. high, 3 ft. 1 in. wide.

A FEW USES:—Steady, firm, heavy compressor, absolute protection from the ray, general examination table. Stereoscopic, Radiographic, Fluoroscopic examinations convenient and safe; Therapeutic Ray completely controlled by diaphragms; High-frequency by Auto Condensation with Auto Pad, if desired.

A FEW ADVANTAGES:—Universal bearings, allowing free, smooth movement in all directions; single support for diaphragm allows table to be cleared when placing patient; gears do not have to be locked, they stay in place. Graduated table top and upright, guarantee correct position of plate, patient and tube.

Price, table complete\$150 00
Table complete with auto cushion 175 00

QUALITY GUARANTEED.—Specify section letter and number in ordering.

X-Ray Accessories

F-802. SCHEIDEL-WESTERN PROTECTION SCREEN.

Price, \$30.00.

The Shield Covered With 1-16 in. Pure Lead, and With Imported Lead Glass Window.

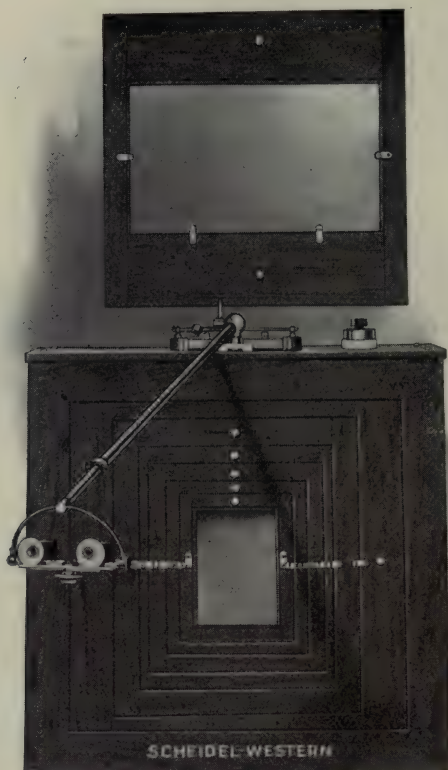

We herewith illustrate the Scheidel-Western Protection Screen. For operators desiring a good shield from the X-ray at a moderate price, this screen is highly recommended. It is covered with one piece of lead through which the rays can not pass and lead glass is provided for observation. The shield is 30 inches wide and 6½ feet high; is mounted on casters so that it may be easily rolled from place to place.

Dimensions: 6 ft. 6 in. high, 2 ft. 6 in. wide.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Prices listed above are f. o. b. factory and freight will be added when shipped from San Francisco.

X-Ray Accessories

F-804. SCHEIDEL-WESTERN LATEST DIAGNOSTIC BOX.

Dimensions: 2 ft. long, 2 ft. 2½ in. high, 1 ft. wide.

We illustrate the latest Scheidel-Western Diagnostic or Illuminating Box with stereoscope attached. It gives the best view of an X-ray negative in a uniform, white, adjustable light.

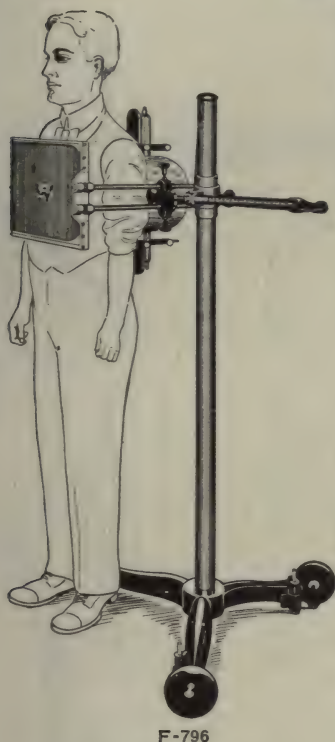

It incorporates not only the variable light features, but attached to it is an adjustable stereoscope for viewing stereoscopic negatives; a separate frame for holding two 8x10 negatives is also provided. This feature is a decided departure and for simplicity and economy of space has not been equaled.

The box is white on the inside and the lamps are so arranged that only reflected light passes through the negative. The box with lamps is wired on slate and porcelain to conform with national code regulations.

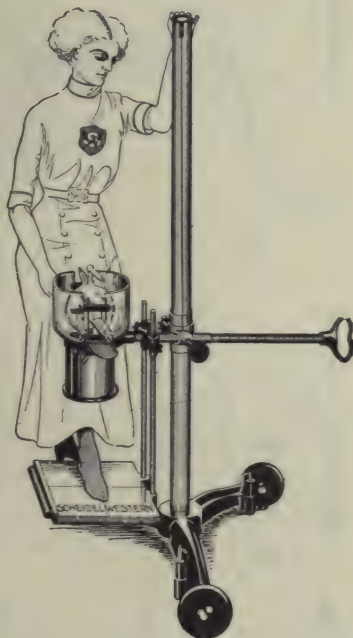

Box only	\$25 00
Box with stereoscope attached	50 00
Stereoscope only, without bracket.....	20 00

QUALITY GUARANTEED.—Specify section letter and number in ordering.
Prices listed above are f.o. b. factory and freight will be added when shipped from San Francisco.

X-Ray Tube Stands

F-796

F-796

**F-796. THE "SCHEIDEL WESTERN" LATEST PROTECTION
TUBE STAND.**

This stand represents the best that can be produced in a medium priced stand and is the best substitute for a compression table where the operator's work does not justify the extra expense.

Advantages.

- (1) It affords absolute protection to operator from Ray.
- (2) One-half inch GLASS protection shield around tube.
- (3) Gives compression, the Brass cylinder cuts out secondary ray, etc. For the physician using X-Ray, this is one of the "Rarest of Bargains" ever offered.

Price, complete as illustratednet \$50 00

A detachable plate holder is furnished with this stand if so desired and provides for making stereoscopic pictures. This plate holder is independent in movement from the tube, which is an absolute necessity in doing stereoscopic work. This stand is counter-weighted, making it possible to raise or lower the head without physical exertion.

Price of Plate Holder, extra\$25 00

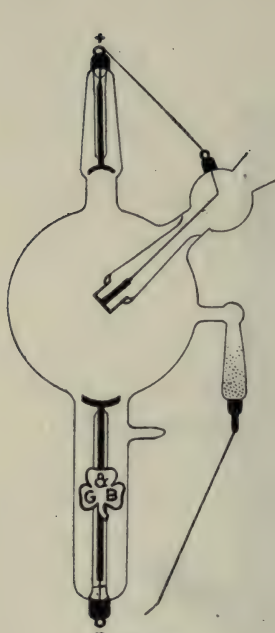

*F-797. THE "SCHEIDEL WESTERN" PLAIN TUBE STAND.

This is a plain stand, well constructed, and is the best of the cheaper type of stands. It is perfectly rigid, has a heavy base and will hold a heavy tube shield without vibration or danger of tipping.

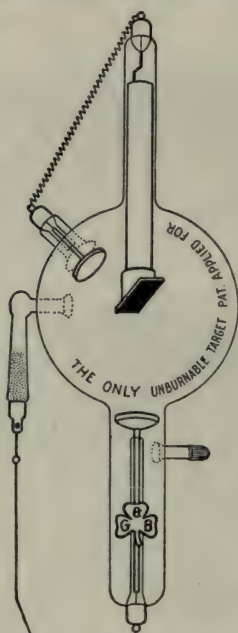

Price, completenet \$12 00

X-Ray Tubes

F-812. GREEN & BAUER'S "CLOVER LEAF" STANDARD TUBE NO. 24.
This tube is fitted with automatic regulation device, and is guaranteed to stand a heavy discharge without dropping in vacuum.
Price, 6 inch, net, \$20.00; 7 inch, net, \$25.00; 8 inch, net \$30 00

F-814. GREEN & BAUER'S "CLOVER LEAF" TUBE NO. 26.
This tube is especially adapted for coils of Heaviest Discharge, is fitted with a heavy iridium button on the face of the target, and will undoubtedly stand a tremendous current discharge without dropping in vacuum.
Price, 6 inch, net, \$30.00; 7 inch, net, \$35.00; 8 inch, net \$40 00

F-816. GREEN & BAUER'S "CLOVER LEAF" TUBE NO. 27.
This tube is adapted for heavy radiographic work and will be found very durable. It is fitted with the old style type of cathode, but may be supplied with the hollow Rex cathode, if so ordered. It is fitted to fill the requirements of physicians.
Price, 6 inch, net, \$20.00; 7 inch, net, \$25.00; 8 inch, net \$30 00

F-818. GREEN & BAUER'S "CLOVER LEAF" TUBE NO. 90.
This is the water cooled type of tube, and must never be used without water. It is superior in construction and is especially adapted to make a number of heavy exposures in quick succession, for treatment on heavy apparatus and for protracted fluoroscopic work.
Price, 6 inch, net, \$32.00; 7 inch, net, \$37.00; 8 inch, net \$42 00

F-822. GREEN & BAUER'S "CLOVER LEAF" TUBE NO. 80.
A heavy anode high frequency tube of superior construction and by far the best type of this class of tube on the market.
Price, 5½ inch, net, \$18.00; 6 inch, net \$20 00

F-824. GREEN & BAUER'S "CLOVER LEAF" TUBE NO. 81.
A light anode high frequency tube of the same style as the No. 80, but for lighter high frequency apparatus.
Price \$18 00

A Word With You

In presenting this portion of our catalogue to our patrons, we find it impossible to illustrate all of the many forms of braces that we manufacture; we are, therefore, obliged to confine ourselves to those patterns most in use, assuring you that we are in a position to manufacture special apparatus of every description, and where patients are sent to us, to take full charge of them until accurately fitted.

SPECIAL INSTRUCTIONS.

1st. We would call attention to the necessity of accuracy in measurements and explicit instructions for the making of each apparatus. We guarantee every appliance sent out by us to correspond exactly with directions and measurements furnished us, and any omissions or errors on our part will be corrected without extra cost to the patient. As this class of apparatus is only manufactured to order, physicians will see the necessity of requiring their patients to pay a portion of the amount when the order is taken, and the balance on the delivery of the brace.

Experience has shown us that appliances of this character are more or less uncomfortable when first worn, and that patients are at that time easily discouraged or dissatisfied with trivial matters; while we will make such changes as are necessary without charge (where the fault is ours), we must ask physicians to protect themselves and us to the fullest extent.

Many physicians of long experience in handling this class of cases collect at least one-third in advance, remit the same to us and direct us to forward the apparatus, as soon as finished, direct to the patient, collecting the balance C. O. D., thus relieving them of all financial responsibility. We suggest this plan because of the numerous requests made by physicians for an extended credit on appliances of this kind, they claiming that they could not afford to pay us cash for them and wait the will and pleasure of their patrons.

Where shoes are to be worn with braces, we urgently request customers to furnish them (sending them to us by registered mail, carefully addressed), for we find it next to impossible to secure well-fitting shoes from measurements furnished us, and quite frequently we are compelled to pay a price far in advance of what patients can obtain them for at home. Where we furnish shoes they are not returnable, as we take no responsibility as to their fitting the patient.

H-5 APPARATUS FOR OVER-RIDING OR HAMMER TOES. Price, each, from \$5.00 to\$15 00

The apparatus consists of a steel sole arranged with a slit or slits corresponding to the space between the toes. A strap passes through these slits over the contracted toe and is buckled, or tied under the sole, tense enough to straighten the toe. It is kept in place by an elastic band. Measurements required: 1. Tracing of foot. 2. Circumference of ball of foot. 3. Circumference of instep (B).

H-10 APPARATUS FOR BUNIONS, SESEMAN'S IMPROVED FORM. Price, each, \$8 00

This apparatus acts as a lever to draw the great toe into normal position, the fulcrum being not the bunion itself, but a point just back of the great toe joint. The illustration shows the mechanism very clearly. In ordering send careful tracing of foot.

H-15 APPARATUS FOR BUNIONS, LONDON'S IMPROVED. Price, each,\$2 50

In ordering mention size of shoe, state whether brace is for right or left foot, and send outline drawing of the naked foot. Also measure the circumference of the great toe, also measure waist of foot.

H-20 ANKLE BRACE, PUGSLEY'S. Price, each, from .35 to\$1 25

H-21 ANKLE BRACE, PUGSLEY'S. Lined. Price, each, from .50 to\$2 00

These supporters are made of thin stiffened sole leather, conforming anatomically to the shape of the ankle, and are to be worn inside the shoe.

H-22 ANKLE BRACE OR SUPPORT, COLLIS. Black saten, men's sizes 6 to 12, Women's sizes, 3 to 8,each 75

H-23 ANKLE BRACE OR SUPPORT, COLLIS. Black leather, men's sizes, 6 to 12, women's sizes, 3 to 8,each \$1 00

H-30 ARCH INSTEP SUPPORT, LONDON'S IMPROVED. Full length, per pair 2 50

***H-31 ARCH INSTEP SUPPORT, LONDON'S IMPROVED.** Half length, per pair 2 00

H-30 and H-31 are made in men's sizes, 5 to 11; women's, 1 to 7; boys, 1 to 4; children's, 4 to 13.

London's Arch Support consists of a tempered steel arched spring, covered with chamois, worn in the shoes and supports the bones of the arch.

H-35 ARCH INSTEP SUPPORT, LONDON'S PLANTAR SPRING, German silver, men's, 5 to 11; women's 1 to 7, per pair\$ 2 50

H-37 ARCH INSTEP SUPPORT, LONDON'S SILVERITE, made of tempered steel, similar to the Plantar, but without the slots in the side, men's, 5 to 11; women's, 1 to 7, per pair\$ 2 50

H-40 ARCH INSTEP SUPPORT, LONDON'S SPECIAL Flat Steel Support, men's, 5 to 11; women, 1 to 7; per pair\$ 2 50

H-45 ARCH INSTEP SUPPORT, WHITMAN'S. Price, each, \$3.00 to\$4 00

This support is designed to meet special cases of flat foot where the regular stock style of supports will not correct the deformity. They are made of steel or German silver, fitted to a plaster cast of the foot, which must be sent with order if a satisfactory result is to be obtained.

H-50 EXTENSION SHOE, with cork or willow wood sole. Price, each, \$8.00 to..\$14 00

H-55 EXTENSION SHOE, with continuous steel extension frame. \$7.00 to.....\$ 9 00

DIRECTIONS FOR MEASUREMENTS.

Have patient stand erect with both feet bare. Place two piles of blocks or books, one under the heel, and the other under the ball of the foot, building them up until the weight of the patient is evenly distributed, and the pelvis and shoulders are on a horizontal plane. Measure these two piles and forward result to us. Send a well fitting shoe.

H-60 EXTENSION SHOE, IMPROVED. Price, from \$25.00 to.....\$35 00

This apparatus consists essentially of an inclined sole placed on the inside of the shoe. It is fitted either directly to the inside sole of the shoe, with the uppers enlarged to accommodate the heel, or forms part of an inner shoe or sandal which laces to the foot and fits into an outer shoe the size of the one worn on the sound limb. With either style the dress or trousers cover the projection of the heel, so that no deformity is noticeable.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Orthopedic Apparatus

APPARATUS FOR TALIPES CALCANEUS AND EQUINUS.

H-70 APPARATUS FOR TALIPES CALCANEUS. Price, each, \$10.00 to.....\$12 00

Shoes are charged extra if we furnish them.

This instrument consists of a pair of steel stems fastened to a shoe, provided with joints at the ankle and secured to the leg with a calf-band. A strong elastic cord, or webbing, is fastened posteriorly to the calf-band above, and a spur-like piece of steel at the heel of the shoe below. By drawing this cord tight, the uplifted sole is faced downward, and the strain on the tendo-Achillis is diminished; at the same time the contracted muscles in front of the leg are extended.

H-75 IMPROVED APPARATUS FOR TALIPES CALCANEUS. Price, each, \$10.00 to\$12 00

Shoes are charged extra if we furnish them.

Shows the same apparatus, with this difference: instead of the cord, or elastic webbing, contracting posteriorly as in H-70, we have a steel spiral spring, placed on a pivot and playing between brackets of the leg and ankle stem, to depress the front part of the foot by extension. There is not so much danger of falling with this apparatus when descending stairs, the spurs shown in H-70 being dispensed with.

H-80 IMPROVED TALIPES EQUINUS APPARATUS. Price, each, \$10.00 to....\$15 00

Shoes are charged extra if we furnish them.

The improvement consists in the attachment of the artificial muscles to steel brackets, fastened to the lower part of the steel rods below the ankle-joint, in which position they work more effectively and are not so liable to catch anywhere or trip the patient as they are when fastened to the front part of the shoe. Perforated leather straps are attached to their upper ends. These fasten to metal buttons on the side bars. By buttoning the straps higher or lower the amount of tension required to overcome the deformity can be regulated.

H-85 HUDSON'S TALIPES EQUINUS APPARATUS. Price, each, \$12.00 to.....\$18 00

Shoes are charged extra if we furnish them.

This apparatus consists of two steel bars, one on the inner and one on the outer side of the leg, jointed at the ankle and fastened to a foot-piece, securely riveted to the sole of the shoe. The upper ends of the bar are fastened to a padded collar, encircling the leg below the knee.

The artificial muscles shown in the illustration are constructed of strong elastic webbing, secured at their lower ends to pieces of catgut which in turn are securely fastened to the lower ends and play in the grooves of semi-circular guides attached to the foot-piece. In this position they are not so liable to catch anywhere or trip the wearer, as they would if fastened to the front of the shoe.

The upper ends of the elastic webbings have strips of perforated leather attached, which fasten on metal buttons placed on each side of the leg-band, so that the tension can be regulated by buttoning the straps higher or lower, thus bringing the foot to its normal position.

MEASUREMENTS REQUIRED.

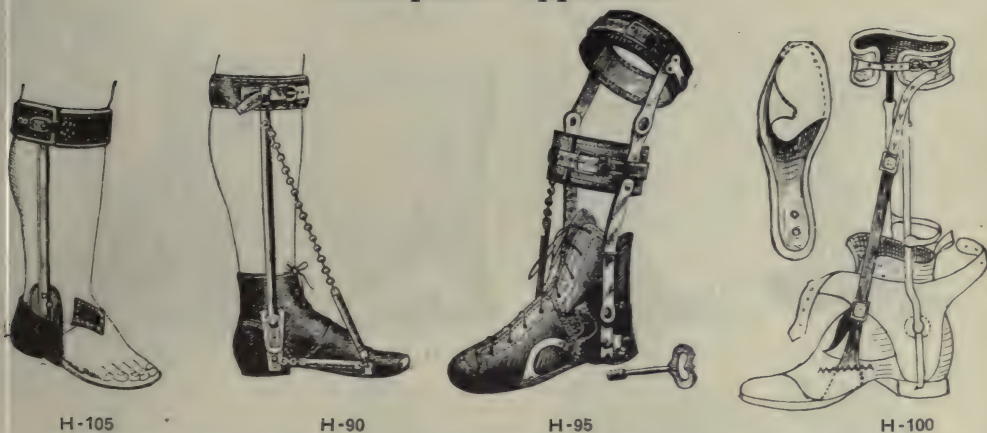

- | | |
|------------------------|---|
| 1. Patient's name. | 5. Length from sole to ankle joint, inches. |
| 2. Patient's weight. | 6. Length from sole to calf, inches. |
| 3. Patient's age. | 7. Circumference of calf, inches. |
| 4. Right or left foot? | 8. Style of apparatus. |

MEASURE FOR SHOES.

- | | |
|--|---------------------------------------|
| a. Length of sole of foot, inches. | c. Circumference of instep, inches. |
| b. Circumference ball of foot, inches. | d. Circumference above ankle, inches. |

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Orthopedic Apparatus

H-105

H-90

H-95

H-100

H-90 IMPROVED APPARATUS FOR VARUS OR VALGUS. Price, each, \$10.00 to \$15 00

A strong leather shoe with a metal sole jointed near the heel, allows lateral motion. A spiral spring draws the foot outward by a constant, elastic traction. This pressure is increased or decreased at will by fastening the spring in a series of sockets. The single outside upright steel bar, jointed at the ankle, is fastened around the limb below the knee-joint, and is so constructed that the screw at the ankle-joint forces the foot flat upon the floor. A spiral spring attached to the leg-band from a point near the toes upon the outside of the foot, elevates the toes and stretches the tendo-Achilles, thus drawing the foot to its natural position.

The shoe is well-padded, and the contraction of the leather above the heel prevents the shoe from slipping off. The straps around the instep depress any undue prominence of the arch of the foot, and within the shoe a broad and well-padded tongue keeps the toes flat upon the sole of the shoe.

We make a similar apparatus for talipes valgus, in which the same mechanism described above, but with reversed action, is applied.

H-95 GROSS' IMPROVED APPARATUS FOR VARUS OR VALGUS. Price, each, \$15.00 to\$22 50

This apparatus is intended for the treatment and correction of Talipes varus, valgus and equinus. The lower portion consists of a light steel frame to which the leather parts of the shoe are attached. The front part of the shoe is jointed to the heel part under the medio-tarsal joint. By this means it can first be turned to receive the foot in its abnormal position and then by the adjustment of a screw which is controlled by a key, be turned back again, thereby gradually bringing the foot back to its normal position. In cases of equinus the shortening of the tendo-Achilles is overcome by a spiral spring or artificial muscle attached above and below the ankle-joint. The upper portion of the apparatus consists of two lateral steel bars held in position by calf and thigh bands. The bars are made to lengthen between the ankle and knee-joint, so that they can be adjusted, from time to time, to correspond with the growth of the limb. If the muscular power of the knee is not defective, the parts of the brace above the knee may be dispensed with.

H-100 WIENER'S IMPROVED BRACE, FOR CLUB FOOT. Price, each, \$15.00 to \$18 00

The most practical apparatus for the treatment of varus or valgus. The special feature of the brace is one that has been found very effective. It is the inner sole A, made of German silver, covered with leather, and fastened to the inner edge of the shoe. A strap, passing through a slit in the shoe, fastened to the outer edge, and terminating in an elastic muscle is attached to the side bar of the brace to a button just below the padded calf band. When this strap is drawn tight, it lifts up the inner sole, and turns the foot inward and upward, thereby producing a great correcting influence. A cast of the foot in a corrected position should be sent with a pair of full sized, strong, laced shoes.

H-105 WYETH'S CLUB FOOT SHOE. Price, each.....\$10 00**MEASUREMENTS REQUIRED.**

1. Patient's name and sex.
2. Right, left, or both feet.
3. Length from floor to ankle joint.
4. Length from floor to calf.
5. Circumference of ankle joint.
6. Circumference of calf.
7. Send outline drawing showing shape of foot or feet.
8. Any additional information
9. Length from floor to knee joint.
10. Length from floor to lower third of thigh.
11. Circumference at knee joint.
12. Circumference of lower third of thigh.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Orthopedic Apparatus

H-110

H-115

H-125

H-120

H-110 DETMOLD'S ANKLE BRACE. Price each, \$7.50 to.....\$10 00

This brace is for weak ankle and after-treatment of club foot. It consists of a well-tempered steel spring, forged at one end into a wide flange, by which it is riveted to the sole of the shoe. By a well-padded band, secured to its top, it is fastened with a strap and buckle to the leg below the knee. It has no joint at the ankle. The tendency of the spring being forward and outward, it will, when brought to the leg by securing its padded band at the garter, lift the toes and avert the foot so as to bring the sole of the latter to the floor. The lace shoe, an ordinary one as usually found, freely made, is narrowed across the instep by the removal of a wedge-shaped piece from its upper; the eyelets being replaced, this enables the tighter lacing of the shoe at the instep, firmly securing the heel of the foot to its place in the shoe.

H-115 WEAK ANKLE BRACE. Price each, \$7.50 to.....\$10 00

Consists of a well fitting laced shoe, two steel uprights with joint at ankle, a stirrup passing under instep and attached to shoe, a well padded calf band, and a pad on inner or outer side as the case might indicate.

H-120 WEAK ANKLE BRACE. Price each, \$9.00 to.....\$12 00

Same general construction as H-115, with the addition of an elastic muscle, for elevating the toes, when a contracted tendo-Achillis is indicated.

H-125 WEAK ANKLE BRACE. Price each, 7.50 to.....\$10 00

Same general construction as H-115, with broad strap at ankle in place of pad.

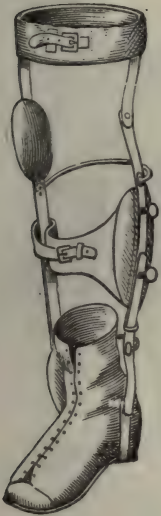

MEASUREMENTS REQUIRED.

1. Patient's name.
2. Patient's weight.
3. Patient's age.
4. Right or left foot.
5. Length from sole to ankle-joint.
6. Length from sole to calf.
7. Circumference of calf.
8. Does ankle incline in or out?

NOTE.—Strong lace shoes should be sent us. If we furnish shoes, they will be charged extra.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

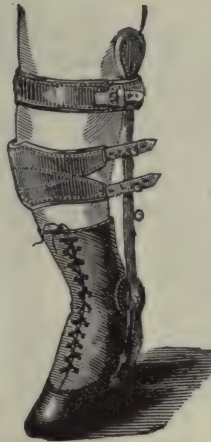

Orthopedic Apparatus

H-135

H-130

H-140

H-145

H-130 THOMAS' BOW-LEG BRACE. Price, \$6.00 to..... \$8 00

The brace is made of soft iron, and the main side-bar extends from the upper margin of the tibia to the sole of the foot. At the upper end is attached a band which passes about two-thirds around the leg. The lower end is forged round, bent at a right angle, and plugs into a hole in the side of the heel of the shoe. The corrective force is exerted by means of a broad strap as shown in the illustration.

The measurements required are: The distance from the upper margin of the tibia to the sole, and the circumference of the limb at the upper point indicated.

H-135 GROSS' BOW-LEG BRACE. Price, each, from \$13.50 to \$15.00; per pair, from \$25.00 to.....\$30 00

This apparatus has two steel bars jointed at the ankle and knee and extending from the sole of the shoe to a padded metal band encircling the thigh. Passing through the outer bar are two thumb screws to the inner extremity of which a pad adapted to the curvature of the leg, is attached. By turning the thumb screws pressure is brought to bear on the limb sufficient to gradually correct the deformity, the pads being screwed down from time to time to conform with the altered shape of the leg. Pads at the ankle and knee, on the opposite bar, provide counter pressure.

H-140 SINGLE BAR APPARATUS FOR BOW-LEG. Price, each, from \$9.00 to \$11.00; per pair, from \$17.00 to.....\$21 00

This apparatus has only one supporting bar, jointed at the ankle, and with pads at the knee and ankle-joints. The bar is fastened on the shoe and placed on the inner side of the leg, where it is secured by a well-padded band passing around the limb below the knee. A wide bifurcated band passes around the curved part of the leg and is fastened by straps attached to both ends of the band, to buttons placed on the steel bar for this purpose.

H-145 DOUBLE BAR APPARATUS FOR BOW-LEG. Price, each, from \$12.00 to \$15.00; per pair, from \$22.00 to.....\$25 00

An apparatus for the correction of bow-leg should not only act upon the curved parts, but should support the limb as well. These requirements are filled by the apparatus shown. The limb is supported by two steel bars, one on the outer and one on the inner side of the leg, fastened below to the shoe and above to a band surrounding the thigh. These bars are jointed at the ankle and knee to allow perfect freedom of motion. They are kept in place by the thigh-band, and also by a band below the knee.

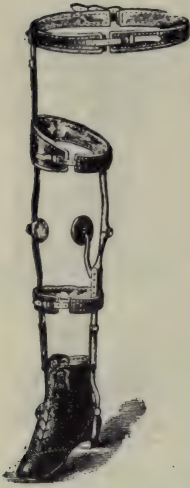

The deformity is corrected by pads placed respectively against the ankle and knee on the concave side of the limb, and a wide leather band passed around the highest point of the arc, inside of the outer stem and buttoned to the heel bar on the concave side. This band is tightened, from time to time, as the limb is gradually brought into the normal line.

MEASUREMENTS REQUIRED.

1. Patient's name, sex, age, weight.
2. If wanted for right, left, or both legs.
3. Length from sole of foot to ankle joint, inner side.
4. Length from sole of foot to knee joint, inner side.
5. Length from sole of foot to knee joint, outer side.
6. Length from sole of foot to lower third of thigh, inner side.
7. Length from sole of foot to most prominent part of arc.
8. Circumference at ankle joint.
9. Circumference at calf.
10. Circumference at knee joint.
11. Circumference at lower third of thigh.
12. Send well fitting pair of strong, laced shoes.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Orthopedic Apparatus

H-160

H-150

H-155

H-150 PLAIN APPARATUS FOR KNOCK KNEE. Price, each, from \$12.00 to...\$15 00

The one represented is the simplest and most convenient in slight cases for the patient to wear, while its efficacy is none the less. It consists of a plain shoe, to which two lateral steel bars, reaching to the upper third of the thigh, are attached, and connected with calf and thigh bands; it is provided with joints corresponding with the natural articulations, to allow locomotion. The knee is confined in its normal condition by a well-padded pad.

H-155 KNOCK KNEE APPARATUS. Price per pair, \$30.00 to.....\$40 00

It consists (if the deformity be double) of two lateral stems, with joints at the ankles, knees and hips, extending from the heels of strong shoes to a well-padded pelvic band. The pelvic band is made in two halves in order to admit of adjustment—the tightening of the posterior buckle everting the toes, that of the front buckle inverting them. Two well-padded leather caps placed on the inside of the knee joints are buttoned to the steel bars on the outside. Tension can be exerted as required. Well-padded steel bands encircle the leg above and below the knee pads, holding the brace in proper position.

H-160 WILCOX'S KNOCK KNEE APPARATUS. Price, single, \$25.00 to \$35.00.
Price, per pair, \$40.00 to\$50 00

The method of applying pressure to the knee is the peculiar feature of this brace. This is accomplished by means of a concave pad, placed opposite the inner side of the joint and attached to the inner bar by means of a very stiff steel spring. The pad and spring are connected by a ball and socket joint so that the pad always accommodates itself to the knee. The spring is attached to the inner bar of the brace, working in a slot, so that the pad can be adjusted to either lie close up against the bar or else projecting some distance from it, as more or less pressure is desired. This is regulated by means of a small screw which, being passed through the bar and spring at a higher or lower hole, increases or decreases the angle of the spring with the bar.

MEASUREMENTS REQUIRED.

1. Patient's name and age.
2. Length from sole of foot to ankle joint, inches.
3. Length from sole of foot to knee joint, inches.
4. Length from sole of foot to hip joint, inches.
5. Length from sole of foot to iliac crests, inches.
6. Circumference of ankle joint, inches.
7. Circumference of calf, inches.
8. Circumference of knee joint, inches.
9. Circumference of middle of thigh, inches.
10. Circumference of body 2 inches below crest of ilium, inches.
11. Right, left, or both legs.
12. Send tracing of leg or legs with patient in recumbent position.

Send us a pair of well fitting, strong laced shoes. Shoes will be charged extra if we furnish them.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Orthopedic Apparatus

H-165

H-165A

H-170

H-175

H-180

H-165 THOMAS' KNEE SPLINT. Price each, \$10.00 to\$15 00

The caliper splint consists of a ring and two side-bars of strong iron wire. The ring slopes from without inward, and from before backward, so that the part upon which the tuberosity of the ischium rests is its lowest part; it is bent to such a shape that when properly padded it shall fit the outline of the upper thigh, following fairly accurately the gleuto-femoral crease and the groin. The ring is padded with felt and covered with basil leather. The side bars should not be bent if it can be avoided. In some cases, however, it will be necessary to bow the inner bar as it passes the knee.

At the back of the splint, extending from below the swelling of the calf to the middle of the thigh is a sheet metal piece, concaved to conform to the shape of the judg-Roller bandages above and below the knee give perfect immobilization of the knee joint, while the extension is obtained by the weight of the limb itself. This brace is to be used in connection with an extension shoe on the well leg, as shown in H-165A.

H-170..THOMAS' KNEE SPLINT, WITH FOOT PIECE. Price, each, \$12.00 to \$18 00
same construction as H-165, with the addition of an adjustable foot piece.

- | | |
|--|---|
| 1. Length from floor to perineum, inside of leg. | 3. Circumference of ankle joint. |
| 2. Length from floor to trochanter, outside. | 4. Circumference of calf. |
| | 5. Circumference of knee. |
| | 6. Circumference of upper third of thigh. |
| | 7. Outline drawing of leg. |

H-175 SOLE LEATHER KNEE SPLINT. Price each, from \$15.00 to\$20 00

Made of stiffened sole leather, lined with chamois, perforated for ventilation, and reinforced at sides and back with light steel bars. Made to lace in front. This splint is especially adapted to cases where the knee requires rest, immobilization and support. Made only from plaster cast of leg.

H-180 MILLER'S KNEE JOINT APPARATUS. Price each, \$15.00 to\$20 00

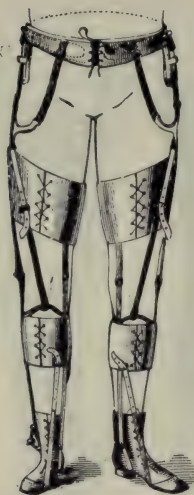

In cases of dislocation of the semilunar cartilage, old sprains of the knee, rupture of the lateral or internal ligaments of the knee joint or in limbs weakened by long ligamentous union of fractured patella, this device will be found to answer a useful purpose. A pad may be placed with a regulating screw to exert pressure on the point of the dislocated semilunar cartilage. A pad can be placed on the inner or outer side of the knee joint. In cases of un-united fractures of the lower and middle third of the femur, this apparatus will frequently accomplish better results than more complicated and expensive appliances. The width of both the thigh and leg band can be varied to suit the requirements of the individual case, and the hinge joints can be arranged to work freely or otherwise, as may be desired. A plaster cast of the leg sent in to us will enable us to obtain a more perfect fit.

MEASUREMENTS REQUIRED.

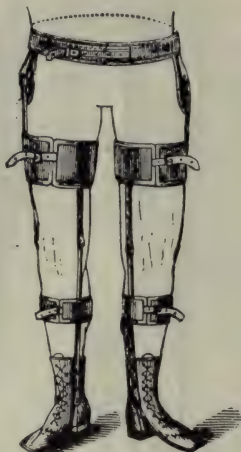

- | | |
|--|--|
| 1. Length from below calf to knee joint. | 3. Circumference below calf. |
| 2. Length from knee joint to upper third of thigh. | 4. Circumference around calf. |

| | 6. Circumference upper third of thigh. |

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Orthopedic Apparatus

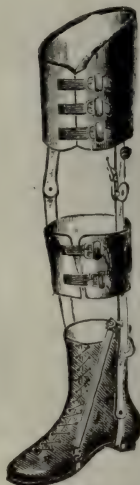

H-210

H-185

H-215

H-205

H-185 APPARATUS FOR SUPPORT OF WEAK LIMBS. Adults', price \$25.00 to \$70 00

H-190 APPARATUS FOR SUPPORT OF WEAK LIMBS. Children's, price \$25.00 to.....\$35 00

This apparatus is for the support of weak legs when, by reason of relaxed joints, softening of the osseous structure or partial paralysis, they cannot quite bear the weight of the body, but when the muscles still retain some power to perform their respective functions. Very light steel springs are secured to shoes, and carried up the sides of the legs to the pelvis; they are provided with joints corresponding to the natural ones, and secured to calf, thigh and pelvis by well-padded bands and buckles.

***H-195 APPARATUS FOR SUPPORT OF WEAK LEG.** Adults' Price, \$25.00 to \$40 00

***H-200 APPARATUS FOR SUPPORT OF WEAK LEG.** Children's. Price, \$15.00 to 20 00
This apparatus is similar to H-185, and is intended for the relief of cases where only one limb is affected.

H-205 LOCK JOINT APPARATUS FOR PARALYSIS. Price each, \$30.00 to.....\$40 00

This apparatus is made for paralysis of one limb. By an improved mechanism the knee-joint is locked while walking, and to enable the wearer to sit down, a lever is arranged at the joint, which, when pressed with the finger outside of the clothing, above the knee, unlocks the joint and permits bending of the knee. In rising and straightening the limb the joint automatically locks itself. The side bars and ankle and knee-joints are made somewhat stronger than in those cases in which the patient has control of the knee-joint.

A strong piece of elastic webbing, designed to overcome muscular contraction, extends from the sole of the shoe to the bar above the ankle. The encasements for the thigh and leg are of strong leather and are well padded.

H-210 APPARATUS FOR PARAPLEGIA. Price, \$35.00 to.....\$70 00

This apparatus excites the muscles to action, aiding them by artificial substitutes, made of elastic rubber or steel, placed on the brace so as to gently exercise the affected parts. We attach these artificial muscles for flexion or extension, as the case may require. The apparatus is riveted to the shoes and consist of two strong upright bars for each leg, jointed at the ankle, knee and hip; to which steel bands, well padded, are fastened, encircling the leg and thigh. We make these appliances either with plain joints or with joints having coiled springs at the knee by which, when the leg is bent backwards and the power relaxed, it will involuntarily spring forward.

H-215 APPARATUS FOR HEMIPLEGIA. Price, \$25.00 to.....\$40 00

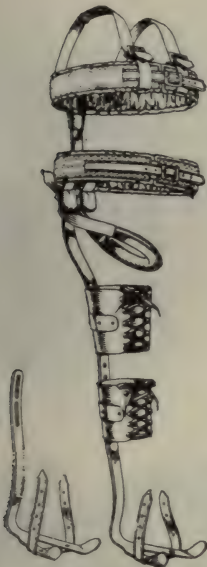

Apparatus same as H-210, but intended for one leg only.

MEASUREMENTS REQUIRED.

1. Patient's name and description of the case.
2. Patient's age.
3. Right, left, or both legs.
4. Length from sole of foot to ankle joint, inches.
5. Length from sole of foot to knee joint, inches.
6. Length from sole of foot to trochanter major, from sole.
7. Length from sole of foot to crest of ilium, inches.
8. Circumference of calf, inches.
9. Circumference of knee, inches.
10. Circumference above knee, inches.
11. Circumference of thigh, inches.
12. Circumference of pelvis one inch below iliac crests, inches.
- a. Length of sole of foot, inches.
- b. Circumference of ball of foot, inches.
- c. Circumference of instep, inches.
- d. Circumference above ankle, inches.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Orthopedic Apparatus

H-230

H-225

H-220

H-220 SAYRE-TAYLOR LONG HIP SPLINT. Price, \$25.00 to.....\$40 00

This apparatus consists of a well-padded pelvic band having two perineal straps, a hollow steel upright connected to the pelvic band by a rotating hinged base, with screw for abduction, a well padded band at the knee and a cross piece below which acts as a foot rest. Extension is made by means of a rack and pinion mechanism in the lower part of the upright. Straps attached to the cross piece are buckled to the shoe or to adhesive strips properly applied above the ankle.

MEASUREMENTS REQUIRED.

1. Sex, weight and age of patient.
2. Length from sole to foot to crest of ilium, inches.
3. Length from sole of foot to center of knee joint, inches.
4. Circumference of body 1 inch below crest of ilium, inches.
5. Circumference of knee joint, inches.
6. Right or left leg.
7. General condition of patient.

H-225 THOMAS' HIP SPLINT. Price, leather covered, \$10.00 to.....\$15 00
Extension, extra, \$6.00 to.....10 00

This apparatus is designed to immobilize the hip joint, and consists of a flat steel posterior band extending from the scapula to the calf of the leg, a band passing around the chest, a band passing around the pelvis below the iliac crests, a band around the middle of thigh, and one around the calf. If necessary shoulder straps are attached to the chest band to hold brace in proper position. The splint is designed to be worn with an extension on the sound foot, as illustrated.

H-230 DAVISON'S MODIFICATION OF THOMAS' HIP SPLINT. Price, including cork extension, \$30.00 to.....\$35 00

This splint is used in hip joint troubles and fractures of the neck of the femur in old people. The splint is more easily applied and more comfortable than the regular Thomas splint. The general construction is the same as in the Thomas splint, with the addition of laced leather shafts to the original iron bands of Thomas' instrument. Chest and pelvic bands are well padded and comfortable. A well padded strap passes under the tuber ischium and is fastened to the pelvic band in the rear, thus supplying counter extension. The detachable nurse H is attached by means of straps to the shoe, which is furnished with buckles.

This splint is especially desirable when the surgeon finds it necessary to get the patient up and moving around. The entire limb is extended in the frame and the nurse H keeps the leg in proper position. An extension shoe 1½ or 2 inches high is worn on the sound limb. Patients must furnish their own laced shoes.

MEASUREMENTS REQUIRED.

1. Stand patient on sound leg, placing books or blocks under the diseased leg until the spine is straight. Take piece of strip lead and make contour of limb from scapula, over buttock and posterior part of leg, to point below the swelling of the calf. Transfer to paper, marking off calf, knee joint, middle of thigh, and crest of ilium.
2. Circumference below calf, inches.
3. Circumference of calf, inches.
4. Circumference of knee joint, inches.
5. Circumference of lower third of thigh, inches.
6. Circumference of upper third of thigh, inches.
7. Circumference 2 inches below crest of ilium, inches.
8. Circumference of chest under axillae.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

SHOULDER BRACES.

H-235 THE "AUFRECHT." Child's, \$5.00 and \$5.50; youths', \$6.00 and \$6.50; adults, \$7.00 and\$7 50

This brace is made light, but strong and durable, and may easily be applied and removed. The back springs are covered with soft kid, felt lined, the shoulder springs are finely finished and nickel plated, the arm straps are made of non-elastic web to buckle, the crutches being rounded and well padded. The waist strap is elastic on one side.

H-240 THE "CORRECTOR," made in 5 sizes. No. 0, 7½-inch spring, \$3.25; No. 1, 8½-inch spring, \$3.50; No. 2, 9½-inch spring, \$3.75; No. 3, 11-inch spring, \$4.00; No. 4, 12-inch spring.....\$4 50

When ordered with suspender attachments, extra..... 75

This is an effective appliance for the treatment of round shoulders in cases where the back supporting springs of the "Aufrecht" are not required. Can be supplied with suspender attachment if wanted.

H-245 THE "CORSET BACK," japanned springs, covered with fine jean, sizes from 10 to 19 inches back.....\$1 50

BRACES FOR ANTERO POSTERIOR CURVATURES.

H-280 STILLMAN'S, ANTERO POSTERIOR BRACE. Price from \$30.00 to.....\$40 00

This brace is composed of a light double pair of springs. The under springs are somewhat shorter and are provided with a pad at their extremities for pressure on the dorsal region when the brace is applied. By means of ratchets the power of the springs is regulated. To make the brace effective, the curves of the under springs are made the reverse of the curves of the deformity. Thus the curve of the deformity and the curve of the combating springs are so placed in contact with each other that, when the brace is applied and the springs are drawn tightly towards each other, reduction in the exaggerated curves of the spine results.

H-285 NYROP'S ANTERO-POSTERIOR BRACE. Price from \$12.00 to.....\$15 00

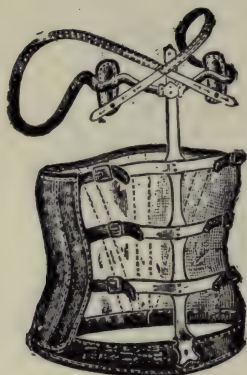

This brace consists of a steel pelvic band well padded, to which is attached a tempered steel upright, so shaped as to exert a corrective force upon any upper dorsal flexion, a metal cross piece at the upper end of the upright terminates in round auxiliary straps. Measurements required, same as H-280.

MEASUREMENTS REQUIRED.

1. Sex of patient.
2. General appearance of patient.
3. Lay a soft piece of lead wire along the back, moulding it exactly to the spine, from the seventh cervical vertebra to the middle of the sacrum. With this pattern trace carefully the shape of the spine on a sheet of paper, marking the points opposite the upper and lower borders of the scapula and the crest of ilium.
4. Circumference of body between crest of ilium and trochanter major.
5. Circumference of body at waist.
6. Circumference of body under axilla.
7. Distance between the upper borders of the scapula.
8. Distance between the lower borders of the scapula.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

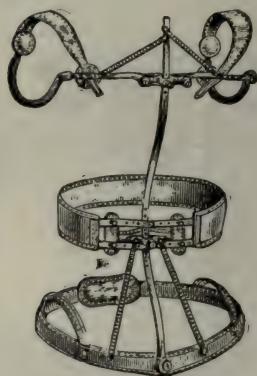

Orthopedic Apparatus

H-295

H-300

H-290

BRACES FOR ANTERIOR CURVATURE.

H-290 DELICATE SPINE BRACE, for Anterior Curvature or mild cases of Pott's Disease. Price from \$35.00 to.....\$40 00

This brace is intended only for cases where the deformity is mild, or when the physical condition of the patient will not admit of a heavier apparatus. It is constructed of the finest steel, delicately wrought and neatly padded, the brace in every way being made as light and delicate as possible.

H-295 JOHNSTON'S SPINAL SUPPORT, for Anterior Curvature. Price from \$20.00 to.....\$30 00

Attached to a well-padded pelvic band is an upright steel bar to which is fastened by an adjustable arm, pads for the scapulae. This adjustable arm terminates in well-padded crutch horns fitted accurately under the axilla to relieve the weight of the body, the straps passing over the shoulder, continuing diagonally across the back, and buttoning on the scapular pad of that side. On the upright steel bar three or more steel springs, well tempered, are fastened. These springs are so shaped that they act as strong levers. The broad abdominal band is made of satteen jean, interlaced with some elastic material and buckled by straps to these springs; they not only afford support, but produce a certain amount of pressure to the abdominal muscles, and by so doing reduce the enlarged or pouched appearance that is so well marked in this trouble. The corset part is made concave so as to act as an abdominal supporter. This brace can be adjusted so readily that it does not interfere in the least with any other treatment indicated in cases of this kind.

H-300 NYROP'S SPINAL SUPPORT, for Anterior Curvature. Price from \$25.00 to \$30 00

This apparatus consists of a steel spiral upright, with a cross piece above to which auxiliary straps are fastened. The pelvic band is broad and takes additional purchase by means of two pads. To a well tempered cross piece just above the pelvic band is attached an elastic abdominal band, by means of which the pouched appearance of the abdomen so well marked in this trouble, is greatly reduced.

MEASUREMENTS REQUIRED.

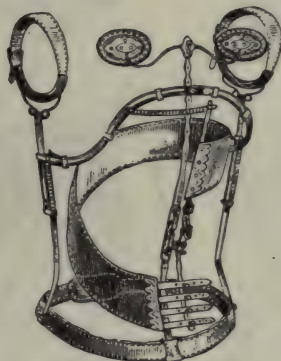

1. Patient's sex, age and weight.
2. Distance from vertebrae prominens to sacro lumbar articulation.
3. Distance from axilla to crest of ilium, right side.
4. Distance from axilla to crest of ilium, left side.
5. Distance from center of right to center of left scapula.
6. Circumference of waist.
7. Circumference of chest under axilla.
8. Circumference of pelvis 1 inch below crest of ilium.
9. Circumference of arm under axilla and around shoulder.
10. Place a flexible strip of metal along the spine, moulding it exactly to its curves from the seventh cervical vertebra to the middle of the sacrum. With this as a pattern, trace carefully the curve obtained upon a sheet of paper, marking upon it location of following points: Upper and lower borders of the scapulae, crest of ilium and affected parts of the spine. Send us this tracing.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

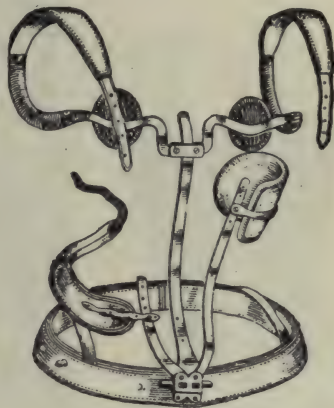

Orthopedic Apparatus

H-305

H-310

H-315

BRACES FOR LATERAL CURVATURES.

H-305 IMPROVED BRACE FOR LATERAL CURVATURE. Price, \$25.00 to.....\$35 00

To the pelvic belt are attached, laterally, two elastic crutches, so as to relieve the spine of the weight of the trunk. Posteriorly, a single, strong, upright bar, holding a couple of adjustable pads for the scapula, and just below, a leather band, of proper width, terminating in strong elastic India-rubber webbings. This band is passed around the protuberance obliquely, and buckled to the pelvic belt in front, an inch or two beyond the linea alba.

H-310 DELICATE BRACE FOR LATERAL CURVATURE. Price.....\$40 00

This apparatus is designed only for cases where the deformity is mild or where the physical condition of the patient is such as not to admit of the use of a heavier appliance. It is constructed of the finest steel, delicately wrought and neatly padded, the brace being made in every way as light as possible.

H-315 LEVER BRACE FOR LATERAL CURVATURE. Price.....\$45 00

This apparatus consists of a well padded steel pelvic band, to the posterior center of which is attached an upright steel bar, its curves conforming to those of the spine, and holding at its upper extremity upon an adjustable cross-piece two oval pads, resting upon the shoulder blades when the brace is applied.

Attached to the ends of the adjustable cross-piece, are padded crescent-shaped crutches, terminating in padded shoulder straps which fasten on buttons, placed upon the oval shoulder blade pads.

To the posterior center of the pelvic band is attached also a metal box, containing two archimedian screws which move with the aid of the key so as to exert and maintain any amount of pressure against the protuberances; the two upright bars armed at their upper extremities with well padded metal adjustable pads. As the uprights are constructed of spring tempered steel, all pressures exerted by them in combating the deformities are elastic while constant.

MEASUREMENTS REQUIRED.

1. Patient's name (or sex).
2. Patient's age.
3. Patient's weight (estimated).
4. Distance from sacro lumbar articulation to vertebra prominens.
5. Distance from sacro lumbar articulation to first vertebra involved.
6. Distance from sacro lumbar articulation to last vertebra involved.
7. Distance from crest of ilium to axilla, right side.
8. Distance from crest of ilium to axilla, left side.
9. Distance from the center of one scapula to the center of the other.
10. Horizontal (transverse) diameter of the protuberance.
11. Circumference of chest under axillae.
12. Circumference of pelvis one inch below the iliac crests.

In addition to the above measures, please state if the convexity of the curve is to the right or left side.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Orthopedic Apparatus

BRACES FOR LATERAL CURVATURE.

H-320 THE BEELY SPINAL CORSET. Price, \$50.00 to.....\$75 00

This appliance was devised by Dr. F. Beely, of Berlin, Germany, and is used by him with excellent results. Its use has been very satisfactory where the surgeon has succeeded in having the corset properly made and accurately fitted to patient. It can be used in the treatment of either scoliosis or kyphosis, though Dr. Beely recommends it particularly for the former deformity. It is made over a cast of the patient, which should be made while the patient is suspended, or it is fitted to the patient himself, where convenient. The appliance is made of strong cloth and spring steel work, except the pelvic portion, where the steel should be malleable. It is made to lace front and back, admitting of easy removal or application. Axillary crutches support the trunk, and the careful fitting over the hips gives a good foundation to a proper corrective force. If the patient cannot come to our establishment for a fitting, a plaster mould of the body, made in the usual way (it must come low down over the pelvis), must be sent to us carefully boxed, with such particulars of the case as will aid us in the construction of the corset.

H-325 THE VIENNA EXTENSION CORSET BRACE, for Lateral and Posterior Curvatures. Price, \$35.00 to.....\$50 00

This corset is made of strong white cloth, reinforced with whalebone strips. A steel pelvic band, adjustable over the sacrum, is curved to fit over the crest of ilium, so that the weight of the extension crutches rests on the soft parts. The crutches are adjustable, and may be extended as the growth of the patient or the improvement in the case may require. A broad band of strong elastic webbing carrying a flat pad is attached to one of the side uprights, and passing round the back is attached to the upright on the opposite side. In some cases two of these elastic bands are required, especially when the spine is rotated. In Potts' Disease they are placed in an entirely different position from those shown in the illustration.

A constant elastic pressure is exerted upon the protuberance by this method, which is more effective and less irksome than the screw mechanism and steel pads employed in most of the spinal apparatus now in use. If it is impossible to send the patient to us for fitting, a plaster cast of the body must be sent us, in order to insure a perfect fit and obtain the best results.

H-330 SOLE LEATHER JACKET, for Lateral Curvatures. Price.....\$25 00

***H-335 SOLE LEATHER JACKET,** with jury mast attachment..... 35 00

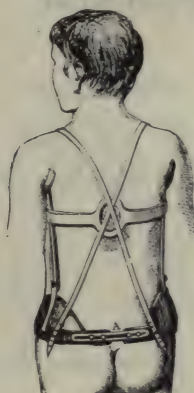

This jacket is made of sole leather, lined with chamois, with well padded crutches under the arm, made to lace with hooks in front. Leather body is perforated for ventilation. These jackets in order to obtain the best results must be made over a plaster cast of the body made from a plaster jacket, put on the patient while suspended. These jackets should be made under our own supervision to insure the best results.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

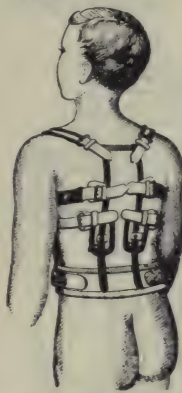

Orthopedic Apparatus

H-355

H-350

H-345

H-340

BRACES FOR POSTERIOR CURVATURES.

H-340 IMPROVED BRACE FOR POTTS' DISEASE. Price.....\$35 00

This brace is intended to afford an elastic and gentle pressure to the parts to which it is applied, giving to the patient an easy and comfortable feeling. It is made of light tempered springs, and softly padded wherever it comes in contact with the body.

The belt below passes around the pelvis, and the principal weight is thrown upon the gluteal region. Two upright parallel bars pass on each side of the posterior elevation, having a portion of silk elastic rubber between them, for the purpose of preventing further curvature. If the latter is inflamed, a portion cut out of the elastic material prevents direct pressure upon the extremity of the bone. Upon these side bars are attached two elliptic and padded springs, yielding to every pressure, adapting themselves to the spinal column, and keeping the body in an erect position. The two padded crutches are elastic and elevate the body, pressing mostly under the margin of the scapula.

H-345 WASHBURN'S SPINAL BRACE FOR POTTS' DISEASE. Price, \$15.00 to \$20 00

In the accompanying figure a band of steel, which passes half way around the pelvis just above the trochanters; two flat bands of steel parallel to each other, and curved upon their flattened sides to the form of the patient. These bars are curved a little less than the spine, so that when secured in position, their elasticity will operate to rectify the spinal curve. The cross-bar at the upper ends of the parallel ones is firmly riveted to them, and crosses the back just above the spines of the scapulae. At the ends of this bar are affixed buckles which receive the shoulder straps. Buckles are attached to various parts of the brace by means of which it is secured to the front part of the apparatus, which consists of a piece of strong material covering the chest and abdomen.

H-350 LANNELONGUE'S SPINAL BRACE FOR POTTS' DISEASE. Price, \$20.00 to\$25 00

This brace consists of a well padded pelvic band, with slide adjustment over sacrum, two adjustable crutches extending from the crest of ilium to the axillae, well padded caps, fitting over the crest, straps passing from shoulder crutches in front and fastened to the pelvic band behind, these straps exerting pressure upon a fenestrated horizontal band, passing over the vertebrae prominens, and attached to the crutch uprights.

H-355 TAYLOR'S SPINAL BRACE FOR POTTS' DISEASE. Price, \$20.00 to....\$30 00

Consists of a semi pelvic band well padded, two steel spinal uprights, fitting on each side of the spinous processes, two horizontal steel bars, crossing the uprights at the scapulae, and two well padded curved steel pieces attached to the uprights, fitted to embrace the neck firmly, two shoulder straps fastened to these curved pieces passing over the shoulders, under the axillae and buckling to the upper horizontal bar. Two pads made either of leather filled with cork or curled hair, or of hard rubber are adjusted to the uprights and fitted on each side of the vertebrae prominens. An apron in front is attached to the lower horizontal bar and pelvic band to sustain the abdomen and exert pressure.

DIRECTIONS FOR MEASUREMENTS.

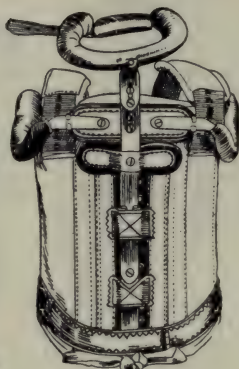

1. Style of brace wanted.
2. Patient's name (or sex.)
3. Patient's age.
4. Patient's weight (estimated).
5. Distance from sacro lumbar articulation to vertebra prominens, inches.
6. Distance from sacro lumbar articulation to first vertebra involved, inches.
7. Distance from sacro lumbar articulation to last vertebra involved, inches.
8. Distance from crest of ilium to axilla, right side, inches.
9. Distance from crest of ilium to axilla, left side, inches.
10. Distance from the center of one scapula to the center of the other, inches.
11. Horizontal (transverse) diameter of the protuberance, inches.
12. Circumference of chest under axilla, inches.
13. Circumference of pelvis one inch below the iliac crests, inches.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

H-365

H-370

BRACES FOR POSTERIOR CURVATURES.

H-360 TAYLOR'S BRACE FOR POSTERIOR CURVATURE, with attachment for diseased cervical region. Price \$30.00 to.....\$50 00

This brace is of the same construction as H-365, with the addition of the chin piece as shown. This attachment can be adjusted in such a manner as to take the weight of the head from the diseased vertebrae.

H-365 MUELLER'S CORSET BRACE, FOR POSTERIOR CURVATURE, with attachment for diseased cervical region. Price \$30.00 to.....\$50 00

This is without doubt the most practical brace for this trouble that is made. It consists of a well padded pelvic band, curving over the crest of the ilium to obtain the best bearing surface with the most comfort, a spinal upright to which is attached a pad pressing on each side of the vertebrae prominens, a pad crossing the scapulae, to which it attached arm crutches, well padded and fitted with shoulder straps as shown. A corset fitting the body closely is worn on the inside of the apparatus. A head piece well padded is attached as shown.

DIRECTIONS FOR MEASUREMENTS.

1. Sex of patient.
2. General appearance of patient.
3. Lay a soft piece of lead-wire along the back, moulding it exactly to the spine, from the seventh cervical vertebra to the middle of the sacrum. With this pattern trace carefully the shape of the spine on a sheet of paper, marking the points opposite the upper and lower borders of the scapula and the crest of the ilium.
4. Circumference of body between crest of ilium and trochanter major.
5. Circumference of body at waist.
6. Circumference of body at axillae.
7. Distance between the upper borders of the scapulae.
8. Distance between the lower borders of the scapulae.
9. Distance, if any, from top of brace to vertebra prominens.
10. Distance from same point to base of skull.
11. Circumference of head and chin.
12. Lateral diameter of head close under ears.
13. Antero-posterior diameter from chin to back of neck.
14. Take a piece of bar lead and get outline of back and neck, and show same on paper.

H-370 SAYRE'S JURY MAST, for incorporation in a plaster jacket. Price.....\$12 00

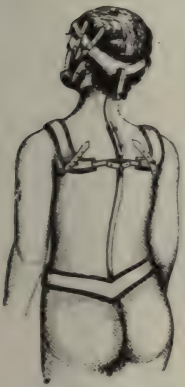

This consists of two pieces of malleable iron, bent to fit the curve of the back. To the lower portion are attached three or more roughened tin strips, long enough to go nearly around the body. From two cross pieces of the upper extremity springs a central shaft, carried in a curve over the head and capable of being elongated at will. To this is attached at its upper extremity a swivel cross bar with hooks, from which depend straps supporting a head and chin collar.

DIRECTIONS FOR MEASUREMENTS.

1. Bend a flexible strip of lead to the contour of the back, commencing at the top of the head, and carefully carry it along to the sacrum; carefully remove and trace on paper, marking the position of the scapulae, iliac crests and point of disease.
2. Give circumference top of head, around chin.
3. Circumference around cranium.
4. Circumference of pelvis, one inch below iliac crests.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

Orthopedic Apparatus

H-390

H-380

TORTICOLLIS AND SUSPENSION APPARATUS.

H-375 MARKOE'S APPARATUS FOR TORTICOLLIS. Price, \$35.00 to.....\$45 00

"This apparatus is constructed in the following manner: An upright steel bar is fastened to a pelvic band, and carried along the spine to a little below the level of the shoulders, secured in position by straps passing forward over the shoulders, backward under the axillae, and fastened to buttons or pads situated over the scapulae.

"A steel lever for extension of the neck is provided inferiorly with a slot, to admit of adjustment, and connected with the upright bar by means of two screws; the top of this lever is made to form a powerful clamp, for the purpose of holding the head-band and of securing the head in position. The head-band is formed of a steel-spring, carried half around the back of the head, softly padded, the covering extended to the front and buckled there. A strap may also be passed across the top of the head from ear to ear.

"A bandage, the size and shape of the patient's chin, is buttoned to this head-band laterally with four straps. Fastened to the steel spring of the head-band is a steel stem about one inch or less in length, terminating in a ball; this is held within the grasp of a clamp, thus forming a universal joint, moving freely in all directions. By turning the thumb-screw with which the clamp is provided, the movement of the joint is arrested and the head of the patient may thus be fixed in any position."

MEASUREMENTS REQUIRED.

1. Patient's name (or sex).
2. Patient's age.
3. Patient's weight.
4. Circumference of body under axilla, inches.
5. Distance from sacro-lumbar articulation of the spine to the vertebra prominens, inches.
6. Distance from the same point to the base of the skull, inches.
7. Distance from crest of ilium to axilla, each side, inches.
8. Circumference of the head at the base of the skull over the ears and upper line of the forehead, inches.

H-380 ROBERT'S APPARATUS FOR TORTICOLLIS. Price.....\$25 00

This apparatus is designed to secure, at the seat of disease, continuous elastic vertebral extension and voluntary articular motion, together with the avoidance of inter articular pressure and friction. It consists essentially of two encasements, an upper or cervico cephalic and a lower or cervico-thrunkal segment. The upper one has a clasp under the chin, which can be opened or closed by means of a key, thus permitting of easy removal or reapplication. The lower one is provided with a hinge posteriorly and a clasp anteriorly. The surfaces pressed upon by these two enveloping segments serve as points for counter pressure. Elastic linear extension of the cervical spine is effected by means of two strong spiral springs playing upon upright steel rods, which are placed on either side of the neck.

MEASUREMENTS REQUIRED.

The apparatus requires careful adjustment. This necessitates the patient's presence at our establishment to insure a perfect fit.

- ***H-385 SAYRE'S SUSPENSION APPARATUS**, plain pulleys. Aluminum bronze finish. Price.....\$ 9 00
- H-387 SAYRE'S SUSPENSION APPARATUS**, compound pulleys..... 12 00

Fractures of the Hip, Thigh, Patella, Leg, Ankle. 'Cases of Non-Union, Dislocations, Sprains, Knee or Hip-Joint Disease, Treated with the patented

AMBULATORY PNEUMATIC SPLINT

Result in Bone Union Without Shortening or Deformity.

Recommended and Used by Best Surgeons Everywhere.

Every Up-to-date Physician and Surgeon should have one of these splints on hand for emergency cases, or recommend it to his patients in need of this modern splint. They would gladly pay for its purchase or rental if they but knew of its many advantages in the treatment of their case. To apply patient is not put to sleep or pain caused. It does away with a fracture box, improvised splints, weights, pulleys, lying in one position in bed, and plaster casts.

It may be put on at time of injury and fracture reduced with it or it may be put on later, but in most cases the sooner the better. Its use prevents hypostatic congestion of lungs and heart by having head of patient's bed raised a foot or more. It permits of rolling patient onto splint side for bathing and rubbing of back and hips, to prevent bed sores, and when ready to get patient out of bed, the splint is a safe, comfortable walking support for the limb, thereby increasing general strength and health of patient, while union is taking place.

The adjustment of the splint is simple and easily made for right or left limb of male or female patient for all of the various purposes for which the splint is used and when supplied with measurements, we send it fitted, ready to apply with all parts tagged with printed directions and booklet of application notes, guaranteed to be satisfactory to you in every respect.

It is employed with great success in all cases where Extension, Counter-Extension and Immobilization are required, while the patient is lying in bed, standing or walking about.

Ambulatory Pneumatic Splint

Adjustable to right or left limb, showing application of splint without posterior padded cloth-board support or adhesive strap extension. Complete with necessary parts for Ankle, Leg, Patella Fracture or Knee Joint Disease.

(Price \$40.00)

It is an open dressing permitting of Frequent Inspection, Bathing, Dressings to injuries of soft tissues, Ventilation, Massage and Early Painless Use of the Limb with Perfect Safety.

It is easily applied without pain and allows the patient to move around in bed, sit up or walk about at once, gradually prolonging the period of activity each day until recovery is complete.

It reduces the reduction of fractures and dislocations to a comparatively easy, safe, accurate and reliable setting, retaining the fractured bones in their proper position.

It permits the application (if desired) of supporting posterior, lateral, or anterior padded cloth-board apposition splint for Hip, Thigh or Leg Fracture. A full set of which are furnished with each splint, also leather buckling straps for adhesive strap extension in connection with the pneumatic cushion extension and counter extension on and between the bony prominences of the ankle and foot and tuberosity of the ischium.

It is far superior to any other form of appliance or method of dressing, as with it patients are the most comfortable, able to walk about, eat and sleep better, are strong and convalesce with "no ill after effects" in the most rapid manner possible—thereby shortening the period of disability from business or work in no case less than one-third and in many cases one-half of the time that would be required without the use of this splint.

It carries out all of the surgical and mechanical principles: Extension and Counter-Extension on and between bony prominences, both above and below the injury; Immobilization; Maintenance of a Free Circulation; Gradual Daily Extension until subsidence of inflammatory exudate is complete and satisfactory continuity has been secured; Inspection; Judicious Exercise; Dressings as Indicated; Traction—Lateral; Anterior and Posterior, as required for perfect approximation. Massage; Ventilation; Bathing; Etc.

It prevents shortening, deformity, non-union of bone, malpractice suits and pays for itself by increasing any doctor's practice and reputation for best results.

It is made and finished in a first-class manner of the very best quality of cold hard drawn, light seamless brass tubes (non-rustable) with adjustable extension screws and cushions of durable webbing covered with flannel containing pure gum rubber pneumatic cushions with adjustable air valves.

It is made in two sizes—adult's and child's. It may be applied to either limb and adjusted to patients of various sizes. It will give perfect satisfaction to patient and surgeon; will wear for years and being washable may be applied in a clean condition any number of times for the various purposes for which it is used.

Apparatus for Fractures and Dislocations

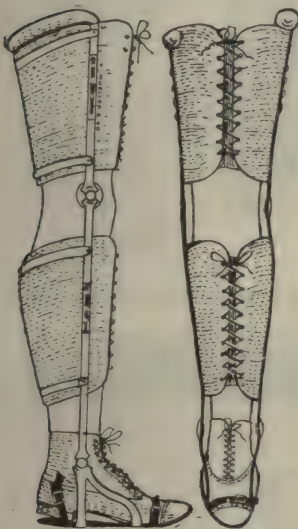

H-400 THE WIENER-MUELLER SPLINT NO. 1.

Price of Apparatus for use in ununited fracture, \$25.00 to\$35 00
 Price of Apparatus for use in tubercular cases, including cork extension shoe for well leg, \$35.00 to..... 45 00

This apparatus is designed for treatment of tubercular knee or ankle joint, also in cases of ununited fractures. It consists of a strong steel frame reaching from the tubercle to the floor, about $1\frac{1}{2}$ inches below the sole of the foot. The perineal or top ring is well padded and the entire weight is transferred from this point to the floor. Wide, padded leather bands above and below the knee are fitted snugly to the limb to hold the brace in position. Extension is obtained by means of straps fastened to the steel sole of the brace; this sole in connection with the perineal band, bearing the entire weight of the patient, and permitting him to walk without danger of disturbing the diseased limb. A cork extension shoe, having an elevation of $1\frac{1}{2}$ inches, is worn on well foot in order to raise it to the length of the brace.

When used in cases of ununited fractures the brace is fastened direct to shoe, the cork extension and steel sole not being necessary. In order to obtain the best results we require a plaster cast of the limb, together with measurements indicated below.

1. Age, sex, weight, and general condition of patient.
2. Length from sole of foot to ankle joint, inner side of leg.
3. Length from sole of foot to knee joint, inner side of leg.
4. Length from sole of foot to perineum, inner side of leg.
5. Length from sole of foot to trochanter major, outer side of leg.
6. Circumference of ankle joint.
7. Circumference above ankle joint.
8. Circumference largest swelling of calf.
9. Circumference garter (below the knee).
10. Circumference above knee (lower third).
11. Circumference of thigh (middle third).
12. Circumference of thigh at perineum.

H-400

*H-410 STROHMMEYER'S APPARATUS FOR ANCHYLOSIS OF THE ELBOW JOINT. Price, \$18.00 to.....\$22 50

This apparatus is for the gradual extension of contracted muscles. By persistent and daily passive and active exercise, a flexible and useful joint may be restored. It may also be used for forcible breaking up of false ankylosis, if the surgeon prefers this to gradual extension. It forms also a safeguard against malposition, for should it be deemed impossible to effect a cure, the arm may be fixed in such a position to ankylose as shall give it the greatest usefulness.

DIRECTIONS FOR MEASUREMENT.

1. Strohmeier's Elbow Splint.
2. Right or left arm?
3. Length from wrist to elbow joint (N to R).....Inches
4. Length from wrist to axilla (N to W).....Inches
5. Circumference of wrist (N).....Inches
6. Circumference of forearm (S).....Inches
7. Circumference of elbow joint (R).....Inches
8. Circumference of arm (Q).....Inches

H-415

H-415 STROHMMEYER'S APPARATUS FOR ANCHYLOSIS OF THE KNEE JOINT. Price \$20.00 to\$30 00

This apparatus is for overcoming muscular contractions of the knee joint and for favoring the re-establishment of motion in cases of false ankylosis.

It consists of metal troughs, for the reception of the thigh and leg, united by two lateral shafts, provided with joint at the knee. A knee cap, adjusted to buttons on the lateral shafts with strong elastic straps, exerts pressure on the patella, whilst the instrument may be flexed and extended by means of a set screw.

By persistent and daily passive exercise a flexible and pliable joint may be restored without confining the patient to bed or room. The mechanism is powerful and may be moved swiftly, adapting it to the forcible breaking up of adhesion as well, should the surgeon prefer this to gradual extension.

DIRECTIONS FOR MEASUREMENTS.

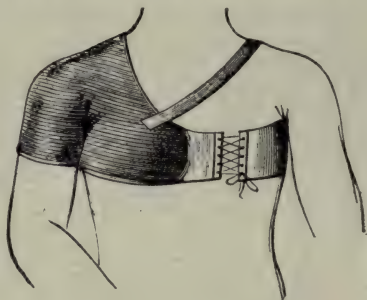

1. Circumference above knee, inches.
2. Circumference at knee, inches.
3. Circumference below knee, inches.
4. Circumference above ankle, inches.
5. Length from ankle to knee, inches.
6. Length from knee to upper third of thigh, inches.

- H-418 MATAS' ADJUSTABLE METALLIC INTERDENTAL SPLINT, complete set \$12 00
For treatment of fracture of lower jaw; set comprises adult, youth and child's mouth pieces or dental plates, and two sizes of chin pieces.
- H-420 HAMILTON-COLLIN'S APPARATUS, for fracture of the inferior maxillary. Price \$6 00

MEASUREMENTS REQUIRED.

A—Circumference of head. B—Circumference around chin and top of head. C—Distance from center of base of skull to center of forehead. D—Circumference at base of skull and around chin.

H-425 CURTIS' CLAVICLE APPARATUS, 2 sizes, child's and adults'. Price.... \$3 00
This appliance consists of a crutch-head mounted on a round extension bar of steel, controlled by a set screw, which renders it applicable to either side. The lower end of the extension bar is attached to the waistband by a pivot-joint, and the proper elevation of the injured shoulder is maintained by a suspensory strap passing over the opposite shoulder.

The appliance is made in two sizes. In ordering, specify if wanted for child or adult.

H-430 ELASTIC SHOULDER PIECE, for preventing dislocation of shoulder joint...\$3 00

This apparatus is to be worn after reduction of a dislocated humerus, to guard against a recurrence, and also for the purpose of relieving permanent dislocation arising from a laxity of the ligaments, or from paralysis of the deltoid and scapular muscles. It is made of silk elastic, with a suitable shoulder-cap.

Directions for measurement: 1. Patient's weight (estimated). 2. Right or left shoulder. 3. Circumference of the arm. 4. Circumference axilla to acromion. 5. Circumference of chest under axilla.

Elastic Hosiery

The Rompler SEAMLESS Stocking

Possesses all the advantages of the old kind, but is woven absolutely without seam and so does not chafe the heel or cause uneven pressure at the joints.

There is no binding to ravel or wear out.

They will not tear while pulling on, and will outwear any other stocking made.

A perfect support for varicose veins or weak joints, giving an even pressure without constriction at any point.

Made in all lengths of the best quality of silk or linen, and in any color.

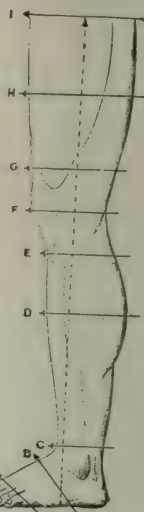

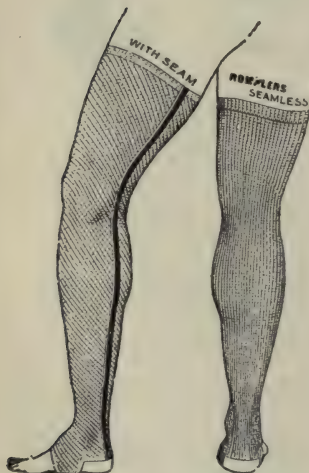

The only stocking that can be worn with comfort.

Observe lines on diagram when measuring for stocking.

We manufacture the following parts:

Garter, Knee and Thigh Stockings, Garter, Knee and Thigh Leggings, Thigh Pieces, Knee Caps, Knee Thigh Pieces, Anklelets, Wristlets.

Elastic Hosiery

NOTE.

Elastic goods made to order cannot be exchanged or returned for credit, although slight alterations may be made.

We guarantee that the workmanship and materials are the best available.

For measurements take exact circumference in inches at points indicated by letters. We allow for compression. Measurements should be taken in the morning before the limb has swollen.

Length measures must be taken on the inside of limb.

Do not give the measurements of the well limb expecting the piece to fit the affected part.

While the value of Surgical Hosiery depends largely on the quality and freshness of the rubber, accuracy of fit is of the highest importance; care should therefore be taken to follow explicitly our directions for measurement. Send for measurement blanks.

ABDOMINAL SUPPORTERS.

- H-860 Abdominal Supporter, light elastic, mercerized thread, 8-in., \$2.00; 10-in... \$2 50
 H-865 Abdominal Supporter, light elastic, silk thread, 8-in., \$3.50; 10-in..... 4 00
 H-870 Abdominal Supporter, light elastic, mercerized thread, 8-in., \$2.50; 10-in.... 3 00
 H-875 Abdominal Supporter, light elastic, silk thread, 8-in., \$4.00; 10-in..... 4 50

Supporters H-860 to H-875 are made of silk and thread covered elastic fabric, hand knit material, with strong edges. This belt is not fashioned, but on account of the softness and pliability of the material will readily conform to the abdomen.

- H-880 Abdominal Supporter, medium elastic, with stays, made to lace in back, thread, 8-in. to 10-in. wide..... 4 50
 H-885 Abdominal Supporter, medium elastic, with stays, made to lace in back, silk, 8-in. to 10-in. wide..... 6 00
 H-890 Abdominal Supporter, medium elastic, with stays, made to buckle at sides, thread, 8-in. to 10-in. wide..... 4 50
 H-895 Abdominal Supporter, medium elastic, with stays, made to buckle at sides, silk, 8-in. to 10-in. wide..... 6 00

Supporters H-880 to H-895 are made of medium weight elastic material, hand knit, with single welts on edges; fashioned in knitting to conform to the shape of the abdomen; a soft, pliable, ventilated material.

- H-900 Abdominal Supporter, silk center, made to buckle at sides..... 3 50
 H-905 Abdominal Supporter, made to lace in back, thread..... 7 50
 H-910 Abdominal Supporter, made to lace in back, medium silk, \$9.00; heavy silk 10 00
 H-915 Abdominal Supporter, made to buckle at sides, thread..... 7 50
 H-920 Abdominal Supporter, made to buckle at sides, medium silk, \$9.00; heavy silk 10 00

Supporters H-905 to H-920 are made in thread and silk, of medium and heavy weights, entirely of elastic fabric similar to elastic hosiery, but generally of heavier material and with double welts at top and bottom to give firmer support. They are woven of elastic material that ventilates, giving comparative comfort in warm weather.

We consider these supporters the best we make, and recommend them wherever a patient can afford to pay for a first-class article. They are made to buckle at side or to lace in back as ordered.

- H-925 Abdominal Supporter, Teufel's System II..... 7 00
 H-930 Abdominal Supporter, Teufel's System VI, for floating kidney, with 1 pad, \$8.00; with 2 pads..... 9 00
 H-935 Abdominal Supporter, genuine moleskin, \$3.00; best quality..... 5 00

Adapted for obesity and postoperative work in men.

SPECIAL ABDOMINAL SUPPORTERS.

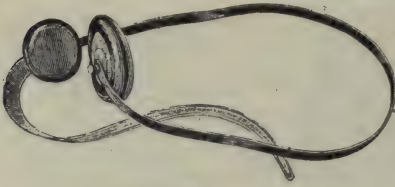

- H-940 Abdominal Supporter, elastic, with pad, for use after operation for appendicitis, thread, \$7.50 to \$12.00; silk, \$10.00 to..... 15 00

“White Line” Aseptic Office Equipment

Paragon Office Examining Table

A practical, low priced, well made table for office examinations and treatments, giving all necessary positions.

The mechanism is simple and effective, and positions are secured easily and quickly.

The construction is of metal throughout. The tubular frame is strong and rigid, and mounted on sliding furniture shoes. The top is covered with sheet steel.

The shelf below will be found a great convenience for the reception of basins, trays, etc., during diagnostic and treatment work.

The gynaecic stirrups are of steel, polished and nickel plated.

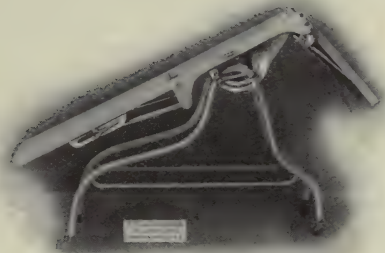

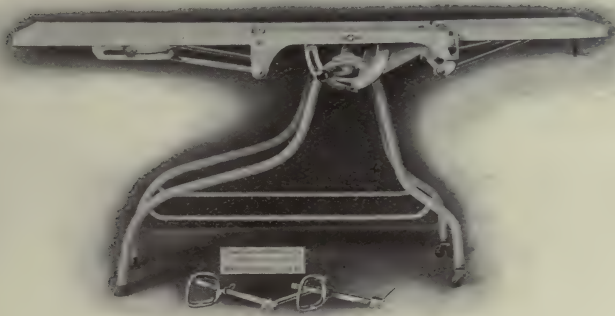

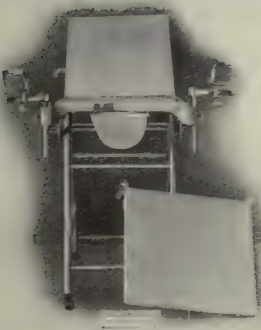

The finish is in the highest grade of enamel, hand rubbed and baked.

The construction is of the knock down type, to save excessive transportation charges.

"WHITE LINE" UNIVERSITY TABLE.

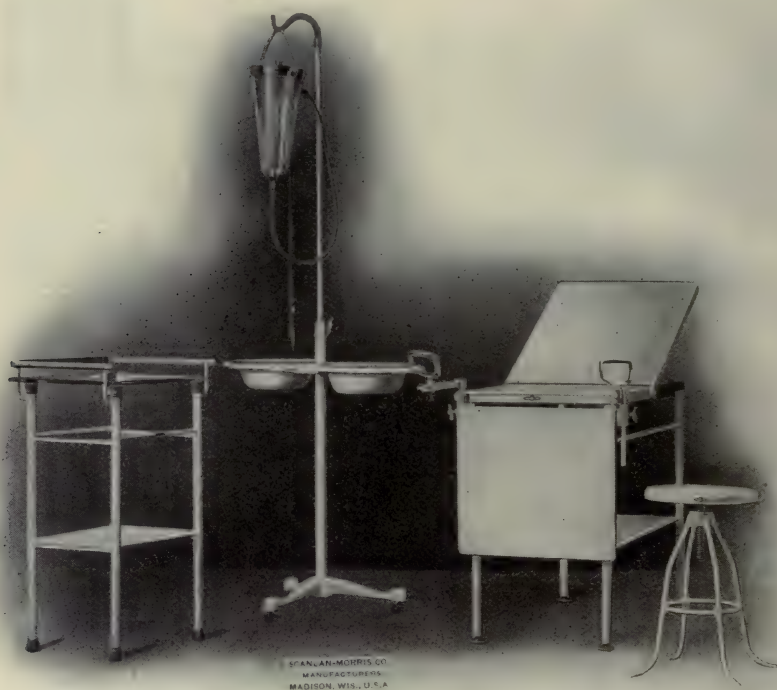

A table suitable for the office or operating room; a table at a moderate price that will meet all requirements. Positions required can be **quickly secured**—reclining, chair, Trendelenberg, genito urinary, hip elevation, etc. The foot section of the table is removable, allowing clear field and perfect drainage in gynaecic and rectal work. The table top is of sheet steel; frame of steel tubing, strong and rigid. Finish is enamel, hand-rubbed and baked.

G-12. ASEPTIC OFFICE EQUIPMENT A.

This office equipment is a model of convenience and beauty, at a moderate price. It has been selected with the utmost care and thought to secure for the physician desiring an outfit of this character the best value. It does not want to be compared with the cheap outfits that have been offered heretofore. Every piece in the outfit receives the same care and attention in construction and finish as our higher priced articles and our guarantee stands behind it in the same way.

The outfit consists of our

Aseptic Office Equipment

G-14. OPERATING TABLE NO. 92.

This table is designed to meet the demand for a good all around office or operating table, made entirely of metal, and having all of the different movements without any complicated mechanism or unnecessary parts. It is very strongly and simply constructed and the movements are automatic, enabling the operator to place the table into the different positions with the heaviest patient upon it without lifting any weight, or shifting the patient. The tilting device is a noiseless winding gear, which is so situated that it can be reached by the operator most conveniently while either in a sitting or standing position. This enables the operator to shift the patient instantly and without effort. The seat and leg rest on the table have a space cut out of them in the middle, which is most desirable in genito urinary work. The drainage pan is shaped so that it does not interfere with the use of an instrument, and these features eliminate the necessity of shifting the patient, or removing the leg rest. The table has a step for the patient which is entirely out of the way. It has our improved adjustable heel stirrups and Bierhoff leg crutches. We also equip it with adjustable head rest if desired. This head rest is simple and easily adjusted to any position with one set screw. The head rest is a desirable feature in regular practice, and with it and without the stirrups the table makes a splendid table for eye, ear, nose and throat work. The table is the most practical and convenient thing of its kind made. The stirrups, head rest and handles are all nickel plated, and the table has a white enamel finish. We can also furnish the table with a plate glass top if desired, and with grained oak or mahogany finish.

G-14	Table No. 92 including stirrups, white enamel finish.....	\$37 50

Office Equipment

Office Examining and Treatment Chairs

YALE AND OXFORD.

For office treatments and examinations these chairs have for years been indispensable articles in the physicians' office equipment. Occupying a minimum floor space and yet affording every position required, and especially invaluable for gynaecological and irrigation treatments, few appliances have covered the field so thoroughly as have the Yale and Oxford. They are known the world over as the best.

The back and seat of either the Yale or Oxford work automatically and are securely held in any position by a hand lever and the chair can be tilted backward or forward by a foot lever. The range of seat from floor is 24 to 34 inches. The patent head rest is also adjustable.

G-38-42

YALE. Chair is raised by foot lever and lowered by compression. The drop seat secures the proper dorsal position.

OXFORD. Chair is raised by a revolving screw.

SPECIALIST'S CHAIR No. 7.

For eye, ear, nose and throat work the Allison No. 7 has long been a favorite.

The special curved pattern back is readily adjustable up or down, so that patients of all sizes may be accommodated. The seat revolves independent of the back and as there are no arm posts, patients may be turned from side to side permitting treatment of either ear. By a foot lever the entire chair may be tipped backwards or by a hand lever at the side the back is inclined without tilting the chair. Range of seat from floor 18 to 26 inches.

“White Line” Aseptic Office Equipment

“MULTUM IN PARVO” SPECIALIST'S CABINET.

The “Multum in Parvo” Cabinet is a most beautiful and practical design of a combined treatment and instrument cabinet.

The body of the Cabinet is made of polished pressed steel, reinforced to secure the greatest rigidity and strength. It has ten frictionless drawers of improved construction, arranged on each side of the instrument cabinet. The lower drawer on the right is furnished with a nickel plated container for cotton and a receptacle for waste pledgets.

The Instrument Cabinet has two polished plate glass shelves, close fitting double doors with bevelled plate glass windows, fitted with Pasquill lock and key. Dimensions, 18 inches wide, 16 inches high and 18 inches deep.

The top is of heavy polished plate glass, 36x18 inches, with rounded corners, resting on rubber tips.

The Bottle Rack is made of heavy copper, polished and nickel plated, holds twelve spray tubes and twelve two ounce glass stoppered, salt mouth bottles. These bottles in crystal, blue, and amber are supplied with the cabinet.

The mirror is of the finest French bevelled plate with rounded corners. Mounted in half oval steel frame.

The body of the Cabinet is mounted on cast legs of graceful design. Mounted on easy rolling casters.

Dimensions of Cabinet, 32 inches high, 36 inches wide and 18 inches deep.

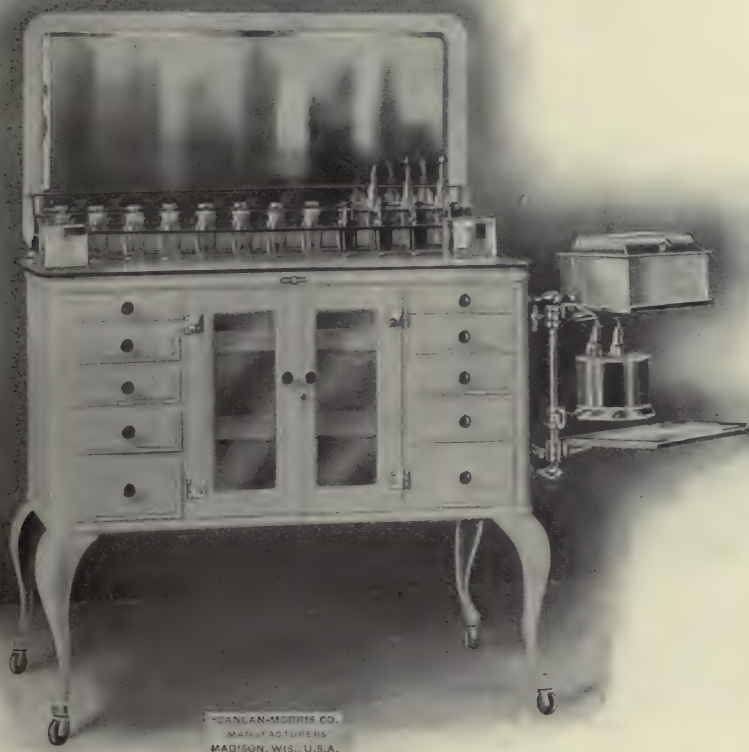

Finish is in highest grade of enamel, hand rubbed and baked.

“White Line” Aseptic Office Equipment

“WHITE LINE” “MULTUM IN PARVO” SPECIALIST’S CABINET.

(With Swinging Work Bracket.)

This Cabinet is the same as our regular “Multum in Parvo” Cabinet with the addition of a Swinging Work Bracket attached to the side of the Cabinet. The bracket is equipped with our Specialist’s Instrument Sterilizer, Spray Tube Warmer, and Glass Working Shelf.

The Bracket Fitting consists of a nickel plated steel upright fitting into flanged pieces that are bolted to the side of the cabinet. This upright, carries the swinging shelves for holding the sterilizer at the top, the spray tube warmer in the center and the glass working tray at the bottom.

The Sterilizer is our Specialist’s Pattern, B260, size 12x6x4 inches, equipped with Electric Heating Unit.

The Spray Tube Heater is the well known DeVilbiss pattern.

The Working Tray is of polished plate glass, 8x16 inches, resting in a brass nickel plated frame.

The Shelves of the Bracket are adjustable up or down, and swing in a half circle radius.

“White Line” Aseptic Office Equipment

Treatment Cabinets

G-150

G-150. “WHITE LINE” SPECIALIST’S CABINET B225.

Designed to meet the wants of the nose and throat specialist particularly, combining instrument cabinet, nest of drawers and treatment table.

The top is of snow-white porcelain enamel, aseptic, with ornamental rail carrying twelve spring clips for treatment bottles and twelve spring clips for spray tubes. Made entirely of metal and glass. Cabinet has three polished plate-glass shelves, six shallow metal drawers, and one deep metal waste receptacle hinged to throw out for convenience. Height of cabinet over all, 44 inches, width 27 inches, depth 15 inches. Finished in pure white enamel, hand-rubbed and baked.

Price\$65 00

G-76. THE “HARKNESS” SPECIALIST’S CABINET AND TABLE B340.

The Harkness cabinet and treatment table with swinging work bracket is designed and built for the convenience and use of the busy eye, ear, nose and throat specialist. It is a practical cabinet and possesses the features demanded by the practical specialist.

Body of cabinet is of sheet steel finished in white enamel, hand rubbed and baked. The all metal drawers are frictionless and conveniently arranged. These drawers are 15" long, 12½" wide, of the following number and depth respectively: Four drawers 2½" deep; two drawers, 3" deep; two drawers, 4" deep; and two drawers, 6" deep.

The Harkness cabinet is 33" wide, 16" deep and 34" high. The top consists of a plate glass slab held securely in place. The nickel-plated guard-rail is supplied with spring clips for holding twelve two-ounce, glass-stoppered, salt mouth bottles and twelve spray tubes. The glass stoppered bottles are furnished with the cabinet and come in crystal, amber and blue.

The swinging work bracket attached to the side of cabinet permits the arms carrying glass work tray, spray tube heater and specialist's sterilizer (electrically heated) to swing in a full half circle radius. The sterilizer used is our B260, 12x6x4". The spray tube warmer is of the DeVilbiss pattern. The work tray is plate glass, 8x16", resting in a brass nickel-plated frame.

The cabinet is mounted on easy moving rubber rollers.

"White Line" Aseptic Office Equipment

G-115. THE "WHITE LINE" TREATMENT TABLE B220.

This table will be found especially useful for the doctor's consultation room and laboratory. It has a porcelain enameled top 16x20" and plate glass shelf having polished and beveled edges. A rail around three sides of the table is furnished with metal spring clips for bottles or spray tubes. Stand is of tubular construction, furnished with lignum vitae casters, and finished in pure white enamel, baked and hand-rubbed.

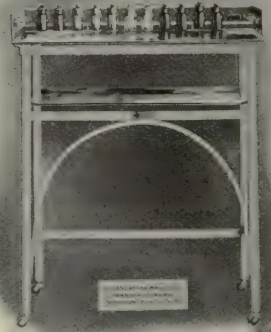

Price\$12 00

G-115

G-120. THE "WHITE LINE" NOSE AND THROAT TREATMENT TABLE B230.

Made up for the nose and throat specialist especially. It is clean, can be kept clean, and makes a handsome piece of office furniture. It has polished plate glass top 18x33", polished plate glass shelf, with end rails carrying spring clips for atomizing tubes, back rails carrying spring clips for one or two ounce bottles. Rails are made of brass, heavily nickel plated. Stand made of tubular iron, well braced, furnished with lignum vitae casters, and finished in pure white enamel, baked and hand-rubbed.

Price\$25 00

G-120

G-82. "THE WASHINGTON" TREATMENT TABLE B222.

A table that will prove of practical value and great convenience to the specialist. The table is of graceful design, strongly constructed, the bridge front allowing the operator to work close to the table, bringing spray bottles, etc., within easy reach. The metal drawers, placed to one side, are easy of access.

The table top is of heavy polished plate glass. 18x33". The nickel plated guard rail around the top is equipped with spring clips for holding twelve crystal, blue and amber glass stoppered bottles and twelve spray tubes. The drawers are of sheet steel; the frame, of wrought iron tubing finished in white enamel, hand-rubbed and baked.

Aseptic Office Equipment

G-84. SPECIALIST'S CABINET NO. 1134.

G-84

This is a most handsome, practical and complete cabinet for eye, ear, nose and throat work. It is made entirely of metal with white enamel finish. It has ten drawers of different depths, and a glass enclosed compartment with two polished plate glass shelves. It has a heavy polished plate glass top, and a handsome mirror at the back. The cabinet can be furnished either with or without the mirror. It has a nickel plated rack for bottles and spray tubes. It is made of such convenient height that anything it contains can be reached most conveniently. It is far superior to the old fashioned wooden cabinets, as it can be washed, kept thoroughly clean and free from odors and contamination. Dimensions 36" wide, 18" deep, and 32" high.

*G-82 Cabinet No. 1133, same as above, without mirror\$60 00

G-84 Cabinet No. 1134, same as above, with mirror 65 00

G-88. WALL CABINET NO. 301 AND 302.

G-86-88

Made entirely of sheet metal and so that it can be easily attached to wall. Handsome design and finish. Three adjustable shelves. Dimensions 19" wide, 26" high, and 6" deep.

"White Line" Aseptic Office Equipment

Specialist's Chair

G-194-196

G-194. "WHITE LINE" SPECIALIST'S CHAIR.

A chair designed to meet the requirements of the most exacting eye, ear, nose and throat specialist.

The back of this chair is so shaped as to afford the greatest comfort to the patient and is adjustable to any angle, adjustment being obtained by means of a foot pedal.

The round seat (revolving) is adjustable in height from 18 inches to 25 inches.

The head-rest gives the greatest range of adjustability in height, in angle (front and back) and in the tilt of the head rest proper up and down.

The chair is equipped with adjustable arm rests.

The frame and body of chair are of wrought and malleable iron, finished in the highest grade of enamel, hand rubbed and baked. Arm rests, seat and chair fittings are finished in nickel-plate or oxidized copper finish.

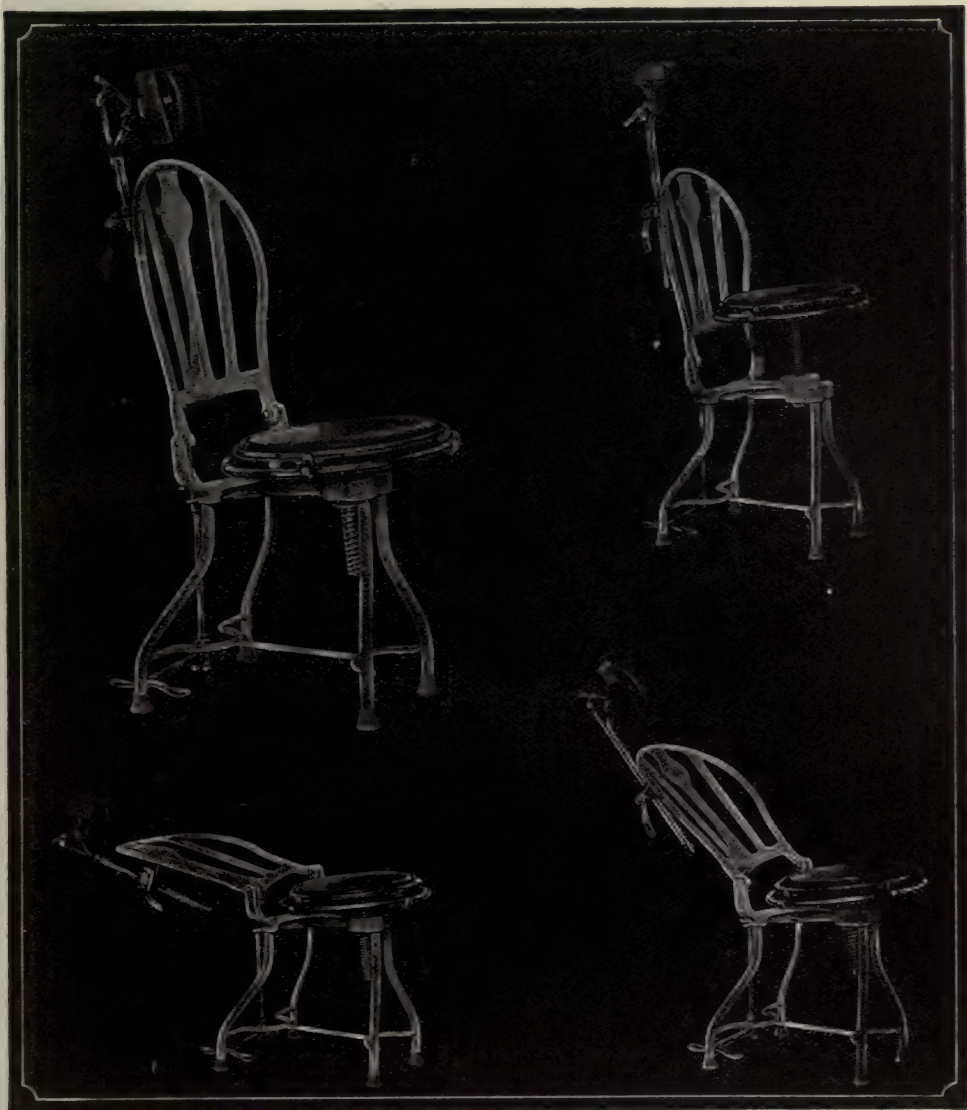

G-194 "White Line" Specialist's Chair B350, white enamel finish, nickel plated seat and trimmings. Price.....\$25 00

Prices listed above are f. o. b. factory and freight will be added when shipped from San Francisco.

G-198. SPECIALIST'S CHAIR NO. 1275.

Price \$25.00.

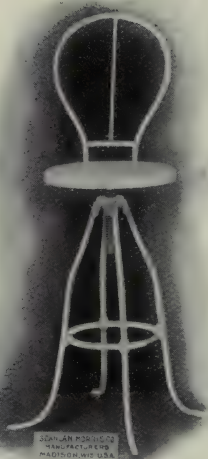

Patient's Chair for eye, ear, nose and throat work, designed to meet the demand for a simple chair of an inexpensive pattern, with all the necessary movements and positions, and without any complicated machinery. The back is adjustable by means of foot pedals, one at each side, which makes a most convenient method of adjustment. The seat is revolving so that the patient can turn without moving the chair, and is adjustable in height, so as to suit any size patient. It has a rod around it for the patient to grasp hold of, doing away with the necessity of arm rests which are generally in the way. The head rest is simple and easily adjusted to any position with one set screw. Another feature of the chair is the small size of it, which leaves nothing in the way of the operator, and at the same time makes a very comfortable chair for the patient. The chair is made entirely of metal, is aseptic and practically indestructible. The seat, pedals and head rest parts are nickel plated or oxidized copper. The seat is spun sheet metal. The frame of the chair is finished in white enamel, but can be furnished with grained enamel finish. Height of seat ranges from 18 to 24 inches. In ordering specify the kind of finish and trimmings wanted.

We can furnish the chair with arm rests if desired. This style is known as Style B, and the price is \$30.00.

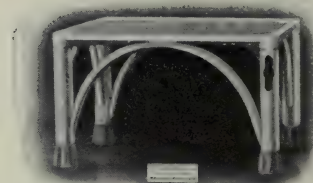

QUALITY GUARANTEED.—Specify section letter and number in ordering.
Prices listed above are f. o. b. factory and freight will be added when shipped from San Francisco.

“White Line” Sterilizers for the Office

THE METROPOLITAN.

This outfit represents our latest design in this class of apparatus, and, while combining convenience with efficiency, it will be found especially useful in offices that have a small floor space. It combines an instrument table and a sterilizing outfit in the one piece of furniture, an added advantage in conveniently handling the contents of the instrument sterilizer. The outfit is mounted on a stand of tubular construction, having a porcelain enamelled top 16x20 inches, and a sheet steel shelf. The stand is finished in aluminum bronze and white enamel.

The burners for heating the sterilizers are of the smokeless blue flame type.

The sterilizers of perfect workmanship, design and finish, are of copper nickel-plated; instrument sterilizer supplied with perforated metal tray for handling contents; water sterilizer equipped with lever handle faucet and protected water gauge.

The Metropolitan Specialist's Sterilizing plant—Instrument Sterilizer 12x6x4 inches and Water Sterilizer of two gallons capacity.

The Metropolitan Physician's Sterilizing plant—Instrument Sterilizer 17½x7½x4 inches and Water Sterilizer of three gallons capacity.

G-282 The "Metropolitan" Specialist's Sterilizing plant, with blue flame gas burners. Price.....\$37 50

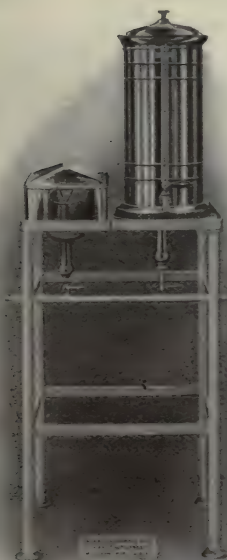

G-284 The "Metropolitan" physician's sterilizing plant, with blue flame gas burners 40 00

Denatured alcohol or blue flame gasoline burners can be furnished where gas is not available, at an additional cost of \$3.50.

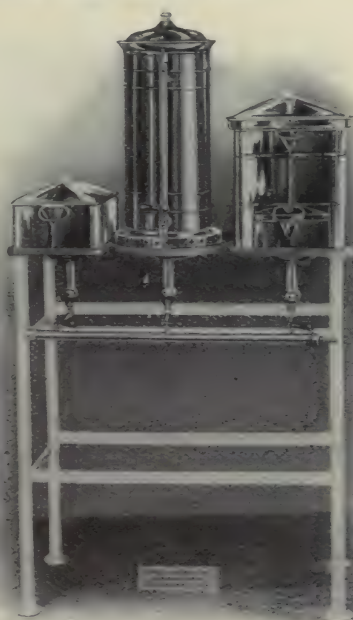

QUALITY GUARANTEED.—Specify section letter and number in ordering.

“White Line” Sterilizers for the Office

G-285
The Monona

G-290
The Wisconsin

THE WISCONSIN.

A complete plant for the perfect sterilization of dressings, water and instruments; suitable for the surgeon's office. Perfect sterilization guaranteed.

Dressing Sterilizer: Principle of sterilization—overhead down draft, circulating live steam, insuring thorough penetration of all dressings. Dressings rapidly dried after sterilization period is completed. The Sterilizing Chamber is $17\frac{1}{2} \times 9\frac{1}{2} \times 7\frac{1}{2}$ inches, and is supplied with metal container for handling dressings.

Water Sterilizer: Three gallons capacity; equipped with protected water gauge and lever faucet.

Instrument Sterilizer: Dimensions $17\frac{1}{2} \times 7\frac{1}{4} \times 4$ inches; supplied with metal container for handling instruments.

The sterilizers are made of highly polished copper nickel-plated; all corners are rounded, and the sterilizers are mounted on a white enamel stand of tubular construction fitted with blue flame burners.

THE MONONA.

Office Sterilizing Plant for Instruments and Water: The instrument and water sterilizer are of the same style and size as those used on the Wisconsin outfit.

THE MADISONIAN.

Office Sterilizing Plant for Dressings, Instruments and Water: The Outfit includes one Wisconsin Dressing, one Wisconsin Instrument and two (one for hot and one for cold sterile water) water sterilizers of the same size and style as those used on the Wisconsin outfit.

“White Line” Sterilizers for the Office

G-275

G-275. SCANLAN PORTABLE COMBINATION STERILIZER FOR INSTRUMENTS AND DRESSINGS B181.

A sterilizer that will give perfect results, and prove a source of convenience to physician and surgeon.

Principle of sterilization,—over-head down draft, circulating live steam.

Steam generated in boiler beneath sterilizing chamber is conducted by means of pipes to top of sterilizing chamber where, by its own pressure, it is forced through the dressings and out through opening in bottom of sterilizing chamber. This technique insures free circulation, thorough penetration, and perfect surgical sterilization.

The sterilizer is converted into a hot air sterilizer by opening the steam vents. The hot air from the burner displaces the steam in the chamber, circulates up through the dressings and dries them rapidly.

The boiler is detachable and can be used as an instrument sterilizer.

Sterilizer is made of cold rolled copper, heavily nickel-plated, corners all rounded.

Sterilizer is equipped with removable metal container for handling dressings and a perforated metal tray for handling instruments.

Sterilizing chamber, (instrument), $16\frac{1}{2} \times 7\frac{1}{2} \times 3\frac{1}{2}$ inches.

Sterilizing chamber, (dressing), $17\frac{1}{2} \times 9 \times 7$ inches.

Operating Tables

No. 101.

No. 102.

No. 103.

"WHITE LINE" PORCELAIN ENAMEL TOP OPERATING TABLES.

Table tops are of snow white porcelain enamel, "aseptic," vitrified onto the castings at a temperature of 1,600 degrees Fahrenheit.

They are temperature proof, clean, easy to keep clean and practically indestructible.

Table fittings are of cold rolled steel, heavily nickel-plated.

Frames are of wrought iron tubing, finished in white enamel, hand rubbed and baked; mounted on large rubber rollers.

Anaesthetizer controls all movements of the table, and can, without exertion, place the patient in the position desired.

The field of operation remains at the same height in Trendelenberg or in horizontal position.

Mechanism of the table is simple and effective.

Tables are complete with adjustable shoulder crutches, leg-holders and porcelain shelf, for drain pan.

"White Line" Aseptic Hospital Equipment**Operating Tables**

G-500

MINNESOTA OPERATING TABLE NO. 2.

(As used at St. Mary's Hospital, Rochester, Minn.)

This table is so nicely balanced that the anaesthetizer can place the patient in any position without exertion.

The foot piece of the table adjusts itself automatically to its proper place when the table is placed in the Trendelenberg position and readjusts itself in the same manner when the table is brought up to the horizontal.

The top of table is made of brass, polished and nickel plated, and is equipped with adjustable body elevator, adjustable and drop head piece. The latter will be found especially useful in operations involving the glands of the neck.

The frame is of tubular construction, strong and rigid, is mounted on heavy rubber tired rollers, and is finished in white enamel, hand-rubbed and baked.

It is complete with body elevator, head rest, gynaecic rack or shelf for holding instruments, Mayo instrument rack, anaesthetizer screen, leg holders and shelf for sundries.

“White Line” Aseptic Hospital Equipment

G-502 THE MINNESOTA OPERATING TABLE No. 3.

Patented.

The Minnesota Table No. 3, the third and latest pattern of the Minnesota tables, is the **perfect result of years of experiment and work**. It embodies the **most advanced mechanical ideas in table design and construction**.

The table is at all times **under the complete control of the anaesthetizer**, and all positions can be secured by him without moving from the head of the table.

The central body elevation for kidney, stomach and gall stone operations is secured by anglization of the table top, eliminating all strain by supporting the body at all points. Elevation is made easily and rapidly by means of worm gear and hand wheel.

The reverse Trendelenberg or Fowler position, for abdominal drainage, goitre, gland work, etc., can be secured within three seconds from either the Trendelenberg or horizontal position.

The foot rest or support used in this position is adjustable up or down the foot piece, is part of the table proper, and is out of the way when not in use.

The Mayo drop head rest or goitre attachment is fitted to the adjustable head piece of the table and can be removed when not in use.

The head piece is adjustable upward to an angle of 45° by means of screw and hand wheel and is positively locked at any point within this radius.

The foot piece automatically adjusts itself to the correct angle when the table is placed in the Trendelenberg position, and readjusts itself in the same manner when the top is brought back to the horizontal position.

The anaesthetizer's screen is adjustable forward or back to suit the necessities of the operator.

The Mayo Instrument Rack can be attached to either side of the table.

The table top is made of heavy copper, highly polished and nickel plated.

The table frame is of heavy tubular construction, mounted on heavy three-inch rubber tired casters and is finished in white enamel, hand rubbed and baked.

The table is complete with Mayo instrument rack, Mayo goitre attachment, Mayo adjustable head rest, adjustable foot support, anaesthetizer's screen, leg holders and shelf for anaesthetizer's sundries.

“White Line” Aseptic Hospital Equipment

Operating Table Accessories

G-515. ANAESTHETIZER'S SCREEN B20.

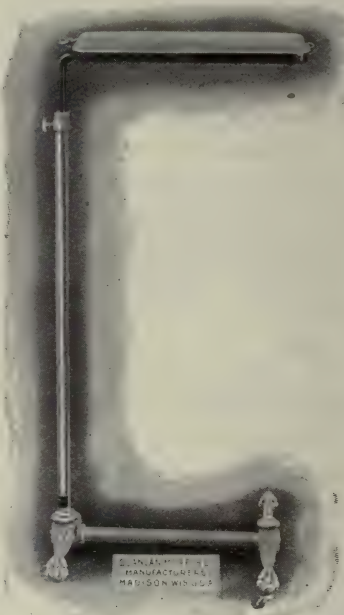

Consists of flexible rod and clamp. The rod is clamped to table top, and adjusted to suit the convenience of the anaesthetizer. A sterile towel fastened to rod forms the screen, and protects the wound from sepsis through saliva or vomit that might otherwise possibly contaminate the seat of operation. It also screens field of operation from the view of the anaesthetizer, directing his attention solely to the patient.

Price, net \$3 50

G-510. MAYO INSTRUMENT RACK B104A.

A convenient tray for holding instruments during an operation. The removable porcelain enamel steel tray rests in a frame that is attached to a nickel plated steel tube, which telescopes into a tubular upright. The base is designed to go under the frame of the operating table. Is adjustable in height by set screw. Base and upright finished in white enamel, hand rubbed and baked.

Price, net\$10 00

G-510

G-505. MAYO INSTRUMENT RACK B104C.

This rack was designed by the Drs. Mayo to do away with the practice of placing instruments on the body of the patient at or close to the field of operation.

It consists of a tray, made entirely of aluminum, 19 inches long and 14 inches wide, to which is attached at one corner a light, strong, nickel plated seamless steel tube upright, which fits into the eye bolts or stirrup holders of the table frame. A movable brass, nickel plated collar on this upright permits the adjustment of the rack to any height and allows it to swing freely in any direction. The rack is particularly adapted to the “White Line” operating tables, but can be adapted to the frames of other styles of operating tables by means of eye bolts which we furnish without extra charge when required.

Price, net \$7 50

*G-506. MAYO INSTRUMENT RACK B104.

This rack is the same as the one described above except that it is furnished with a removable porcelain enameled steel tray.

"White Line" Aseptic Hospital Equipment

Instrument Tables

"WHITE LINE" PORCELAIN ENAMEL "ASEPTIC" TOP INSTRUMENT TABLES.

These tables are without doubt the best that have been designed up to the present time for hospital use. They are rapidly replacing the glass top tables, as the annual expense of glass breakage in large institutions using glass top tables is enormous.

The tops and shelves are made of special castings and are coated with a **pure snow white porcelain enamel**, vitrified to the casting at a temperature of 1600° Fahrenheit. They are temperature proof and are practically indestructible. They look clean, are easy to keep clean and can be made surgically aseptic. All corners and edges are rounded.

The frames are of tubular construction, **rigid and strong**. Our construction eliminating all corners or crevices. They are mounted on *lignum vitae* casters or rubber tips, as ordered. We will furnish with casters when not otherwise specified.

Solution and Wall Stands

"WHITE LINE" SOLUTION STAND.

A most convenient stand for the operating room for holding solutions.

The bottles are of crystal glass, capacity three gallons, and are fitted with our improved overlapping ground glass covers which make them absolutely dust proof.

The frame of stand is of tubular construction, mounted on an extra heavy base, fitted with easy rolling, rubber casters.

The frame is finished in pure white enamel, hand rubbed and baked.

- *G-640 "White Line" Solution Stand, complete with two 3 gallon wide mouth solution bottles of finest crystal glass\$27 00
- G-645 "White Line" Solution Stand, complete with four 3 gallon wide mouth solution bottles of finest crystal glass 39 00
- *G-650 "White Line" Solution Stand, complete with six 3 gallon wide mouth solution bottles of finest crystal glass 50 00

G-645

"WHITE LINE" WALL STANDS.

These stands are made with either porcelain enameled or plate glass shelves. While the stands with the porcelain enameled shelves represent a greater initial cost, they will in time be found the cheaper, as the glass breakage is rather large and quite expensive, while the porcelain enameled shelves are practically indestructible. Again the porcelain enamel shelves are more in harmony with the balance of the operating room furniture.

The stands are of tubular construction, strongly braced to give the greatest strength and rigidity. They are mounted on rubber tips, and are finished in white enamel, hand rubbed and baked.

- *G-620 "White Line" Wall Stand B155, with four polished plate shelves, the two upper 12x42", the two lower 18x42"\$38 00

Ward Dressing Carriages

G-760

"WHITE LINE" WARD DRESSING CARRIAGE B194.

A convenient carriage for carrying dressings, solutions, etc., to the ward for post operative or other dressings.

The porcelain enamel aseptic top and shelf are practically indestructible; frames constructed of wrought iron tubing and cold rolled steel. The wheels have rubber tires that cannot work loose, the front wheels being swiveled allow the carriage to be guided easily. The finish is white enamel, hand-rubbed and baked.

Wheel Stretchers

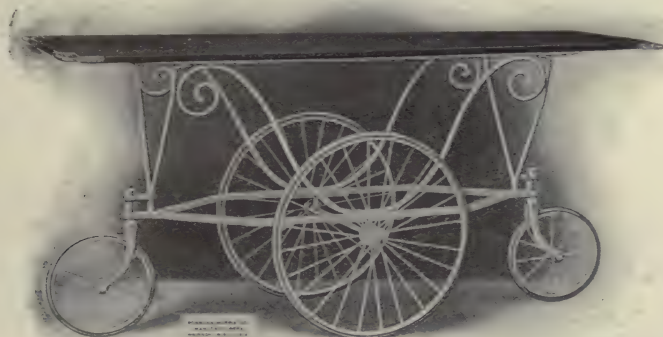

G-775

“WHITE LINE” WHEEL STRETCHER B-193.

This has proven one of the most popular as well as one of the best stretchers produced at a moderate cost.

The frame is of steel, braced in a manner to give the greatest strength and rigidity. The wheels are of the strong steel suspension type, ball bearing with $\frac{3}{4}$ -inch cushioned rubber tires. Guaranteed not to work loose. Forks are of hand forged steel. The top is of selected oak, furnished with nickel-plated carrying handles. Finish of frame in white enamel. The top in natural grain.

G-775 “White Line” Wheel Stretcher B193.....\$45 00

G-770

“WHITE LINE” WHEEL STRETCHER B-192.

This Stretcher is light but very strongly constructed, the frame is mounted on two 24-inch wheels and two 12-inch wheels, with $\frac{3}{4}$ -inch cushion rubber tires. All wheels are ball bearing; the small wheels swivel, permitting the stretcher to be turned in its own length. The detachable top is of oak, finished in natural grain and furnished with nickel-plated carrying handles. The frame is finished in white enamel.

"White Line" Hospital Equipment

"White Line" Sterilizers

G-855-865

THE "SCANLAN" DRESSING STERILIZER.

A dressing sterilizer that we guarantee to give perfect surgical sterilization, that will be found a most convenient type for hospitals having a small amount of heavy surgical work; for surgeons who make a great number of office dressings, or for factories and plants that have installed an emergency room for minor work, first aid and post operative dressings.

It is built on scientific principles advanced by two of the best authorities on sterilization.

The sterilizer is made of heavy copper, nickel-plated; the boiler is **seamless**; the cover is **seamless**; the inner cylinder can be **removed** and the boiler **freed** from all sediment.

Steaming Down Draft, circulating live steam at a temperature of 212° Fahrenheit, is the sterilizing agent employed to secure the best surgical results.

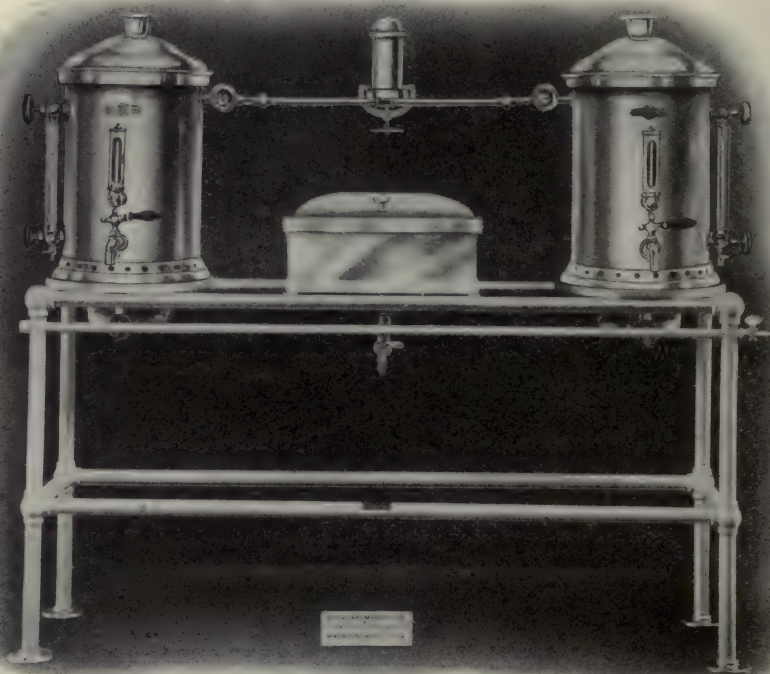

Steam is generated in the boiler, ascends between the double walls of the sterilizer to the dome of the sterilizing chamber, is there held in suspension, until it forces its way down through the dressings in the chamber, passes out through an opening in the bottom of the chamber, and is dissipated into hot air as it strikes the flame below the boiler. The dressings are dried out rapidly after sterilization by opening the steam escape or draft in the dome of the cover.

“White Line” Sterilizers

“THE WHITE LINE” LOW PRESSURE STERILIZING OUTFIT B-173.

To meet the demand for a reasonable priced sterilizing outfit to be used by the smaller hospitals and sanitariums, where the surgical work is not particularly heavy.

The water sterilizing tanks have a capacity of 8 gallons, are made of heavy copper, equipped with water gauge, thermometer, draw off faucet and air filtering funnels; the filter we use is an improved pattern, capable of standing the heaviest water pressure without leak.

The instrument sterilizer is made of heavy copper, coated internally with pure tin, size 16 inches long, 8 inches wide, and 6 inches deep. Has perforated nickel-plated copper tray for handling contents. Outside body and cover highly polished and nickel-plated.

The stand is made of tubular wrought iron, with malleable fittings. Equipped with gas, gasoline or denatured alcohol burners. Stand finished in pure white enamel, hand rubbed and baked.

“White Line” Hospital Equipment

“WHITE LINE” HIGH PRESSURE WATER STERILIZERS.

It is impossible for us in the limited space at our command to give detailed description of our water sterilizers. They are built on the same scientific lines as our dressing sterilizer, and the same care is extended in their construction. The material used is of the very best we can buy. All fittings are absolutely standard, the design is good, and we guarantee in every way their efficiency and durability. The illustration shows our gas heated outfit. We make them also for steam heating, for steam and gas combined, and when necessary for gasoline or denatured alcohol. Special catalogue giving full descriptive details sent by mail upon request.

“White Line” Hospital Equipment

“White Line” Sterilizers

THE “WHITE LINE” HIGH PRESSURE STERILIZING PLANT.

The illustration above shows a battery of “White Line” High Pressure Sterilizers, consisting of the dressing, water and instrument sterilizers, mounted on one stand, complete with every valve and valve connection made and with all necessary piping from the sterilizers to the risers coming up through the floor, for steam, return, water and waste.

We have built our apparatus in this way for two reasons; first, we are positively sure that every connection is made to secure the best working results; secondly, because it insures the Hospital, installing the apparatus, a great saving in the cost of the pipe installation.

We build with either iron pipe finished in aluminum, bronze or with brass pipe polished and nickel plated.

The Stand is finished in white enamel, hand rubbed and baked, and is built to suit the space it is to occupy in the sterilizing room.

We shall be pleased to quote price upon receipt of specifications.

QUALITY GUARANTEED.—Specify section letter and number in ordering.

"Art Line" Hospital Beds

G-8147

G-8149

G-8056

MANUFACTURED BY
Art Bedstead Co. Chicago.

G-8088

G-8056. DR. McKENNA'S COMBINATION OBSTETRICAL AND CONVALESCENT BED.

White enameled. Made 3 ft. wide by 6 ft. 6 in. long over all. Head end 56 in. high. Foot end 38 in. high, with removable top. By simply lifting off the top of the foot end of the bed and inserting the Lithotomy Staffs and Instrument Tray the bed is converted into a Surgical bed. This can be done in less than one-half minute, because all attachments are simple and do not require screws or bolts of any kind.

Special Surgical Bed Spring, 30 in. high; the foot end of the spring is solidly constructed of heavy sheet steel, 3 ft. by 18 in., which forms a firm table on which patient rests during an operation. In all other respects the springs are as comfortable as other springs used on hospital beds. Lithotomy Staffs with Stirrups; no trouble to attach to bed.

Detachable Swinging Instrument Tray; made of seamless steel, white porcelain enameled; size 15 in. long, 9 in. wide and 2 3/4 in. deep.

Elevating Stems to raise either head or foot end of bed, while occupied, to any desired height; can also be used to produce the Trendelenberg Posture (full bed length) often required by a patient.

Ball bearing brass wheel casters; can be detached from the bed if desired.

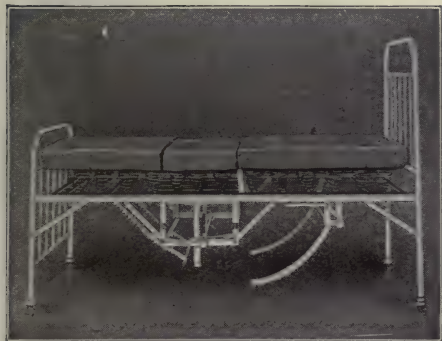

The complete bed with attachments are constructed of the best materials and are very easily adjusted; there are no intricate ratchets, gears or other machinery parts to get out of order. Hospitals can economize space by equipping their rooms or wards with this Combination Obstetrical and Convalescent bed.

Hospital Furnishings

The Wallace Adjustable Invalid and Fracture Bed

For

Hospitals, Sanitariums and
Private Homes

Instantly and easily adjusted to every position obtainable on an operating table.

Permits frequent change of patient without handling.

The Fowler Position

quickly secured.

Solves the problem of drainage in pelvic and abdominal surgery. Invaluable in obstetrical practice.

An Ideal Fracture Bed

Fractures once set give surgeon no worry, as patient is easily handled without danger of displacement.

FOOT SECTION IS DIVIDED so that each limb may be placed in the position desired. Head and central sections operate with a removable crank.

A combination bed and chair a boon to the convalescent; enables patient to sit up gradually.

Middle Section Lowers

For use of bed pan or douche. No lifting or moving of patient necessary. Facilitates handling of patient. Simplifies surgical dressings and bathing.

Separate sheets are used for each section, easily changed without disturbing patient. THE WALLACE BED is thoroughly scientific in all its parts. All metal, strong, durable, equipped with oil tempered springs and high grade soft felt mattresses.

THE "STANDARD" BEDSIDE TABLE.

For those desiring a good substantial bedside table at a moderate price, we can recommend our "Standard" table. It is substantially made, is adjustable in height, the table or tray can be set at any angle. It is well finished and will meet the requirements of those who cannot afford to pay a higher price.

The top is made of oak or birds-eye maple, as listed, and is finished in natural grain. The frame is enameled in black, brown or white.

- G-1585 The "Standard" Bedside Table No. 30, black enameled metal parts, oak top, 18x24 inches..... \$4 50
- G-1587 The "Standard" Bedside Table No. 1, brown enameled metal parts, oak top, 18x27 inches..... 5 00
- G-1589 The "Standard" Bedside Table No. 2, white enameled metal parts, birds eye maple top, 18x27 inches 5 50

G-1585-1589

THE "STANDARD" BEDSIDE TABLE.

There is no problem of the sick room so hard to solve as that of serving a meal to one sick in bed. A tray is unsatisfactory and uncomfortable, and a side table is almost out of the question on account of inconvenience.

Our "White Line" bedside table overcomes all of these objections, being a combination of the tray and table so constructed as to give the greatest comfort with the most convenience. It is made with gray iron base that permits the tray or table to project over the bed—the tray adjustable to any height or any angle.

The tray, 14x20", is of steel, coated with snow white porcelain enamel, making it sanitary and clean. The telescoping bar and sector are polished and nickel plated. The upright and base finished in white enamel.

Price\$10 00

G-1565

GOLD MEDAL BACK REST NO. 101.

These back rests are made so that they are easily adjusted by means of iron ratchets, so attached that it is impossible for the back rest to collapse. They have no cross bars to come in contact with the patient's back, and are furnished with aprons upon which the patient sits to hold them in place. Each rest is furnished with straps to hold a pillow.

The frames are made of hard wood, nicely varnished and covered with a good quality of linen or duck and are tastily trimmed.

G-1565 Gold Medal Back Rest No. 101, nicely varnished and covered with a good quality of linen \$2 50
 G-1566 Gold Medal Back Rest No. 105, same as No. 101, varnished, and covered with duck or striped material.. 1 75

GOLD MEDAL BACK REST NO. 104.

This back rest is made on the same lines as our No. 101, but has in addition the two arm and side head rests. The same care is exercised in their manufacture and all thought and care has been brought to bear to give the greatest patient comfort.

*G-1570 Gold Medal Back Rest No. 104, nicely varnished and covered with linen \$4 00

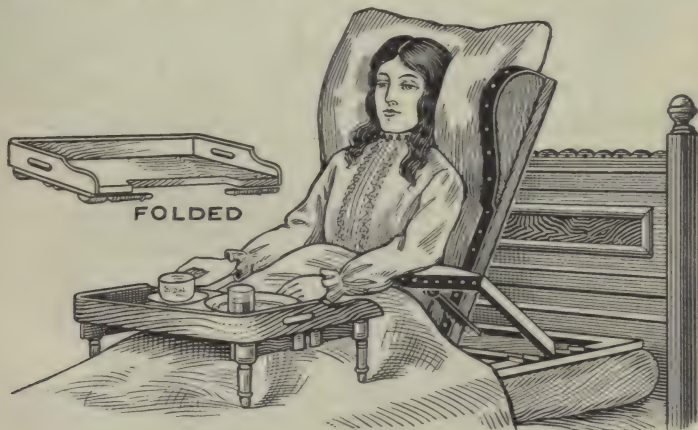

G-1571 Gold Medal Back Rest No. 102, nicely varnished and covered with linen, same as B104, without the head rests... 3 25

*G-1572 Gold Medal Back Rest No. 103, nicely varnished and covered with linen, same as B104, without the arm rests... 3 25

G-1571

Showing Pillow Attached by Straps.

G-1574

G-1574. THE GOLD MEDAL FOLDING BED TRAY NO. 136.

These bed trays are made of hardwood, finished and varnished in the best manner. The legs are held in position either when folded or open by a strong brace, and the trays are substantial in every way. Folded they are only 3x15x23 inches.

G-1668. THE GOLD MEDAL FOLDING BATH TUB NO. 20H.

Patented Nov. 24, 1903.

G-1668

The most convenient and complete portable bath tub ever invented, and will be found especially useful for hospitals in giving typhoid and for ordinary baths in rooms or ward.

The frame is of hardwood, rock elm, nicely finished, to which we have applied the principle of our patented metal joints by means of which it folds easily and compactly. The frame thus constructed stands firmly on the floor and is kept in the same position no matter how much weight the tub contains.

The cover of this tub consists of very heavy closely woven duck which is coated especially for us, with thoroughly refined, vulcanized rubber, cured and thus rendered tough and pliable. It is as easily cleaned as porcelain.

The shape is well shown in our cut. It is very similar to the metallic tubs. It is not suspended, but rests on the floor about one foot in width the entire length of the tub. Price\$13 00
